Human Migration J. J. Mangalam,2014-07-15 In this guide to the literature on human migration J J Mangalam indexes over 2 000 titles that appeared in English from 1955 through 1962 An important feature of this work is the annotation of nearly 400 major articles on migration These annotations provide information on the main focus of the study the hypotheses tested and any special measuring devices employed The conclusions are also given using the authors words whenever possible To facilitate the use of this guide the author has compiled an index that lists not only the subjects treated but also the major variables used in each abstracted study thus the researcher who is interested in the use of certain variables can easily refer to the previous investigation of the influence of these factors upon migration In a comprehensive introduction Mangalam surveys the current state of studies of human migration and suggests a theoretical framework by which the vast amount of existing facts from different migration studies can be integrated and given meaning

Beyond Economic Migration Min Zhou,Hasan Mahmud,2023-01-17 Offers a critique of the economic model of immigration Most understandings of migration to the US focus on two primary factors Either there was trouble in the home country such as political unrest or famine that pushed people out or there was a general yearning for a better life or more opportunity often conceptualized as the American Dream Although many contemporary migrants in the United States have been driven by economic interests the processes of immigration and integration are shaped also by the intersection of a range of noneconomic factors in both sending and receiving countries The contributors to Beyond Economic Migration offer a nuanced look at a range of issues affecting motives to migrate and outcomes of integration including US immigration policy and the visa system labor market incorporation employment precarity identity and belonging and transnationalism relating to female migrants student migrants and temporary foreign workers Beyond Economic Migration argues that for the dream of fair and equitable migration to be realized analyses of cross border movements resettlement and integration must pay attention to how migrants individual attributes interact with institutional mechanisms and social processes

Migration as resource for identity construction Alexandra Deliu, 2019-12-10 In this book I make use of concepts such as collective identity identity construction migration as discursive resource and ethnicity in tackling the question of how identity is constructed by the interviewees in their interactions with the researchers More specifically a certain part of this constructionist setting is emphasized the role played by migration as concept brought by interviewees into the discussion flow in order to define social categories or in social identity theory's vocabulary in groups and out groups Given this analytical orientation using as introduction the words and story of a migrant among those whose voices I present and discuss seemed only natural The book is not focused on migration as phenomenon and it does not place it in causal relations to states of facts Instead it is a proposition to explore discourses and narratives of migration and the shifts in various social definitions performed within them It basically brings forward migration and identity as two related concepts and explores how the latter is constantly redefined in reference to the former The theoretical perspectives that link identity and migration presented here are assimilation and transnationalism and albeit from different directions they both relate to issues such as integration and dealing with borders be they political social or psychological Restructuring the Malaysian Economy Robert E.B.
