Re Forming The State The Politics Of Privatization In Latin America And Europe:

Re-forming the State Hector E. Schamis, 2002 Compares the processes leading to market reform experiments and its political effects in Latin America and Europe *The State and the Private Sector in Latin America* M. Font, 2015-06-16 This book follows ten political economic histories since the 1970s showing how different forms of partnership have developed flourished or declined over the time The author s argument is supported by rich empirical material It places partnership schemes in a broader social context and provides a deep insight into the phenomenon *Reorganising Power in Indonesia* Richard Robison, Vedi R. Hadiz, 2004 Reorganising Power in Indonesia is a new and distinctive analysis of the dramatic fall of Soeharto the last of the great Cold War capitalist dictators and of the struggles that reshape power and wealth in Indonesia The dramatic events of the past two decades are understood essentially in terms of the rise of a complex politico business oligarchy and the ongoing reorganisation of its power through successive crises colonising and expropriating new political and market institutions With the collapse of authoritarian rule the authors propose that the way was left open for this oligarchy to reconstitute its power within society and the institutions of newly democratic Indonesia **Sociology of Constitutions** Alberto Febbrajo, Giancarlo Corsi, 2016-05-05 This collection brings together some of the most influential sociologists of law to confront the challenges of current transnational constitutionalism It shows the constitution appearing in a new light no longer as an essential factor of unity and stabilisation but as a potential defence of pluralism and innovation The first part of the book is devoted to the analysis of the concept of constitution highlighting the elements that can contribute from a socio legal perspective to clarifying the principle meanings attributed to the constitution The study goes on to analyse some concrete aspects of the functioning of constitutions in contemporary society In applying Luhmann s General Systems Theory to a comparative analysis of the concept of constitution the work contributes to a better understanding of this traditional concept in both its institutionalised and functional aspects Defining the constitution s contents and functions both at the conceptual level and by taking empirical issues of particular comparative interest into account this study will be of importance to scholars and students of sociology of law sociology of politics and comparative public law From Pinochet to the 'Third Way' Marcus Taylor, 2006-06-20 This is a comprehensive analysis of three decades of neoliberal policies in Chile from the Pinochet dictatorship until today Chile is often described as a model of neoliberal development policy Marcus Taylor questions this description Examining the contradictions of neoliberalism he demonstrates how it has created a society that is deeply ridden with inequalities Taylor shows how the tensions that arose from this social inequality led to the emergence of a Third Way neoliberalism in the post dictatorship period Taylor argues that this new development paradigm has failed This is a result of the inability of Third Way neoliberalism to transform social relationships and institutions The nature of this failure affects the direction of popular movements for social change in Latin America during a time of renewed social and political upheaval Impasse in Bolivia Benjamin Kohl, Linda C. Farthing, 2013-07-04 Bolivia has experienced two decades of

unprecedented popular resistance to the consequences of neoliberal policies resulting in the resignation and flight of its president in October 2003 This unusual book uncovers the reasons and processes behind the rising opposition mirrored in country after country in Latin America to this currently fashionable internationally prescribed approach to economic development It explores the problems faced by governments in reproducing global strategies at the national level the tensions between markets and democracy state restructuring citizenship and property rights It points to the problems inherent in retaining neoliberalism as the dominant paradigm in Latin America for the foreseeable future and the unlikely prospect of it putting down real roots of approval and legitimacy

Growing Apart Peter Lewis, 2009-12-11 Growing Apart is an important and distinguished contribution to the literature on the political economy of development Indonesia and Nigeria have long presented one of the most natural opportunities for comparative study Peter Lewis one of America's best scholars of Nigeria has produced the definitive treatment of their divergent development paths In the process he tells us much theoretically about when why and how political institutions shape economic growth Larry Diamond Senior Fellow Hoover Institution Growing Apart is a careful and sophisticated analysis of the political factors that have shaped the economic fortunes of Indonesia and Nigeria Both scholars and policymakers will benefit from this book's valuable insights Michael L Ross Associate Professor of Political Science Chair of International Development Studies UCLA Lewis presents an extraordinarily well documented comparative case study of two countries with a great deal in common and yet with remarkably different postcolonial histories His approach is a welcome departure from currently fashionable attempts to explain development using large multi country databases packed with often dubious measures of various aspects of governance Ross H McLeod Editor Bulletin of Indonesian Economic Studies This is a highly readable and important book Peter Lewis provides us with both a compelling institutionalist analysis of economic development performance and a very insightful comparative account of the political economies of two highly complex developing countries Nigeria and Indonesia His well informed account generates interesting findings by focusing on the ability of leaders in both countries to make credible commitments to the private sector and assemble pro growth coalitions This kind of cross regional political economy

is often advocated in the profession but actually quite rare because it is so hard to do well Lewis's book will set the standard for a long time Nicolas van de Walle John S Knight Professor of International Studies Cornell University Peter M Lewis is Associate Professor and Director of the African Studies Program Johns Hopkins University School of Advanced International Studies

Reasserting the Public in Public Services M. Ramesh, Eduardo Araral, Xun Wu, 2010-02-25 After two decades of dominating the public sector reform agenda privatization is on the wane as states gradually reassert themselves in many formerly privatized sectors The change of direction is a response to the realization that privatization is not working as intended especially in public service sectors This landmark volume brings together leading social scientists including B Guy Peters Anthony Cheung and Jon Pierre to systematically discuss the emerging patterns of the reassertion of the state in the delivery of essential public services The state under these emerging arrangements assumes overall responsibility for and control over essential public service delivery yet allows scope for market incentives and competition when they are known to work The recent reforms thus display a more pragmatic and nuanced understanding of how markets work in public services The first part of the book provides the theoretical context while the second provides sectoral studies of recent reforms in healthcare education transportation electricity and water supply It includes case studies from a range of countries Brazil China South Korea Singapore Thailand Vietnam USA Hong Kong and the UK This book will be of interest to students and scholars in Political Science Public Administration Public Policy Geography Political Economy Sociology and Urban Planning

Electrifying India Sunila S. Kale, 2014-04-09 Throughout the 20th century electricity was considered to be the primary vehicle of modernity as well as its quintessential symbol In India electrification was central to how early nationalists and planners conceptualized Indian development and huge sums were spent on the project from then until now Yet despite all this sixty five years after independence nearly 400 million Indians have no access to electricity Electrifying India explores the political and historical puzzle of uneven development in India's vital electricity sector In some states nearly all citizens have access to electricity while in others fewer than half of households have reliable electricity To help explain this variation this book offers both a regional and a historical perspective on the politics of electrification of

India as it unfolded in New Delhi and three Indian states Maharashtra Odisha and Andhra Pradesh In those parts of the countryside that were successfully electrified in the decades after independence the gains were due to neither nationalist idealism nor merely technocratic plans but rather to the rising political influence and pressure of rural constituencies In looking at variation in how public utilities expanded over a long period of time this book argues that the earlier period of an advancing state apparatus from the 1950s to the 1980s conditioned in important ways the manner of the state's retreat during market reforms from the 1990s onward

Stemming the Tide Madeline Baer, 2017-08-01 When privatization of public services swept the developing world in the 1990s it was part of a seemingly unstoppable tide of neoliberal reforms aimed at reducing the role of the state and reorienting economies toward market led policymaking Water privatization one of the more unpopular policies of the neoliberal development paradigm sparked a particularly fierce debate and gave rise to a movement of self proclaimed water warriors who advocated for legal recognition of water as a basic human right to be protected and fulfilled by states Broadening the debate Madeline Baer questions whether either approach the market approach or a human rights based approach leads to improved access to water More specifically Baer explores how the human right to water and sanitation is fulfilled in different contexts whether neoliberal policies like privatization pose a threat to the right to water and whether rights fulfillment leads to meaningful social change Using two case studies Chile the most extreme case of water privatization in the developing world and Bolivia the birthplace of the global movement for the human right to water *Stemming the Tide* uncovers the conditions under which the right to water and sanitation can be fulfilled as well as the obstacles to fulfillment Ultimately this book argues that deepening mechanisms for citizen participation strengthening accountability and creating alternatives to the state market binary can help achieve meaningful social transformation in the water sector

Gills, 2013-09-13 Are we moving inexorably towards a new empire or is global civil society transforming global politics into a new cosmopolis In *The Global Politics of Globalization* the alternatives of Empire and Cosmopolis are counter poised as representative of two antithetical conceptions and practices of world order both historically and in the present era and each expresses an alternative idea of human unity and community Today global politics is embroiled in a clash of globalizations a clash between these two opposed forms of world order The contributions in the debate range from deep historical reflections on world civilizations critique of neoliberal economics and imperialism new thinking on the ideals and practices of global citizenship the philosophical basis for cosmopolitan politics and the emergence of new forms of global social forces and movements Previously published as a special issue of *Globalizations* this book brings together a very distinguished set of contributors to explore and debate the relationship between globalization processes and world order in light of recent controversies over the return of empire

Why Not Default? Jerome Roos, 2021-03-02 How

creditors came to wield unprecedented power over heavily indebted countries and the dangers this poses to democracy The European debt crisis has rekindled long standing debates about the power of finance and the fraught relationship between capitalism and democracy in a globalized world Why Not Default unravels a striking puzzle at the heart of these debates why despite frequent crises and the immense costs of repayment do so many heavily indebted countries continue to service their international debts In this compelling and incisive book Jerome Roos provides a sweeping investigation of the political economy of sovereign debt and international crisis management He takes readers from the rise of public borrowing in the Italian city states to the gunboat diplomacy of the imperialist era and the wave of sovereign defaults during the Great Depression He vividly describes the debt crises of developing countries in the 1980s and 1990s and sheds new light on the recent turmoil inside the Eurozone including the dramatic capitulation of Greece s short lived anti austerity government to its European creditors in 2015 Drawing on in depth case studies of contemporary debt crises in Mexico Argentina and Greece Why Not Default paints a disconcerting picture of the ascendancy of global finance This important book shows how the profound transformation of the capitalist world economy over the past four decades has endowed private and official creditors with unprecedented structural power over heavily indebted borrowers enabling them to impose painful austerity measures and enforce uninterrupted debt service during times of crisis with devastating social consequences and far reaching implications for democracy
