

Unit IG2: Risk assessment

Part 1: Background

Include in here the organisation's name* and location* and number of workers. You must then go on to give a description of the main activities/products/services carried out. You must also describe the area to be risk assessed eg. whole site, and anything else that you consider relevant (approximately 150 to 200 words):

Adam Trading company 1-8 Industrial Area Islamabad, Pakistan. A company consist of 40 employees and working in a day shift only. Company is operational for 10 hours in a day which open at 08:30 am and closed at 06:30 pm, and break time is 01:00 pm to 02:00 pm. Friday is weekly off day for all employees.

Adam Trading Company is an intermediate size trading company which consist of Main Office, a warehouse and a display store. The business consists of construction machinery and industrial equipment for sales and rent along with their related spare parts and also provides the maintenance services for equipments and machines which are sold to the customers and companies.

The machines and equipment includes industrial elevators, compaction equipment, passenger material hoist, cradles, power generator, Motors, power generator, cement mixtures and machines spare parts.

The risk assessment I am covering in this report of different activities of warehouse, like loading and unloading of machinery, workshop works, hot works, rest area, slips and trips work at height, work in hot weather, health welfare and work environment. The operation manager and admin manager both are responsible for health and safety at work and both managers are reporting to Finance and Managing directors.

You must now give a brief outline on how you completed the risk assessment (approximately 200 words):

First of all I took help from Nebosh IGC Unit 1 & 2 risk assessment elements and I also visited HSE website <https://www.hse.gov.uk/risk/casestudies/pdf/warehouse.pdf>, <https://www.hse.gov.uk/risk/casestudies/pdf/newsagent.pdf> I studied it is very informative source for guidance. After looking from this source of information, I have formally physically visited warehouse and walking all around the area of warehouse there was nothing to cause harm, then I met with workers, talking to them to learn from their knowledge and experience and concerns about health and safety issues. There is no compliance of health and safety, no training was provided by employer, working under steel roof in a hot weather and in high temperature, no fans & ac were available even not in rest area, welfare facility also not tolerate able and young forklifts driver was not well trained in the result near misses, and accident occurred and management is not too serious on this matter although workers frequently complaint to supervisor and operation managers to provide safe system of work in the warehouse as it is the employees legal rights. After discussion with workers, I then also met with operation manager and admin manager in a head office who both are responsible for health and safety and reporting to Managing Director. I have observed at the accident book to study what had previously resulted in accidents and near misses.

When evaluating the control measures, I also referred the HSE's approved code of practice when looking for control measure as manual handling.
