Re Understanding Japan Chinese Perspecti:

Re-understanding Japan Lu Yan, 2004-04-30 To many Chinese the rise and expansion of Japanese power during the years between the two Sino Japanese wars 1895 1945 presented a paradox With its successful modernization Japan became a model to be emulated yet as the country's imperial ambitions on the continent grew it posed an ever increasing threat Drawing on an extraordinary array of source materials Lu Yan shows that this attraction to and apprehension of Japan prompted the Chinese to engage in a variety of long term relationships with the Japanese Re understanding Japan examines transnational and transcultural interactions between China and Japan during those five dramatic and tragic decades at the intimate level of personal lives and behavior At the center of Lu's inquiry are four diverse yet significant case studies military strategist Jiang Baili literary critic and essayist Zhou Zuoren Guomindang leader Dai Jitao and romantic poet turned Communist Guo Moruo In their public and private lives these influential Chinese formed lasting ties with Japan and the Japanese While their writings reached the Chinese public through the print mass media and served to enhance popular understanding of Japan and its culture their activities in political cultural and diplomatic affairs paralleled significant turns in Sino Japanese relations Based on archival documents personal memoirs correspondence interviews and contemporary literary works Re understanding Japan delineates diverse approaches in Chinese efforts to engage Japan in China's modern reforms

Re-understanding Japan Yan Lu, 2004 **Articulating the Sinosphere** Joshua A. Fogel, 2009-03-31 Joshua Fogel offers an incisive historical look at Sino Japanese relations from three different perspectives Introducing the concept of Sinosphere to capture the nature of Sino foreign relations both spatially and temporally Fogel presents an original and thought provoking study on the long complex relationship between China and Japan

The Sinosphere and Beyond Joan Judge, Joachim Kurtz, Ori Sela, Dan Shao, Hugh Shapiro, 2024-07-22 The history of East Asia can be most productively studied through a transnational translingual and transcultural approach to the region In The Sinosphere and Beyond twenty six leading and emerging scholars use such approaches in rich clusters of essays on Historiography Sino Japanese Encounters Law and Justice Politics Art Literature and Translation Each essay builds on the legacy of Joshua Fogel whose scholarship defined the contours of the Sinosphere in the Western world and beyond The collection will be of interest to scholars and students with specific research concerns within these broader rubrics from the towering progenitors of Japanese Sinology to gendered diplomatic and cultural dimensions of Sino Japanese encounters from Sinitic poetry to legal culture and revolutionary life from art commerce and levels of literary expression to the quandaries of translation In addition to offering a broad range of case studies the volume is testimony to the methodological importance of a dynamic intra and transregional approach for an understanding of the layered history of East Asia

Beyond Brushtalk Christopher T. Keaveney, 2008-11-01 Beyond Brushtalk explores interactions between Japanese and Chinese writers during the golden age of such exchange 1919 to 1937 During this period there were unprecedented opportunities for exchange between writers which was made possible

by the ease of travel between Japan and China during these years and the educational background of Chinese writers as students in Japan. Although the salubrious interaction that developed during that period was destined not to last, it nevertheless was significant as a courageous essay at cultural interaction. This book will appeal not only to those interested in Sino-Japanese studies, an increasingly important field of study in its own right, but will also appeal to scholars of both Japanese literature and Chinese literature and researchers whose areas of interest correspond to the major writers included in this work, such as Lu Xun and Zhou Zuoren on the Chinese side and Tanizaki Jun'ichir and Hayashi Fumiko on the Japanese side. The relations and resulting literary works involving these major writers are often relatively neglected aspects of their total output and will draw interest from scholars of their work. This book will be accessible to both Sinologists and Japanologists with little background in the corresponding field and to the generalist possessing an interest in literary exchange.

China and Japan in the Late Meiji Period Urs Matthias Zachmann, 2010-10-30. Demonstrates the close relation between Japan's changing international status and the thought process behind this by focusing on the public discussion on China and China politics during the interwar years 1895-1904. Winner of the JaDe Prize 2010 awarded by the German Foundation for the Promotion of Japanese-German Culture and Science Relations. *New Perspectives on the History of Life Sciences and Agriculture* Denise Phillips, Sharon Kingsland, 2015-02-12. This volume explores problems in the history of science at the intersection of life sciences and agriculture from the mid-eighteenth to the mid-twentieth century. Taking a comparative national perspective, the book examines agricultural practices in a broad sense, including the practices and disciplines devoted to land management, forestry, soil science, and the improvement and management of crops and livestock. The life sciences considered include genetics, microbiology, ecology, entomology, forestry, and deal with US, European, Russian, Japanese, Indonesian, Chinese contexts. The book shows that the investigation of the border zone of life sciences and agriculture raises many interesting questions about how science develops. In particular, it challenges one to re-examine and take seriously the intimate connection between scientific development and the practical goals of managing and improving, perhaps even recreating the living world to serve human ends. Without close attention to this zone, it is not possible to understand the emergence of new disciplines and transformation of old disciplines, to evaluate the role and impact of such major figures of science as Humboldt and Mendel, or to appreciate how much of the history of modern biology has been driven by national ambitions and imperialist expansion in competition with rival nations. *China-Japan Relations after World War Two* Amy King, 2016-06-06. A rich empirical account of China's foreign economic policy towards Japan after World War Two, drawing on hundreds of recently declassified Chinese sources. Amy King offers an innovative conceptual framework for the role of ideas in shaping foreign policy and examines how China's Communist leaders conceived of Japan after the war. The book shows how Japan became China's most important economic partner in 1971 despite the recent history of war and the ongoing Cold War divide between the two countries. It explains that China's Communist leaders saw Japan as a symbol of

a modern industrialised nation and Japanese goods technology and expertise as crucial in strengthening China's economy and military For China and Japan the years between 1949 and 1971 were not simply a moment disrupted by the Cold War but rather an important moment of non-Western modernisation stemming from the legacy of Japanese empire industry and war in China **Perpetrators, Accomplices and Victims in Twentieth-Century Politics** Anatoly M. Khazanov, Stanley

Payne, 2013-09-13 These studies examine the ways in which succeeding democratic regimes have dealt with or have ignored and in several cases sugar coated an authoritarian or totalitarian past from 1943 to the present They treat the relationship with democratization and the different ways in which collective memory is formed and dealt with or ignored and suppressed Previous books have examined only restricted sets of countries such as western or eastern Europe or Latin America The present volume treats a broader range of cases than any preceding account and also a much broader time span investigating diverse historical and cultural contexts and the role of national identity and nationalism studying the aftermath of both fascist and communist regimes in both Europe and Asia in an interdisciplinary framework while the conclusion provides a more complete comparative perspective than will be found in any other work The book will be of interest to historians and political scientists and to those interested in fascism communism legacies of war democratization collective memory and transitional justice This book was previously published as a special issue of *Totalitarian Movements and Political Religions* **Rise of a**

Gao, 2009-06-16 The Historical Dictionary of Modern China 1800 1949 offers a concise but comprehensive examination of the political military economic social and cultural development of modern China Instead of focusing merely on the political elites of China this reference covers a variety of significant persons including women and ethnic minorities new historical concepts cultural and educational institutions and economic activities Drawing on newly available records including a large mass of governmental and family archives the narratives presented reveal new facts offer a new interpretation in accordance with China's modernization process during the late Qing period and a revisionist perspective on the Republican history The chronology records not only political and military events but also other experiences of the Chinese people The bibliography gives prominence to current literature on China's drive towards modernization and appendixes provide the reader with detailed information on China's cultural and economic transformation **Classical World Literatures** Wiebke Denecke, 2013-11-25 Ever since Karl Jaspers's axial age paradigm there have been a number of influential studies comparing ancient East Asian and Greco Roman history and culture However to date there has been no comparative study involving multiple literary traditions in these cultural spheres This book compares the dynamics between the younger literary cultures of Japan and Rome and the literatures of their venerable predecessors China and Greece How were writers of the younger cultures of Rome and Japan affected by the

presence of an older reference culture whose sophistication they admired even as they anxiously strove to assert their own distinctive identity How did they tackle the challenge of adopting the reference culture's literary genres rhetorical refinement and conceptual vocabulary for writing texts in different languages and within distinct political and cultural contexts Classical World Literatures captures the striking similarities between the ways early Japanese authors wrote their own literature through and against the literary precedents of China and the ways Latin writers engaged and contested Greek precedents But it also brings to light suggestive divergences that are rooted in geopolitical linguistic sociohistorical and aesthetic differences between early Japanese and Roman literary cultures Proposing a methodology of deep comparison for the cross cultural comparison of premodern literary cultures and calling for an expansion of world literature debates into the ancient and medieval worlds Classical World Literatures is both a theoretical intervention and an invitation to read and re read four major literary traditions in an innovative and illuminating light
