Missing Persons Derek Congram,2016-08-01 The work of finding and identifying missing persons is complex and requires the expertise of many people such as historians hunting through archives biological anthropologists reconstructing skeletons and psychologists preparing investigators to interview families of the disappeared Uniting the voices of 22 experts from around the world Derek Congram s collection of original papers centres its attention on those who are engaged in the location identification and repatriation of missing persons The contributors to this timely volume represent multiple disciplines and various fields including academia government and civil service but are connected by a shared conviction that accounting for the missing is vital for a just society The chapters concentrate on victims of physical or structural violence including armed conflict repressive regimes criminal behaviour and racist and colonial policies towards Indigenous persons and minority populations Some contexts are familiar morgues mass graves and battlefields while others are surprising such as schoolyards and a museum in Canada Although the circumstances of the disappearances vary greatly *Missing Persons* illustrates the connections between these disparate contexts Multidisciplinary in scope this edited collection is a valuable comparative resource for students academics and practitioners in forensic anthropology anthropological archaeological ethics forensic psychology criminal justice and human rights

21st Century Criminology: A Reference Handbook J. Mitchell Miller,2009-08-06 Criminology has experienced tremendous growth over the last few decades evident in part by the widespread popularity and increased enrollment in criminology and criminal justice departments at the undergraduate and graduate levels across the U S and internationally Evolutionary paradigmatic shift has accompanied this surge in definitional disciplinary and pragmatic terms Though long identified as a leading sociological specialty area criminology has emerged as a stand alone discipline in its own right one that continues to grow and is clearly here to stay Criminology today remains inherently theoretical but is also far more applied in focus and thus more connected to the academic and practitioner concerns of criminal justice and related professional service fields Contemporary criminology is also increasingly

interdisciplinary and thus features a broad variety of ideological orientations to and perspectives on the causes effects and responses to crime 21st Century Criminology A Reference Handbook provides straightforward and definitive overviews of 100 key topics comprising traditional criminology and its modern outgrowths The individual chapters have been designed to serve as a first look reference source for most criminological inquires Both connected to the sociological origins of criminology i e theory and research methods and the justice systems response to crime and related social problems as well as coverage of major crime types this two volume set offers a comprehensive overview of the current state of criminology From student term papers and masters theses to researchers commencing literature reviews 21st Century Criminology is a ready source from which to quickly access authoritative knowledge on a range of key issues and topics central to contemporary criminology This two volume set in the SAGE 21st Century Reference Series is intended to provide undergraduate majors with an authoritative reference source that will serve their research needs with more detailed information than encyclopedia entries but not so much jargon detail or density as a journal article or research handbook chapter 100 entries or mini chapters highlight the most important topics issues questions and debates any student obtaining a degree in this field ought to have mastered for effectiveness in the 21st century Curricular driven chapters provide students with initial footholds on topics of interest in researching term papers in preparing for GREs in consulting to determine directions to take in pursuing a senior thesis graduate degree career etc Comprehensive in coverage major sections include The Discipline of Criminology Correlates of Crime Theories of Crime Justice Measurement Research Types of Crime and Crime the Justice System The contributor group is comprised of well known figures and emerging young scholars who provide authoritative overviews coupled with insightful discussion that will quickly familiarize researchers students and general readers alike with fundamental and detailed information for each topic Uniform chapter structure makes it easy for students to locate key information with most chapters following a format of Introduction Theory Methods Applications Comparison Future Directions Summary Bibliography Suggestions for Further Reading and Cross References Availability in print and electronic formats provides students with convenient easy access wherever they may be [Deviance](#) Leon Anderson,2024-03-27

[Deviance](#) Social Constructions and Blurred Boundaries is designed for courses on social deviance that take a strong sociological perspective The book draws on up to date scholarship across a wide spectrum of deviance categories providing a symbolic interactionist analysis of the deviance process The book addresses positivistic theories of deviant behavior within a description of the deviance process that encompasses the work of deviance claims makers rule breakers and social control agents Students are introduced to the sociology of deviance and learn to analyze several kinds of criminal deviance that involve unwilling victims such as murder rape street level property crime and white collar crime Students also learn to examine several categories of lifestyle and status deviance and develop skills for critical analysis of criminal justice and social policies Overall students gain an understanding of the sociology of deviance through cross cultural comparisons historical

overview of deviance in the U S and up close analysis of the lived experience of those who are labeled deviant as well as responses to them in the U S today Homicide, Patterns, Prevention, and Control Heather Strang, Sally-Anne Gerull, Australian Institute of Criminology, 1993 Conference papers on the patterns prevention and control of homicide containing case studies statistical data perpetrator profiles legal cultural and gender issues and perspectives by police and forensic experts A discussion of prevention and control strategies highlights the effects of childhood exposure to violent attitudes and behaviours as well as the problems of reaching consensus on firearms control Includes a bibliography and an index Serial Murders United States. Congress. Senate. Committee on the Judiciary. Subcommittee on Juvenile Justice, 1984 **Sexual Murder** Louis B. Schlesinger, 2021-03-22 Sexual Murder Catathymic and Compulsive Homicides is the culmination of the author s 45 years of experience with and studying sexually motivated homicide Sexual murders are generally of two types catathymic and compulsive Catathymic homicides are caused by a breakthrough of underlying sexual conflicts They can be unplanned explosive acute attacks or planned murders stemming from a chronic obsession with or disturbed attachment to the victim In compulsive homicides a fusion of sex and aggression results in a powerful internal drive which pushes the offender to seek out victims to kill and the killing itself is sexually gratifying These murders also may be planned or unplanned In compulsive homicides that are unplanned the urge breaks through and disrupts the offender s controls when a victim of opportunity crosses his path The compulsive offender who plans his crimes often eludes law enforcement and as a result he can have multiple serial victims over extended periods of time Both forms of sexual murder the catathymic and the compulsive are presented in this volume from a clinical descriptive perspective encompassing case studies with analysis Recent advances in empirical research in sexual murder including findings from the joint research project between John Jay College of Criminal Justice and the FBI Behavioral Analysis Unit in Quantico has published many important studies These include such topics as necrophilia foreign object insertions in sexual homicide ritual and signature and temporal patterns in serial sexual homicide mass murder crime scene staging in homicide and undoing symbolic reversal at homicide scenes All such research will be included and incorporate into this fully updated Second Edition including approximately fifty new clinical case studies Bloodstain Patterns Anita Y. Wonder, 2015-01-07 Bloodstain Patterns Identification Interpretation and Application combines material from Blood Dynamics 2001 and Bloodstain Pattern Evidence 2007 with updated case work and scientific advances from medical and hard sciences The text expands coverage of such areas as arterial damage pattern identification staging of crime scenes legal applications and problems from both sides of the bench and extending teaching and training to those outside criminal justice With violent offenders more aware of crime scene investigation techniques and attempting to frame others the text expands outdated basic training programs that are insufficient to identify attempts to confuse the investigation This book clarifies previous understandings as well as bridges the gap toward future advance courses Based on the work of Paul Leland Kirk the book s focus is on first line investigators

accuracy in identifying specific bloodstain patterns correctly interpreting and applying them to casework Combines and updates material from Blood Dynamics and Bloodstain Pattern Evidence into one comprehensive reference Covers new topics including arterial damage pattern identification staging of crime scenes legal applications and problems from both sides of the bench More than 300 full color photographs some with line overlays showing the objective criteria which identify patterns

Verb Valency Patterns

Susen Faulhaber, 2011-04-29 Taking as its point of departure the general assumption that meaning is crucial in accounting for verb complementation this volume presents the results of an empirical study of verb complementation patterns of semantically similar English verbs The semantic parallels of the verbs selected are based on their coverage in dictionaries first and foremost the Valency Dictionary of English Herbst Heath Roe and Gtz 2004 as well as corpus research and native speaker assessments It is demonstrated that despite obvious similarities in complementation between such verbs there are still a significant number of syntactic discrepancies which cannot be accounted for on the basis of meaning alone and that semantic factors such as selection restrictions and aspectual properties do not sufficiently correlate with the verbs syntactic properties and consequently do not have sufficient explanatory power Thus the results rigorously challenge so called projectionist approaches which assume the position that complementation is determined by semantic properties and thus ought to be predictable on this basis In the light of a general trend towards placing greater emphasis on semantic aspects in the fields of construction grammar and cognitive grammar too the number of idiosyncratic phenomena on the level of single complements as well as whole patterns clearly underlines the importance of storage phenomena as opposed to rule based generation As such it stresses the necessity of finding ways to systematically account for item specific properties of verbs in any grammatical theory of the English language The book is targeted at all linguists interested in the relationship between semantics and syntax which is one of the prevalent questions in modern linguistics also in the field of construction grammar and cognitive grammar Since the data is presented in a way which is compatible with various theories of complementation the target group is clearly not restricted to any specific linguistic school Because of the large amount of item specific information presented this book is also a valuable source for grammarians and lexicographers

Putting Intellectual

Property in Its Place Laura J. Murray, S. Tina Piper, Kirsty Robertson, 2014-03 Putting Intellectual Property in its Place

examines the relationship between creativity and intellectual property law on the premise that despite concentrated critical attention devoted to IP law from academic policy and activist quarters its role as a determinant of creative activity is overstated. The effects of IP rights or law are usually more unpredictable, non-linear or illusory than is often presumed. Through a series of case studies focusing on nineteenth century journalism, fake art, plant hormone research, between the wars online knitting communities, creativity in small cities and legal practice, the authors discuss the many ways people comprehend the law through information and opinions gathered from friends, strangers, coworkers and the media. They also show how people choose to share, create, negotiate and dispute based on what seems fair, just or necessary in the context of how their community functions in that moment while ignoring or reimagining legal mechanisms. In this book, authors Murray Piper and Robertson define the everyday life of IP law, constituting an experiment in non-normative legal scholarship and in building theory from material and located practice.

Victimology William G. Doerner, Steven P. Lab, 2024-08-06

Victimology Tenth Edition covers the scope of crime victims suffering in the US, offering a history of victims and the measurement of victimization, an explanation of the victim's role in the criminal justice process and a recounting of the issues crime victims face as a result of crime and involvement in the criminal justice process. Doerner and Lab, both well-regarded scholars, write compellingly about how the current criminal justice system can be transformed into a victim's justice system. Theory is woven together with the description of each topic, and specific examples illustrate each point. The book goes on to address the full impact of victimization, and a final section details specific types of victimization ranging from violent crimes including child and elder abuse to property crime to crime in the school and in the workplace. The authors explain how obstacles hinder the pursuit of justice and provide significant policy and programming suggestions to render the system more victim-friendly. Appropriate for undergraduate as well as early graduate students in *Victimology* courses in Criminology, Criminal Justice, Sociology and Justice Studies programs, this book offers instructor's aides with test bank and PowerPoint lecture slides as well as a companion site with student resources.
