**Encyclopedia of Government and Politics** M. E. Hawkesworth, Maurice Kogan, 2004 This is a brand new edition of the critically acclaimed Encyclopedia of Government and Politics which has been fully revised and updated to provide a systematic account of politics and political studies at the beginning of the new millennium Providing a penetrating analysis of government and politics at a global regional and nation state level the Encyclopedia assesses both traditional and contemporary approaches and projects the paths of future research The articles provide a degree of critical analysis far beyond a simple descriptive outline of the subject Internationally respected contributors have been carefully selected to present contending approaches to related topics both to clarify the political

implications of the various methodologies and to enrich the portrayal of political life With its expanded revised and updated coverage Encyclopedia of Government and Politics is more than ever an indispensable tool for students teachers professional analysts and policy makers

*International Relations and Scientific Progress* Patrick James, 2002 International Relations and Scientific Progress contends that a theory focusing on the structure of the international system explains a wider and more interesting range of events in world politics than other theories Such theorizing appears to be out of favor as the result of the apparent failure by structural realism the most prominent system level theory over the last two decades on any number of fronts most notably an inability to anticipate the ending of the Cold War and its aftermath This new book is put forward as the most comprehensive and innovative theoretical work on paradigms in international relations since the publication of Theory of International Politics which created structural realism more than two decades ago With appropriate revisions however structural realist theory can compete effectively and reclaim its primacy The first part of International Relations and Scientific Progress assesses the meaning of progress in the discipline of international relations a process that culminates in the creation of a new concept the scientific research enterprise The second part reviews structural realism within that context and identifies a lack of connection between theory and research that links power based indicators to international conflict crisis and war This part of the book makes the case for an elaboration of structural realism by showing that a system level theory based on structure has great unrealized explanatory potential By comparison the current overwhelmingly research oriented agenda on state dyads imposes severe limitations on understanding that are not currently appreciated Part Three sums up the work and explores new directions most notably as related to empirical testing of an elaborated version of structural realism that focuses on both continuity and change in the international system

*Guide to the Scientific Study of International Processes* Sara McLaughlin Mitchell, Paul F. Diehl, James D. Morrow, 2012-07-17 Dedicated to the empirical analysis of data from the world of international relations SSIP scholars tend to focus on interstate conflicts civil wars and conflict management The range of perspectives in this edited volume provide a comprehensive introduction to SSIP theory and methodology Fresh approach traces intellectual development of research approaches rather than merely summarizing results Features original SSIP material not found in other books Includes a number of essays with a broader assessment of SSIP methods ideal for younger scholars interested in the approach Includes recent SSIP analyses exploring issues such as civil wars

Vasquez,1993-05-06 This book constructs a new scientific explanation of the onset and expansion of war and the conditions of peace The author describes systematically those factors common to wars between equal states to see if there is a pattern that suggests why war occurs and how it might be avoided or mitigated delineating the typical path by which relatively equal states have become embroiled in wars with one another in the modern global system Emphasis is placed on the issues that give rise to war and how the practices of power politics lead to a series of steps that produce war rather than peace The book differs from others in that it employs the large number of empirical findings generated in the last twenty five years as the basis of its theorizing and integrates these research findings so as to advance dramatically the scientific knowledge of war and peace      **Environmental Conflict** Paul Diehl,Nils Petter Gleditsch,2018-03-05 As environmental security gains

increasing attention there is a pressing need for rigorous examinations of environmental causes of conflict and the potential for conflict resolution Environmental Conflict explores the role of environmental degradation or scarcity in intrastate or interstate violent conflict and how cooperative efforts might forestall such undesirable consequences By presenting cutting edge conceptual and empirical research examining how environmental factors may influence group and state decisions to employ violence this book enhances understanding of the possibilities for future conflict and how to prevent it      Conflicts in the 21st Century Lucia Annunziata,Marta Dassú,2002      The Onset of World War (Routledge Revivals) Manus I.

Midlarsky,2014-07-16 First published in 1988 this historical and quantitative analysis of war defines systemic world wars as conflicts of wide scope and intensity which leave profound historical legacies in their wake Manus Midlarsky examines various possible explanations for the onset of such past wars as the Peloponnesian War the Thirty Years War and World Wars I and II Midlarsky develops his basic theory of systemic war outlining the reasons for the absence of wars of this magnitude and describing the violations of certain structural conditions that are associated with the onset of world war A timely and

relevant reissue this insightful analysis will be of particular value to those with an interest in International Relations War and Peace Studies Military History and Security Studies      National and International Conflicts, 1945-1995 Frank R. Pfetsch, Christoph Rohloff, 2013-10-11 The information flow about crises and conflicts is highly selective the media only focus on a few major conflicts at a time Many conflicts are neglected others soon forgotten after the fighting ends This book fills the gaps and offers a systematic overview of all crises and conflicts in and among states since 1945 and traces the global trends of conflict development Based on the broad empirical basis of the Conflict Simulation Model KOSIMO Pfetsch and Rohloff use an integrated approach to cover many forms and types of political conflicts both peaceful and violent      *War and Democratization* Wolfgang Merkel, Sonja Grimm, 2013-09-13 Promotion of democracy in post war and post conflict societies became a topic during the 1990s The book deals with the legality legitimacy and effectiveness of military interventions where the international community of states not only felt impelled to engage in military humanitarian or peace building missions but also in long term state and democracy building External actors particularly engaged in four modes namely enforcing democratization by enduring post war occupation mode 1 restoring an elected government by military intervention mode 2 intervening in on going massacres and civil war with military forces humanitarian intervention and thereby curbing the national sovereignty of those countries mode 3 and forcing democracy on rogue states by democratic intervention in other words democracy through war mode 4 The contributions link juridical and philosophical reflections on just war ad bellum with empirical evidence post bellum in Afghanistan Georgia Serbia Croatia Cambodia and East Timor All empirical analyses stress the complexity and difficulties to establish democracy in post conflict societies driven or monitored by external actors Such an endeavour implies a comprehensive agenda of political social and economic methods of peace building However if external actors withdraw before the roots of democracy are deep enough and before democratic institutions are strong enough to stand alone then the entire endeavour may fail This book was originally published as a special issue of *Democratization*      *Building and Using Datasets on Armed Conflicts* Mayeul Kauffmann, 2008-04-15 The so called hard or exact sciences with their necessary emphasis on technology and on the technical are hardly reputed for being very human and conversely the so called human sciences are often pronounced as soft because they cannot be based on the certainties associated with the former The search for truth which is the essential dimension of the construction of a peaceful world therefore has to navigate between considerations of a philosophical nature and the concrete data of the hard sciences If ever since the humanism of the Renaissance period we have been happy to lay claim to the wisdom of one of its great writers Rabelais who taught a moral lesson to the young Pantagruel with the neat formula science without conscience is the ruin of the soul we nonetheless stand in awe before modern scientific advances and the extraordinary achievements that they have opened up If everything is not permissible at least everything seems possible      *Regular Soldiers, Irregular War* Devorah S. Manekin, 2020-08-15 What explains differences in soldier participation in violence during irregular war How do ordinary men

become professional wielders of force and when does this transformation falter or fail Regular Soldiers Irregular War presents a theoretical framework for understanding the various forms of behavior in which soldiers engage during counterinsurgency campaigns compliance and shirking abuse and restraint as well as the creation of new violent practices Through an in depth study of the Israeli Defense Forces repression of the Second Palestinian Intifada of 2000 2005 including in depth interviews with and a survey of former combatants Devorah Manekin examines how soldiers come both to unleash and to curb violence against civilians in a counterinsurgency campaign Manekin argues that variation in soldiers behavior is best explained by the effectiveness of the control mechanisms put in place to ensure combatant violence reflects the strategies and preferences of military elites primarily at the small unit level Furthermore she develops and analyzes soldier participation in three categories of violence strategic violence authorized by military elites opportunistic or unauthorized violence and entrepreneurial violence violence initiated from below to advance organizational aims when leaders are ambiguous about what will best serve those aims By going inside military field units and exploring their patterns of command and control Regular Soldiers Irregular War sheds new light on the dynamics of violence and restraint in counterinsurgency

**The Challenge of Politics** Douglas W. Simon, Joseph Romance, Neal Riemer, 2019-01-02 This is a textbook that offers students a good introduction to the science of politics while emphasizing the moral empirical and prudential dimensions of politics Prosper Bernard Jr College of Staten Island This updated Sixth Edition of The Challenge of Politics enables students to see how the subfields of political science converge around a set of crucial questions such as Can we as citizens and students articulate and defend a view of the good political life and its guiding political values Can we bring political wisdom to bear on judgments about politics and public issues and Can we develop a science of politics to help us understand significant political phenomena the empirical realities of politics Balancing lessons of classic and contemporary theory with contemporary politics and empirical study the book equips students with the tools they need to explore the impact of philosophy and ideology recognize major forms of government evaluate empirical findings and understand how policy issues directly affect people s lives The updated Sixth Edition includes new material on the 2016 presidential elections the role of social media in politics and an expanded discussion on the rise of populist movements Give your students the SAGE edge SAGE edge offers a robust online environment featuring an impressive array of free tools and resources for review study and further exploration keeping both instructors and students on the cutting edge of teaching and learning Learn more at edge.sagepub.com/simon6e

**Between Development and Destruction** Kumar Rupesinghe, Paul Sciarone, Luc van de Goor, 2016-07-27 Much has already been written about the effects of the changes of the Cold War on conflict The ongoing disengagement of East and West from bipolar Cold War politics has resulted in an unstable international political situation which is characterized by regional conflicts Most analyses now concentrate on the consequences for Europe and the former communist Central and East European states This book however explores the effects for the Third World The contributors

provide major theoretical analyses of the causes of conflict in developing countries Four main factors are distinguished the processes of state formation and nation building the rise or return of ethnicity and nationalism socio economic factors and the armaments conflict nexus The volume also provides in depth regional analyses as well as policy perspectives on the issue of conflict and development

**Nations at War** Daniel S. Geller,J. David Singer,1998-02-13 Nations at War provides an explanation of war in international politics grounded on data based empirical research The book classifies and synthesizes the research findings of over 500 quantitative analyses of war at the analytic level of the state dyad region and international system Because wars follow from political decisions two basic decision making models the rational and the non rational are examined in relation to the explanatory framework of the volume In addition case analyses of two wars the Iran Iraq War 1980 and World War I 1914 are provided as demonstrations of scientifically based explanations of historical events The primary structural factors responsible for the onset and seriousness of war are identified and the explanations are developed according to the scientific model of covering laws The conclusion presents a discussion of the potential for probabilistic conditional predictions of conflict within the context of war and peace studies
