James, Wei Liu, Caixia Man, 2022-12-26 China has traditionally been held up around the world as the archetype of centralised governance and a top down system of public administration But to what extent does this remain true of modern China This book provides an updated perspective on modern China through a series of cutting edge original studies focusing on public administration in China The book opens with an overview of the key political institutions and the evolution of public administration research in China followed by two distinct sections Part I contains studies focusing on power governance and administration Part II focuses on what works in solving wicked problems in Chinese society The volume shows that China has seen some localisation and decentralisation alongside experiments with collaboration and networked based policy making However the system of governance and public administration remains innately top down and centralised with the centre holding strong policy levers and control over society As the pandemic revealed this statist approach provided both governing opportunities and disadvantages The chapters in this book were originally published as a special issue of Policy Studies *Designing Emergency Management* Wee-Kiat Lim, 2020-11-22 This book looks at the then nascent emergency management sector in China specifically the 2003 2012 period that arose from the 2003 SARS crisis and subsequently set the stage for its responses to the COVID 19 pandemic Covering not only the amended and new laws and regulations at the national level the book also includes the rearrangement and creation of the organizational structures as well as the response plans for individual emergencies that were either recrafted or created during this period Beyond chronicling the milestones and products of this transformation this book highlights the key ideas and ideals that guided the various stakeholders from the governing elites to the policy experts during this process The book demonstrates how definitions of emergency management and emergency categories as well as other ideational objects were initially either absent or weakly developed but were refined to the extent that they helped corral disparate actors into China's new organizational field of emergency management **Public Administration in the Information Age** I. third section the focus shifts towards structural conditions the conditions that public administration has to meet in order to maintain its effectiveness and its legitimacy in the information age Section four addresses some objects of implementation like IT inspired redesign HRM and the phenomenon of Street Level Bureaucrats Finally the last section offers some concluding thoughts Publisher s website *Administrative Theories and Management Thought* R.
