**The Craft of International History** Marc Trachtenberg, 2009-02-09 This is a practical guide to the historical study of international politics The focus is on the nuts and bolts of historical research that is on how to use original sources analyze and interpret historical works and actually write a work of history Two appendixes provide sources sure to be indispensable for anyone doing research in this area The book does not simply lay down precepts It presents examples drawn from the author's more than forty years experience as a working historian One important chapter dealing with America's road to war in 1941 shows in unprecedented detail how an interpretation of a major historical issue can be developed The aim throughout is to throw open the doors of the workshop so that young scholars both historians and political scientists can see the sort of thought processes the historian goes through before he or she puts anything on paper Filled with valuable examples this is a book anyone serious about conducting historical research will want to have on the bookshelf

**New Methodological Perspectives on Observation and Experimentation in Science** Wenceslao J. González, 2010-12-29 Observation and experimentation are central topics of philosophy and methodology of science The empirical sciences have commonly been associated to observational and experimental processes because they have been considered crucial for testing the contents of these Thus observation and experimentation have received attention from different angles and they have been historically relevant in the advancement of science Their philosophical methodological analysis includes some key aspects those related to axiological epistemological and methodological issues New Methodological Perspectives on Observation and Experimentation in Science deals with a classic topic that is seen from new angles Its nine chapters seek non traditional aspects trying to extend the boundaries of this philosophical methodological theme They are presented in five sections 1 A Philosophical Methodological Context 2 Experience and Scientific Observations 3 Empirical Support and Experiments in Science 4 Changes in the Framework on Observation and Experimentation and 5 Enlarging the Philosophical Scope Law and Ecology Wenceslao J Gonzalez is Professor of Logic and Philosophy of Science University of A Coruña He is a Full Member of the International Academy for Philosophy of Sciences AIPS Visiting fellow at the Center for Philosophy of Science University of Pittsburgh and a Team Leader of the European Science Foundation program entitled The Philosophy of Science in a European Perspective He has been named a Distinguished Researcher by the Main National University of San Marcos in Lima Peru He has been a visiting researcher at the Universities of St Andrews Münster and London LSE He has given lectures at the Universities of Pittsburgh Stanford Quebec and Helsinki The conferences in which he has participated include those organized by the Universities of Uppsala New South Wales Bologna Canterbury NZ and Beijing He has edited 26 volumes on philosophy and methodology of science

**Political Integration** Johan K. de Vree, 1972

**Emotion-Oriented Systems** Paolo Petta, Catherine Pelachaud, Roddy Cowie, 2011-02-04 Emotion pervades human life in general and human communication in particular and this sets information technology a challenge Traditionally IT has focused on allowing people

to accomplish practical tasks efficiently setting emotion to one side That was acceptable when technology was a small part of life but as technology and life become increasingly interwoven we can no longer ask people to suspend their emotional nature and habits when they interact with technology The European Commission funded a series of related research projects on emotion and computing culminating in the HUMAINE project which brought together leading academic researchers from the many related disciplines This book grew out of that project and its chapters are arranged according to its working areas theories and models signals to signs data and databases emotion in interaction emotion in cognition and action persuasion and communication usability and ethics and good practice The fundamental aim of the book is to offer researchers an overview of the related areas sufficient for them to do credible work on affective or emotion oriented computing The book serves as an academically sound introduction to the range of disciplines involved technical empirical and conceptual and will be of value to researchers in the areas of artificial intelligence psychology cognition and user machine interaction

**Encyclopedia of Data Warehousing and Mining, Second Edition** Wang, John, 2008-08-31 There are more than one billion documents on the Web with the count continually rising at a pace of over one million new documents per day As information increases the motivation and interest in data warehousing and mining research and practice remains high in organizational interest The Encyclopedia of Data Warehousing and Mining Second Edition offers thorough exposure to the issues of importance in the rapidly changing field of data warehousing and mining This essential reference source informs decision makers problem solvers and data mining specialists in business academia government and other settings with over 300 entries on theories methodologies functionalities and applications *Faith, Reason, and Culture* George Karuvelil, 2020-07-24 In this book George Karuvelil seeks to establish the rationality of religion and theology in the contemporary world Theology has always required some philosophical basis Moreover Christian theology has had a dynamic character that enabled it to adapt to more than one philosophy depending on the need of the time For instance it shifted in accordance with the change from Neo Platonism to Aristotelianism in the thirteen century However this dynamism has been

absent since the dawn of modernity when reason became identified with modern science to disastrous results. While the advent of postmodernism has brought the limits of modernism to light, it has done nothing to establish the rationality of religion other than to treat religion as a cultural phenomenon along with science. This book conceives fundamental theology as a discipline that seeks religious truth in the midst of diverse perspectives ranging from militant atheism to violent religious fanaticism.

International Encyclopedia of the Social & Behavioral Sciences Neil J. Smelser, Paul B. Baltes, 2001. The largest work ever published in the social and behavioural sciences. It contains 4000 signed articles, 15 million words of text, 90 000 bibliographic references and 150 biographical entries.

**Machine Learning** Marco Gori, 2017-11-20. Machine Learning: A Constraint Based Approach provides readers with a refreshing look at the basic models and algorithms of machine learning with an emphasis on current topics of interest that includes neural networks and kernel machines. The book presents the information in a truly unified manner that is based on the notion of learning from environmental constraints. While regarding symbolic knowledge bases as a collection of constraints, the book draws a path towards a deep integration with machine learning that relies on the idea of adopting multivalued logic formalisms like in fuzzy systems. A special attention is reserved to deep learning which nicely fits the constrained based approach followed in this book. This book presents a simpler unified notion of regularization which is strictly connected with the parsimony principle and includes many solved exercises that are classified according to the Donald Knuth ranking of difficulty which essentially consists of a mix of warm up exercises that lead to deeper research problems. A software simulator is also included. Presents fundamental machine learning concepts such as neural networks and kernel machines in a unified manner. Provides in depth coverage of unsupervised and semi supervised learning. Includes a software simulator for kernel machines and learning from constraints that also includes exercises to facilitate learning. Contains 250 solved examples and exercises chosen particularly for their progression of difficulty from simple to complex.

*The SAGE Encyclopedia of Qualitative Research Methods* Lisa M. Given, 2008-08-19. Qualitative research is designed to explore the human elements of a given topic while specific qualitative methods examine how individuals see and experience the world. Qualitative approaches are typically used to explore new phenomena and to capture individuals' thoughts, feelings, or interpretations of meaning and process. Such methods are central to research conducted in education, nursing, sociology, anthropology, information studies, and other disciplines in the humanities, social sciences, and health sciences. Qualitative research projects are informed by a wide range of methodologies and theoretical frameworks. The SAGE Encyclopedia of Qualitative Research Methods presents current and complete information as well as ready-to-use techniques, facts, and examples from the field of qualitative research in a very accessible style. In taking an interdisciplinary approach, these two volumes target a broad audience and fill a gap in the existing reference literature for a general guide to the core concepts.
