Personal Decisions:

Counseling on Personal Decisions Irving L. Janis, 1981-12-11 This book is designed to assist counselors to be more effective in their relationship with clients who seek help in choosing and adhering to a difficult course of action. It presents a thoughtful theoretical analysis of the conditions that lead to successful short term counseling and then tests these hypotheses through a series of controlled field experiments carried out in a variety of counseling situations. In his initial chapters Irving Janis identifies three critical phases of activity for the counselor in a helping relationship: building an image as a reliable source of self esteem enhancement, endorsing certain norms such as dieting or recommending sound decision making procedures, minimizing the client's separation reactions to the termination of direct contact. The main body of the book consists of field experiments conducted by Janis and his colleagues which assess the effects of numerous variations in counseling procedures. Field studies of weight reducing, smoking ending and marital and career counseling are among those used for evaluation of counseling techniques. In the final chapters Janis draws together the empirical findings of the field experiments, revising some aspects of his theory in response to the complexities of the research results. Written in a style that is lively and easily understood, Counseling on Personal Decisions provides a unique combination of theory, research and applications. It is a valuable tool not only for counselors but for physicians, lawyers, social workers and other professional advisors.

Evolutionary Psychology, Public Policy and Personal Decisions Charles Crawford, Catherine Salmon, 2004-05-20 This volume's aim is to start the process of using theory and findings of evolutionary psychology to help make the world a better place to live. Taking evolutionary psychology explicitly into applied areas, it includes a reasonable scope of applications from pornography to psychopaths and from morality to sex differences in the workplace.

Decisions George A. Goens, 2022-10-28 Decisions can have routine or serious consequences. At times even small and seemingly inconsequential choices have major outcomes: events, unexpected reactions of others or unanticipated results happen. All decisions have consequences. Not deciding is also a decision. Leadership requires decision making that moves beyond personal issues to determining the operation and results of organizations and the lives of others.

Decision Making Ray Crozier, Rob Ranyard, Ola Svenson, 2002-09-11 This book offers an exciting new collection of recent research on the actual processes that humans use when making decisions in their everyday lives and in business situations. The contributors use cognitive psychological techniques to break down the constituent processes and set them in their social context. The contributors are from many different countries and draw upon a wide range of techniques, making this book a valuable resource to cognitive psychologists in applied settings, economists and managers.
