evolution would undoubtedly be very different Over one hundred years ago Rudolf Steiner spoke of two human types or species This book illustrates how many of Steiner's descriptions of human development coincide remarkably with emerging perspectives His evolutionary thinking about humanity's distinctive role can set scientific discoveries in a dramatic new light His concepts concerning rhythmic phases and transitions grounded in the formation and disintegration of continents give authentic scientific expression to the myth of Atlantis Welburn weaves Steiner's perspectives with contemporary research in this ground breaking work exploring the turning points of human consciousness In doing so he helps replace the search for man's animal connections with the need to re think the very meaning of being human

concepts about Atlantis including these the civilization and technology beyond its time the origins of all present races and civilizations and a civil war between good and evil Much of Donnelly's scholarship especially with regard to Atlantis as an explanation for similarities between ancient civilizations of the Old and New Worlds
