The Pattern of Life Börje Ekstig,2011-04-26 Our planet is crowded with a spectacular diversity of living creatures As a most peculiar fact the oldest of these are in general the most primitive whereas the most recent are the most advanced How can evolution be working in order to bring about such a counterintuitive result This raises the challenging question of a direction of evolution Is it proceeding in a certain direction is it improving is it even accelerating By introducing the concept of complexity the author suggests a new way of describing the process of evolution In this conception the human cultural evolution is found to be a continuous extension of biological evolution in a common process of ever increasing complexity characterized as a stepwise cumulative progression What is mans place in this process Is it meaningful to reflect upon this at all In fact in asking this very question we have at the same time answered it No other creature would Our brains provide us with a fantastic range of exclusive cognitive abilities and in this respect we are unique In this book we embark on an innovative exploratory and inter disciplinary adventure step by step following the author towards his quest of investigating evolution its direction and the place of ourselves in it

the challenges of distinguishing earthly signals from the extraterrestrial and managing vast volumes of data Amidst the tales of success stories and potential sightings find inspiration in the enthralling breakthroughs of SETI research including the enigmatic Wow signal As we look to the future the book envisions the next generation of radio telescopes and the trajectory of SDR and SETI home Detecting the Unknown doesn't just ask What if we find them it dares you to ponder humanity's place in the universe inspires the next generation of explorers and transcends cultural boundaries Embrace the cosmic drama and prepare for the ultimate quest for connection The universe is waiting Let's explore it together *Existence* Valentin Matcas, 2016-04-20 It is easy to distinguish what it is from what it is not just by telling them apart Since this is the simplistic empirical approach while studying existence Yet what exactly is existence itself How or where does existence exist Is existence limited to the human existence human cognition or the humankind Yes because all living beings are defined by existence just because the term being implies to be to exist However the term real implies the same Because the concept existence has a multitude of terms defining it and now we have to consider them while studying existence in all details And as you notice we are not looking for a superficial empirical study because we already have one since we already know that everything that exists exists and everything that does not exist does not exist We want more we want a comprehensive study of existence from all perspectives existential rational living interconnected social objective analytical created consensual cognitive natural mathematical consensual developmental scientific fiat empirical subjective philosophical ideological highjective accurate algorithmic legal and correspondent Only that from all these distinct perspectives of existence we end up with a distinct type of existence as we have to consider these But what exactly is there escaping the senses of perception of all living beings in this world The nonexistent certainly And what exactly exists and takes place beyond existence itself Again it is the nonexistent Yet this is the case only for us and from our perspective since existence is relative to any observer You have one existence defining you and it is your own existence And in this manner you may exist even on your own and you still exist for yourself Yet for others if they never encounter and never interact with you directly and implicitly then you do not exist for them you are simply part of the nonexistent according to them and so are they for you from your own perspective Because there might be zillions of worlds and realities similar to ours but if they never interact with us then they never exist for us while we never exist for them And this is the case for all realities because nothing exists objectively at the exterior of any reality not even the concept of exterior itself We already notice how existence is capable to define everything as existing or not in this simple Boolean manner And this is the case because existence stands towards the base of our world defining everything within to exist to be real or simply to be since it is the same concept However when you try to define existence itself you cannot since there is not much below it to form a meaningful base of knowledge defining it but only the absent the missing the unreal or the nonexistent distinguishing existence trivially by contrast This is your only mean to define accurately existence now as being different from the nonexistent and this is why you end up with a Boolean depiction for existence To

be or not to be But never to be and not to be While existence defines everything else in a similar Boolean manner you either exist or you do not You either interconnect with others being part of their existence or not You are either alive or not You are either fulfilling throughout life or not Throughout this book we study existence entirely through accurate facts from all perspectives and in all circumstances in order to understand it accurately Furthermore we use existence to define understand and explain everything related to humans and human life And since existence stands at the base of everything that exists this accounts for everything

The Human Thoughts Valentin Matcas, 2015-11-09 Thoughts are a natural result of your cognitive activity and they may be ideas knowledge beliefs impressions stereotypes memories needs feelings information suggestions and much more Thoughts are meant to determine directly your behavior throughout life while you fulfil your needs Thoughts make the difference if you are successful or not in life they determine directly your life and if you happen to neglect ignore confuse or forget them in any manner then you fail But aren't thoughts everywhere simply popping up in your mind you use them as they come and this is how you think and act in life No not exactly since right now there is this extraordinary idea just about to happen in the world and it can make you rich beyond your expectations if you can only generate it yourself and if you are the first to do so But can you Because if you cannot control your reasoning and therefore the generation of your own thoughts at will then can you actually reason Or who exactly does the reasoning for you if you cannot even control it Can you identify it Can you model it Do you know where thoughts come from No we do not know it yet or this is what psychology states but can you understand your thoughts and entire cognition even without the help of psychology Do you know what thoughts are and how the human thinking generates them along with all needs ideas feelings impressions memories and decisions Some thoughts are conscious and some unconscious and many times it seems that even the conscious cognitive activity remains uncontrolled not through human limitations but through human lack of understanding of the human mind and of the entire human cognitive activity There is more to know about thoughts reasoning intelligence and behavior and we will see it throughout the book along with everything necessary to manage thoughts and thinking in all circumstances Because you cannot understand anything in life at a higher cognitive level if you do not understand the human thoughts for the simple reason that you use thoughts throughout your reasoning in order to understand everything in life including yourself the world and your place and meaning in life and in the world Even more thoughts in general and your thoughts in particular define your reasoning and intelligences since intelligences count for the world through their reasoning thoughts and interconnectivity just the way living beings count for the world through their acts behavior and interconnectivity Thoughts construct your cognitive system and they develop you wholly throughout life through the gradual improvement of your cognitive system This is why you are who you are because you think the way you do because you have the thoughts that you do and certainly because you think exactly the thoughts that you do Throughout this book we integrate thoughts within the body brain mind and intelligences studying them in all details and from all

perspectives We study how thoughts originate develop and are controlled at the cognitive and social levels If you want to know more about thoughts ideas feelings learning and reasoning in general this book is for you **Higher Laws** Valentin Matcas,2016-04-20 You can never isolate the human civilization regardless of how much you strive to hide its past repel its neighbors and compromise its spirituality Because the wider world is connected with all parts reaching and influencing the rest hidden and in the open And what you can never defy are the higher beings seeing and monitoring everything since these always enforce their higher laws on you ensuring righteousness higher norms and good values overruling yours Yet humans may become misleading and persistent at times through hidden intentions They are not too bad but only greedy for pleasure and power the sweet tempting power ruling and enslaving this world And now they can enslave this world more than ever since they can keep the crowd distracted while having them in chains Yet there are higher laws watching them You know this charade and you know the players well since it goes on for some time yet what is significant for the topic of his book is how the higher laws manage to show their presence in our world as enclosed as it is a good presence the only hint of a wider world beyond and now we are eager to understand more Throughout this book we study this world and the entire higher world above with all beings and with their continuous interaction more or less harmonious along with their higher laws and proper agreements making everything possible We study everything related to humans and the higher laws including the human status jurisdictions rights systems of law harmony meaning intelligences development reasoning abilities behavior responsibilities and much more because these are always connected while forming similar lifelines of causality everywhere always remaining under the same vigilance under the same higher laws Because the higher laws are everywhere as they are always watching you The Human Attitudes Valentin Matcas,2016-04-20 Your attitudes are your predispositions or drives pushing you toward or away from your everyday activities The specific attitudes that you may control directly are your conscious attitudes while the attitudes that you may only influence throughout life are your subconscious highconscious and classconscious attitudes Your unconscious attitudes are your most numerous rigid and problematic attitudes since these attitudes always have a mind of their own as they have your entire unconscious mind While your conscious attitudes are part of your conscious reasoning and conscious decisions as they are relatively easier to control Your attitudes are your treasured assets in life by assisting you with your needs while watching over you and guiding you consistently throughout life since your attitudes are your constant drives urges desires intentions and predispositions toward or against everything that you encounter and do in life Therefore your attitudes are your subconscious intelligences accompanying your conscious reasoning throughout your decisions and fulfillment helping you influencing you and reminding you to do everything throughout life while helping you engage in positive constructive activities and stay away from irrelevant wasteful or harmful ones Your attitudes may be your priceless little helpers or they may transform into horrifying beasts controlling you twisting your thinking and ruining your life in an offensive manner destroying you and your loved ones in the process While

everything happens because your subconscious intelligence is stronger and more influential over your body and cognitive system than you the conscious intelligence Throughout this book we create a detailed model of human attitudes meant to explain why and how everything happens and how attitudes control your reasoning behavior and entire interconnectivity only for you to learn how to remain in control and how to get your life back the way it was before it is too late **The**

Globalization of Science Curricula Oliver Stacey, Giulia De Lazzari, Hilary Grayson, Hazel Griffin, Emily Jones, Amanda Taylor, David Thomas, 2018-02-12 Globalization is a powerful force with far reaching impacts on education and education policy The growth of large scale international surveys of student achievement and the increasing role played by intergovernmental agencies in education means that the influence that globalization exerts on education is likely to increase even further in the future This open access book provides a significant and timely investigation into the impacts that globalization has exerted on science curricula in a diverse range of countries using extensive data sets collected by the IEA between 1995 and 2015 Using a combination of quantitative and qualitative methods this book considers the extent to which there have been changes to the intended and implemented science curricula in different countries over the last 20 years Consideration is then given as to whether science curricula are becoming increasingly similar across countries over time Finally the issue of whether the basis of an international core curriculum can be identified is addressed Readers will gain a unique insight into the extent to which globalization and large scale international assessments have influenced science curricula in the last 20 years within both the primary and secondary phases Starship Colonial Valentin

Matcas, 2013-04-20 The adventure of Starship Colonial continues in this second book of The Storyteller series The Colonials explore new worlds searching for a new Earth influencing and benefiting from every civilization that they encounter Some remain behind to inhabit them making for a wider modern style colonization The most visible trace of the book is the interaction with very powerful beings those who decide the fate of the Universe A stronger plot of the story relates to people's behavior being aliens or not the specific way in which they react in various circumstances always learning from their experience The Captain Cathleen takes her share of the action she fails and succeeds throughout her adventures the way normal people do and she learns to tame her emotions and instincts to become more pragmatic to cope with tougher more demanding situations She applies everything to her life both on Starship Colonial and on Earth and her achievements exceed her wildest expectations However her achievements are irrelevant if she does not fulfill the mission assigned to her by the people of Earth Is her determination strong enough to fulfill it now when she has everything she ever wanted Jack remains an interesting puzzling character throughout the book influencing unknowingly the life of many accomplishing everything with the innocence of a child More characters emerge and develop from among the crew and colonists and from the people of the worlds they encounter Throughout the book and throughout this whole series there is a hidden consistent trace of liberation from ignorant stereotypes cold prejudices predetermined norms and irrelevant ideals As opposed to real life where the great

majority of people live the way it is taught some of the characters succeed in opening their eyes grasping this way and understanding a wider truth And yet at times bondage defeats freedom and they have to accept it helplessly which makes for the credible real complex plot of the book Enjoy
