Paul And The Rain Forest:

A Rain Forest ABC Amanda Doering, 2005 Introduces rain forests through photographs and brief text that uses one word relating to rain forests for each letter of the alphabet *The Tropical Rain Forest* Marius Jacobs, 2012-12-06 In recent years tropical forests have received more attention and have been the subject of greater environmental concern than any other kind of vegetation There is an increasing public awareness of the importance of these forests not only as a diminishing source of countless products used by mankind nor for their effects on soil stabilization and climate but as unrivalled sources of what today we call biodiversity Threats to the continued existence of the forests represent threats to tens of thousands of species of organisms both plants and animals It is all the more surprising therefore that there have been no major scientific accounts published in recent years since the classic handbook by Paul W Richards *The Tropical Rain Forest* in 1952 Some excellent popular accounts of tropical rain forests have been published including Paul Richards' *The Life of the Jungle* and Catherine Caulfield's *In the Rainforest and Jungles* edited by Edward Ayensu There have been numerous often conflicting assessments of the rate of conversion of tropical forests to other uses and explanations of the underlying causes and in 1978 UNESCO UNEPI FAO published a massive report *The Tropical Rain Forest* which although full of useful information is highly selective and does not fully survey the enormous diversity of the forests [Tropical Forest Development Projects](#) United States. Congress. House. Committee on Science and Technology. Subcommittee on Natural Resources, Agriculture Research, and Environment, 1985 **Foundations of Tropical Forest Biology** Robin L. Chazdon, T. C. Whitmore, 2002-02 This book presents a timely collection of pioneering work in the study of these diverse and fascinating ecosystems It consists of facsimiles of papers chosen by world experts in tropical biology as the classics in the field [The Amazon Rain Forest](#) Ann Heinrichs, 2010 Our world abounds with the wonders of natural beauty Readers of the books in this series will discover mysterious exciting and exotic natural landforms Through the study of science and social studies the authors show the diversity of our planet and provide information on the geological history plants animals and people who populate each landform as well as the environmental issues by which each landform is threatened Each title in the series also establishes the importance of the history culture and environment of the landform in relation to the region in which it is located with stunning photography maps and informative sidebars Nature's Wonders offers a multidisciplinary approach to the study of the natural wonders of the world *Tropical Rain Forest: A Wider Perspective* F.B. Goldsmith, 2012-12-06 The international perspective for this book is the unprecedented level of concern over deforestation recognized by the meeting of world leaders at the 1992 Earth Summit in Rio de Janeiro and culminating in the appointment of the Intergovernmental Panel on Forests IPF under the auspices of the UN Commission on Sustainable Development The wide range of issues covered by the authors in this volume reflects the breadth of the international debate from national policies and activist campaigning through economic and social objectives to the sustainable management of forest and soil resources Since the conservation campaigns of

the 1980s the focus of international concern has widened from tropical rain forests to all forest formations in all regions with increased recognition of global values and common responsibilities. However, while forest cover in some temperate countries is increasing, irrational deforestation at historically unprecedented levels of damage to biodiversity and to other environmental values remains most acute in tropical countries where the need to use the natural resources for sustainable development is greatest and the capability weakest. While accepting the urgency of the situation and the need for greater coherence of action at a global level, the 1997 report of the IPF to the UN Commission emphasized the powers and responsibilities of national governments and the importance of National Forest Programmes but with the fuller participation of local communities and with enhanced access to international assistance.

Alchemy in the Rain Forest Jerry K. Jacka, 2015-10-23. In *Alchemy in the Rain Forest* Jerry K. Jacka explores how the indigenous population of Papua New Guinea's highlands struggle to create meaningful lives in the midst of extreme social conflict and environmental degradation. Drawing on theories of political ecology, place and ontology and using ethnographic, environmental and historical data, Jacka presents a multilayered examination of the impacts large-scale commercial gold mining in the region has had on ecology and social relations. Despite the deadly interclan violence and widespread pollution brought on by mining, the uneven distribution of its financial benefits has led many Porgerans to call for further development. This desire for increased mining, Jacka points out, counters popular portrayals of indigenous people as innate conservationists who defend the environment from international neoliberal development. Jacka's examination of the ways Porgerans search for common ground between capitalist and indigenous ways of knowing and being points to the complexity and interconnectedness of land, indigenous knowledge and the global economy in Porgera and beyond.

Valuing Goods and Services from Tropical Forests and Woodlands H. M. Gregersen, 1982. *Silvics of North America*, 1990. **Tropical Rain Forests** Richard T. Corlett, Richard B.

Primack, 2011-03-03. The first edition of *Tropical Rain Forests: an Ecological and Biogeographical Comparison* exploded the myth of the rain forest as a single uniform entity. In reality, the major tropical rain forest regions in tropical America, Africa, Southeast Asia, Madagascar and New Guinea have as many differences as similarities as a result of their isolation from each other during the evolution of their floras and faunas. This new edition reinforces this message with new examples from recent and on-going research. After an introduction to the environments and geological histories of the major rain forest regions, subsequent chapters focus on plants, primates, carnivores and plant eaters, birds, fruit bats and gliding animals and insects, with an emphasis on the ecological and biogeographical differences between regions. This is followed by a new chapter on the unique tropical rain forests of oceanic islands. The final chapter, which has been completely rewritten, deals with the impacts of people on tropical rain forests and discusses possible conservation strategies that take into account the differences highlighted in the previous chapters. This exciting and very readable book, illustrated throughout with color photographs, will be invaluable reading for undergraduate students in a wide range of courses as well as an authoritative reference for

graduate and professional ecologists conservationists and interested amateurs *Perspectives on Africa* Roy Richard Grinker, Stephen C. Lubkemann, Christopher B. Steiner, 2010-05-17 The second edition of *Perspectives on Africa* A Reader in Culture History and Representation is both an introduction to the cultures of Africa and a history of the interpretations of those cultures Key essays explore the major issues and debates through a combination of classic articles and the newest research in the field Explores the dynamic processes by and through which scholars have described and understood African history and culture Includes selections from anthropologists historians philosophers and critics who collectively reveal the interpenetration of ideas and concepts within and across disciplines regions and historical periods Offers a combined focus on ethnography and theory giving students the means to link theory with data and perspective with practice Newly revised and updated edition of this popular text with 14 brand new chapters and two new sections Conflict and Violent Transformations and Development Governance and Globalization Deforesting the Earth Michael Williams, 2003 Clearing in the deep past Reaching out europe and the wider world The global forest The Organ Grinders Bill Fitzhugh, 2010-08-31 Bill Fitzhugh strikes again Following his widely acclaimed debut novel Pest Control The London Times called it one of the funniest most off beat thrillers in years Fitzhugh turns his satirical eye to the merging of medical science and big business with hilarious and outrageous results Paul Symon is an environmentalist who s out to make the world a better place but he faces too much disjointed information public apathy and self serving talk Not to mention greedy despoiler Jerry Landis a venture capitalist dying of a rare disease that accelerates the aging process Landis cares only about making more money and finding a way to arrest his medical condition That brings him and his fortune to the wild frontier of biotechnology where his people are illegally experimenting with cross species organ transplantation in California while breeding genetically altered primates at a secret site in the piney woods of south central Mississippi There s also an eco terrorist on the loose bent on teaching hard lessons to people who think the Earth and its creatures are theirs to destroy These forces together with fifty thousand extra large chacma baboons collide in an explosion of laughter and wonder that Bill Fitzhugh s growing league of admirers is coming to recognize as his very own *Islands of Rainforest* Edvard Hviding, Tim Bayliss-Smith, 2018-05-08 This title was first published in 2000 An original and thought provoking analysis of modern initiatives in the tropical rain forest While issues such as logging eco timber eco tourism have been widely analyzed from an outsider s perspective this book considers them from the local people s viewpoint in terms of a long history of the rainforest uses The authors demonstrate that the relationship of indigenous people to the tropical forest is not essentially timeless nor is it primarily spiritual or mystical It is in fact firmly connected to modern realities while still being rooted in historical beliefs and practices Standing at the intersection of anthropology historical geography and rainforest ecology and also at the interface of the local and the global this ethnographically grounded study dispels a number of commonly held assumptions It reveals how processes of impact are actually two way interactions as local communities in Melanesia incorporate industries like logging into rapidly

evolving post colonial society and economy **Public Policies and the Misuse of Forest Resources** World Resources Institute, 1988-09-30 Six contributors explore the role of governments in accelerating the rate of forest destruction by providing direct and indirect subsidies to support what would otherwise be non commercial logging operations Without these financial incentives most timber operations in the tropics would cease In a series of country by country investigations including examples from the developed and developing worlds this book documents the government policies that are leading to the misuse of forest resources Each is written by an authority on the country and each contains descriptive analytical and empirical material on key policies and their effects The final country analysis focuses on the United States where the consequences of the subsidized timber sales by the US Forest Service from most of the national forests are discussed The book concludes with an overview of the impact of forest policies and the role of bilateral and multilateral agencies in their formulation By directing attention toward the political dimension involved in forest clearance this book will provide a clearer insight into the basic reasons why forests continue to be destroyed despite the outcry raised by conservationists Ecology of Tropical Rainforests, 1979-85 Jayne T. MacLean, 1985 Rainforest Organizations Steve Shipp, 1997 Rainforests home to more than half of all plant and animal species on earth while covering less than six percent of the world's land area have intricate ecosystems with multitudes of animal and plant species including humans Yet deforestation of the rainforests has greatly increased in the past half century Ten thousand years ago rainforests covered an estimated 9.5 million square miles but as millions of trees are lost daily to agricultural and commercial development scientific studies project the reduction of rainforests to six million square miles by the year 2000 and 3.5 million square miles by 2050 Numerous scientific political conservationist public information and other organizations have been formed to address every aspect of rainforests over 120 worldwide can be found in this directory Each entry lists the address phone number contact person e mail or Internet address if available mission statement or goals publications and often the group's history and current projects All listed agencies and organizations readily accept queries for information about rainforests and most invite participation in their activities and projects *Surviving the Rainforest* Louise Spilsbury, 2016-07-15 Those lost in the rainforest have a lot to be worried about From sudden rainstorms to disease carrying insects there are a lot of dangers that need to be considered However readers of this book will be prepared Through detailed descriptions of how to build shelter gather food and water and how to handle the possibility of wild animals readers learn about the rainforest ecosystem and how to use it well Survival stories of real people add a captivating element to the main content and full color photographs let readers travel deep into the rainforest without getting lost **Forests, Water and People in the Humid Tropics** M. Bonell, L. A. Bruijnzeel, 2009-12-17 *Forests Water and People in the Humid Tropics* is a comprehensive review of the hydrological and physiological functioning of tropical rain forests the environmental impacts of their disturbance and conversion to other land uses and optimum strategies for managing them The book brings together leading specialists in such diverse fields as

tropical anthropology and human geography environmental economics climatology and meteorology hydrology geomorphology plant and aquatic ecology forestry and conservation agronomy The editors have supplemented the individual contributions with invaluable overviews of the main sections and provide key pointers for future research Specialists will find authenticated detail in chapters written by experts on a whole range of people water land use issues managers and practitioners will learn more about the implications of ongoing and planned forest conversion while scientists and students will appreciate a unique review of the literature
