The Routledge Research Companion to Electronic Music: Reaching out with Technology Simon Emmerson, 2018-05-16 The theme of this Research Companion is connectivity and the global reach of electroacoustic music and sonic arts made with technology The possible scope of such a companion in the field of electronic music has changed radically over the last 30 years The definitions of the field itself are now broader there is no clear boundary between electronic music and sound art Also what was previously an apparently simple divide between art and popular practices is now not easy or helpful to make and there is a rich cluster of streams of practice with many histories including world music traditions This leads in turn to a steady undermining of a primarily Euro American enterprise in the second half of the twentieth century Telecommunications technology most importantly the development of the internet in the final years of the century has made materials practices and experiences ubiquitous and apparently universally available though some contributions to this volume reassert the influence and importance of local cultural practice Research in this field is now increasingly multi disciplinary Technological developments are embedded in practices which may be musical social individual and collective The contributors to this companion embrace technological scientific aesthetic historical and social approaches and a host of hybrids but most importantly they try to show how these

The Routledge Research Companion to Modernism in Music Björn Heile, Charles Wilson, 2018-10-29 Modernism in music still arouses passions and is riven by controversies Taking root in the early decades of the twentieth century it achieved ideological dominance for almost three decades following the Second World War before becoming the object of widespread critique in the last two decades of the century both from critics and composers of a postmodern persuasion and from prominent scholars associated with the new musicology Yet these critiques have failed to dampen its ongoing resilience The picture of modernism has considerably broadened and diversified and has remained a pivotal focus of debate well into the twenty first century This Research Companion does not seek to limit what musical modernism might be At the same time it resists any dilution of the term that would see its indiscriminate application to practically any and all music of a certain period In addition to addressing issues already well established in modernist studies such as aesthetics history institutions place diaspora cosmopolitanism production and performance communication technologies and the interface with

postmodernism this volume also explores topics that are less established among them modernism and affect modernism and comedy modernism versus the contemporary and the crucial distinction between modernism in popular culture and a popular modernism a modernism of the people In doing so this text seeks to define modernism in music by probing its margins as much as by restating its supposed essence *Music in Print and Beyond* Craig A. Sound in the Ecstatic-Materialist Perspective on Experimental Music Riccardo D. Wanke, 2021-08-10 What does a one hour contemporary orchestral piece by Georg Friedrich Haas have in common with a series of glitch noise electronic tracks by Pan Sonic This book proposes that despite their differences they share a particular understanding of sound that is found across several quite distinct genres of

contemporary art music the ecstatic materialist perspective Sound in the ecstatic materialist perspective is considered as a material mass or element unfolding in time encountered by a listener for whom the experience of that sound exceeds the purely sonic without becoming entirely divorced from its materiality It is material by virtue of the focus on the texture consistency and density of sound it is ecstatic in the etymological sense that is to say that the experience of this sound involves an instability an inclination to depart from material appearance an ephemeral and transitory impulse in the very perception of sound to something beyond but still related to it By examining musical pieces from spectralism to electroacoustic domains from minimalism to glitch electronica and dubstep this book identifies the key intrinsic characteristics of this musical perspective To fully account for this perspective on sonic experience listener feedback and interviews with composers and performers are also incorporated Sound in the ecstatic materialist perspective is the common territory where composers sound artists performers and listeners converge **Producing Music** Russ

cultural value This book sheds light on how audiences negotiate the tensions between experimentalism and accessibility that currently define this genre It provides insights relevant to academics from audience research in the performing arts and from musicology as well as to institutions practitioners and artists **Composing Women** Elfriede Reissig, Leon

Stefanija, 2022-12-02 This volume presents fifteen musicological perspectives on the creativity of women composers and the question of femininity in Southeastern European musical cultures from 1918 on In the questions about and beyond a female aesthetics socio cultural approaches to the lives of creative women prove to be indispensable for contemporary musicological gender research because highly complex facts of musical life and social realities in political systems cannot be separated from each other By this means the exclusion and marginalization of women composers in the national and international music establishment as well as strategies for overcoming these systems are made visible and brought to consciousness This volume therefore focusses on the social cultural and biological preconditions of cultural action and intends to arouse curiosity for multi layered realities it aims to increase the reception of the compositional oeuvre of women composers from Southeastern Europe by the global music scene the musicological discourse and an engaged audience **Live Electronic Music**

Friedemann Sallis, Valentina Bertolani, Jan Burle, Laura Zattra, 2017-11-20 During the twentieth century electronic technology enabled the explosive development of new tools for the production performance dissemination and conservation of music The era of the mechanical reproduction of music has rather ironically opened up new perspectives which have contributed to the revitalisation of the performer's role and the concept of music as performance This book examines questions related to music that cannot be set in conventional notation reporting and reflecting on current research and creative practice primarily in live electronic music It studies compositions for which the musical text is problematic that is non-existent incomplete insufficiently precise or transmitted in a nontraditional format Thus at the core of this project is an absence The objects of study lack a reliably precise graphical representation of the work as the composer or the composer-performer conceived or imagined it How do we compose perform and study music that cannot be set in conventional notation The authors of this book examine this problem from the complementary perspectives of the composer the performer the musical assistant the audio engineer the computer scientist and the musicologist
