A Shameful Business James A. Gross,2011-02-23 In a book that confronts the moral choices that U S corporations make every day in the treatment of their workers James A Gross issues a clarion call for the transformation of the American workplace based on genuine respect for human rights rather than whatever the economic and regulatory landscape might allow Gross questions the nation's underlying fabric of values as reflected in its laws and our assumptions

about workers and the workplace Arguing that our market philosophy is incompatible with core principles of human rights he forces readers to realign the country s labor policies so that they conform with the highest international human rights standards To make his case Gross assesses various aspects of U S labor relations freedom of association racial discrimination management rights workplace safety and human resources through the lens of internationally accepted human rights principles as standards of judgment His findings are chilling Employers who maintain workplaces that require men and women and sometimes even children to risk their lives and endanger their health and eyes and limbs in order to earn a living are treating human life as cheap and are seeking their own gain through the desecration of human life Gross argues and such behavior should be considered as crimes against humanity rather than matters of efficiency productivity or morale By revealing how truly unacceptable management s best practices can be when considered as human rights issues A Shameful Business encourages a bold new vision for workers whether organized or not that would signify a radical rethinking of social values and the concept of workplace rights and justice in the courtroom the boardroom and on the shop floor

Conversations About Job Performance Michael E. Gordon,Vernon D. Miller,2012-01-11 Conversations About Job Performance details the Communication Centered Approach CCA to performance appraisal that is focused on its most challenging part the appraisal interview For many years researchers and practitioners have devoted substantial time

and effort to develop satisfactory performance appraisal systems that impart useful information to employees about their job performance. Nonetheless, problems continue to arise principally because managers often find it difficult to provide feedback on performance to their employees. If this sounds familiar to you, you'll need this book which details the Communication Centered Approach (CCA) to performance appraisal that is focused on its most challenging part: the appraisal interview. The CCA described by authors Gordon and Miller is important because, despite the continuing evolution of performance appraisal, a conversation about the employee's performance is still a very important component of the latest systems. Also focusing on communication offers a valuable perspective on all aspects of performance appraisal: the definition of performance and its various facets; how performance information is given and perceived; and the interactional context that affects the meaning of feedback. Thoughtful insight and communication literature that is the basis for each of these ideas is included, as well as illustrations on how the conceptual foundation may be translated into practice.

The Changing Landscape of School Leadership M. Scott Norton, 2015-12-31 The primary focus of the book is to emphasize the major changes in the leadership responsibilities of the school principal and to underscore the necessity for them to gain new knowledge and skills in order to direct their leadership toward meeting the new changes in school community goals and objectives. M. Scott Norton emphasizes the fact that contemporary issues and problems must be viewed as symptoms of change. The symptoms represent administrative tasks that must be attacked by implementing the primary reason that the school principal is hired: that of leading on-going change. The leader's responsibility focuses on school purposes as set forth in a viable school mission statement. The school's mission statement that all too often is set forth as a public relations perspective must instead set forth answers to questions such as: What is our purpose? Why does our school exist? What is our reason for being here? How do we meet the on-going changes that face us educationally? The leadership of the school principal attacks the symptoms of change by collaborating with the school's faculty to set forth a mission to which all members can commit. Collaboration infers a unification of members' commitments toward the primary purposes of the school. Collaboration and opportunities to confer on an on-going basis are established. Although the school principal's hands are often tied by such factors as lack of resources, underfunded/unfunded mandates, inability to hire and retain highly qualified personnel, and constantly changing program requirements related to student testing and teacher performance evaluation, this book places emphasis on the principal's need to become a visionary change agent in order to attack the ever-changing symptoms of educational change.

Reinventing Talent Management Edward E Lawler, 2017-05-15 In this book, preeminent organizational scholar Edward Lawler identifies a comprehensive and integrated set of talent management practices that fit today's rapidly evolving workplace. The world of work has changed dramatically, says Lawler. Organizations now operate in a global environment. New technologies continue to disrupt how, when and where work is done and should be managed. The workforce is becoming more diverse. Sustainability has joined profitability as a key business goal. All of this has dramatically accelerated the pace of change, making recruiting the best talent not simply filling positions an overriding concern. But too many organizations still use a job-based, bureaucratic talent management approach that doesn't take into account how the world has changed. Indeed, a recent study showed that from 1995 to 2016 there was no significant change in the way HR spends its time. Lawler says that talent management has to be reinvented. It needs to be closely linked to the organization's overall strategy. Recruitment and talent management should be driven by the skills and competencies the organization needs for long-term growth. This means talent management requires agile systems that can respond quickly to changing conditions and that take a more individualized approach to evaluating and rewarding performance. And everything talent management does has to be based on evidence, not tradition. Lawler looks at attracting, selecting, developing, rewarding, managing and organizing talent through this new lens. In today's world, organizations have to constantly reinvent themselves and talent management must do the same.

Employee Relations International, 1998 *Strategic Learning and Leading Change* Stephen John, 2009 Structured in 3 parts, this title discusses the globalization of businesses and its impact on their strategy, structure, operating processes and culture.
