E. Hawkesworth, 1988-01-01 What is the relation between policy analysis and political decision making Is the policy analyst a handmaiden of democracy or an agent of technocracy Do recent debates in the policy literature illuminate or obfuscate these issues What analytic techniques are available to resolve such questions This study considers the nature of policy inquiry in detail and explores norms and theoretical assumptions seldom subjected to scrutiny The author demonstrates how conceptual presuppositions and methodological commitments have constricted our understanding of political problems and so hindered prescriptions for viable policy options Proposed here is an alternative framework for policy inquiry that is both pragmatic and sophisticated Hawkesworth considers the implications of this alternative model in a series of case studies that addresses important foreign and domestic policy issues The epistemic and practical criticisms presented in this study provide new direction for the field of policy studies Handbook of Public Policy Analysis Frank Fischer, Gerald J. Ethics and Economics Mark D. White, Irene van Staveren, 2013-09-13 Since the days of Adam Smith ethics and economics have been closely intertwined and were nominally separated only with the advent of neoclassical economics in the beginning of the last century This book features eleven essays by leading scholars in economics and philosophy who argue for a renewal of the bond between the two disciplines Several of the contributors argue that the ethical content of economics and moral status of the market have been misunderstood for better and for worse Some recommend

changes in the way that individual economic choice is modelled in order to incorporate ethical as well as self interested motivations Finally others question the way that societies assess economic policies that affect the welfare and dignity of their constituents A wide range of philosophical perspectives is offered drawing from the classic writings of Adam Smith Immanuel Kant and the ancient Stoics to that of current scholars such as Amartya Sen Elizabeth Anderson and Christine Korsgaard This book provides a comprehensive introduction to the cutting edge of interdisciplinary research between ethics and economics and is sure to be an important resource for scholars in both fields This book was published as a combination of the special issues Review of Political Economy and Review of Social Economy **The Social Construction of Public Administration**

Jong S. Jun, 2012-02-01 In this conceptual guided tour of contemporary public administration Jong S Jun challenges the limitations of the discipline which he argues make it inadequate for understanding today's complex human phenomena Drawing on examples and case studies from both Eastern and Western countries he emphasizes critical and interpretive perspectives as a counterforce to the instrumental technical rationality that reduces the field to structural and functionalist views of management He also emphasizes the idea of democratic social construction to transcend the field's reliance on conventional pluralist politics Jun stresses that public administrators and institutions must create opportunities for sharing and learning among organizational members and must facilitate interactive processes between public administrators and citizens so that the latter can voice their problems and opinions The future role of public administrators will be to transcend the limitations of the management and governing of modern public administration and to explore ways of constructing socially meaningful alternatives through communicative action and the participation of citizens *Decisions, Technology and Organization* Audley Genus, 2017-11-22 This title was first published in 2000 This text analyzes the problems of managing large scale technology projects It addresses the contrast between projects hoped for benefits and the optimism with which they are promoted and the high human economic or environmental costs of their operation The book is multi disciplinary in its approach and an integration of different levels of analysis It contains case studies that are analyzed in terms of the literatures on decision theory public administration and strategic and project management **What Works?** Nutley, Sandra M., Davies, Huw T.O., Peter C. Smith, 2000-07-19 An exploration of how the knowledge gained from research is used to improve the effectiveness of public policy formation and public service delivery It covers eight areas of public service health education criminal justice social policy transport urban policy housing and social care Managing Sustainable Development Michael Carley, Ian Christie, 2017-09-25 In a world where environmental problems spill across political administrative and disciplinary boundaries there is a pressing need for a clear understanding of the kinds of organizations management structures and policy making approaches required to bring about socially equitable and ecologically sustainable development In this second edition the authors incorporate lessons from a decade of work on the conditions of sustainability in both developed and developing countries They prescribe action networks partnerships of flexible achievement oriented

actors and present new case studies demonstrating the success of organizations that have applied this approach They also introduce case studies on action networks that work simultaneously on international national and local levels Data, Governance and Narrative Scott Edward Bennett, 2025-03-31 This book examines how participants in governance and public affairs use data and information in defining public problems and their solutions It is based on 18 in depth interviews with various kinds of participants in the public realm in Canada and the UK from legislators interest group representatives journalists and civil servants Responses are examined against the backdrop of two classical perspectives on decision making It explores the types of data respondents emphasized in their work and what model of decision making best reflected the realities of defining problems and selecting solutions in governance The book demonstrates how there is a significant interplay between the long and short term aspects of governance Narratives and data are inextricably intertwined in governance The book explores the role of narratives in linking portrayals of the public good to problem definition and solution creation It presents practical insights on how to approach generating and using data for the guidance of governing decisions the implications of various kinds of research designs and for the normative practice of governance **Effective Assessment and the Improvement of Education** Roger Murphy, Patricia Broadfoot, 2017-09-29 Originally published in 1995 this volume brings together twenty classic contributions from the work of Desmond Nuttall as an educational researcher thinker and policy adviser A full commentary by two of his former colleagues who knew him well accompanies the text They have set out to explain and explore the essence of his contribution to others Much in the book is as relevant today as when the articles were written put together they form a formidable collection The book was published in the year after Desmond s death It is hoped it will remain a fitting tribute to him It will remind his friends of his classic ideas and brings together in one volume contributions that students of education may have missed Divided We Stand Michiel Schwarz, Michael Thompson, 1990 This book provides a down to earth account of the virtues and failures of environmental risk assessment The assessment process involves politics technology and issues of social choice an unstructured grouping that often presents contradictory and confusing standpoints the virtues of science and the scientific method are extolled on the one hand and condemned on the other no viable solutions are offered and there is no real understanding of the issues being discussed This chaotic situation is analyzed using cultural theory to offer a powerful and groundbreaking account of such topics as technological decision making politics energy engineering and technology as a whole **Critical Discourse Analysis of Chinese Advertisement** Chong Wang, 2017-07-04 This book reflects the chronological changes in Chinese cultural values social relations economy and politics by critically analyzing the Chinese advertising discourse The work is based on research into the ideological values portrayed in Chinese household appliance advertisements in the 1980s 1990s The analytical framework covers a variety of methods critical discourse analysis chronological analysis visual and verbal analysis and qualitative and quantitative analysis The findings suggest that ideological values consciously or unconsciously

manifested by the visual and verbal devices in the Chinese advertisements moved in a pattern from simplicity to diversity from being politically oriented to being economically and profit oriented from conservatism to globalization and westernization in keeping with the progression of the Chinese economic reform The findings further indicate that the ideological values in the Chinese household appliance advertisements are embedded in the advertising language and illustrations Lastly the work reveals the reality of Chinese politics economy and society at a time when China experienced the growth of the market economy and evolution of Chinese mainstream ideologies and demonstrates the impacts of these changes on the ideological meanings in advertisements This book will help readers discover the more profound meanings behind the superficial content of Chinese advertisements
