Multiliteracies for a Digital Age Stuart A. Selber, 2004-01-23 *Multiliteracies for a Digital Age* serves as a guide for composition teachers to develop effective full scale computer literacy programs that are also professionally responsible by emphasizing different kinds of literacies Stuart A Selber also proposes methods for helping students move among these literacies in strategic ways Defining computer literacy as a domain of writing and communication Selber addresses the questions that few other computer literacy texts consider What should a computer literate student be able to do What is required of literacy teachers to educate such a student How can functional computer literacy fit within the values of teaching writing and communication as a profession Reimagining functional literacy in ways that speak to teachers of writing and communication he builds a framework for computer literacy instruction that blends functional critical and rhetorical concerns in the interest of social action and change *Multiliteracies for a Digital Age* reviews the extensive literature on computer literacy and critiques it from a humanistic perspective This approach which will remain useful as new versions of computer hardware and software inevitab

Insurrections Andrea Greenbaum, 2001-02-22 A provocative collaboration by some of the foremost scholars in composition studies this book explores both the theoretical and pedagogical approaches to resistance The contributors clarify not only the meanings of resistance through both a political and historical framework but also demonstrate how the manifestation of resistance plays out in the writing classroom

Professional Writing in Context John Frederick Reynolds, Carolyn B. Matalene, Joyce Neff Magnotto, Donald C. Samson, Jr., Lynn Veach Sadler, 2013-11-05 This volume explores adult work world writing issues from the perspectives of five seasoned professionals who have logged hundreds of hours working with adults on complicated written communication problems It examines the gap between school world instructional practices and real world problems and situations After describing the five major economic sectors which are writing intensive the text suggests curricular reforms which might better prepare college educated writers for these worlds Because the volume is based on the extensive work world experiences of the authors it offers numerous examples of real world writing problems and strategies which illustrate concretely what goes wrong and what needs to be done about it

Handbook of Literacy and Technology David Reinking, Michael C. McKenna, Linda D. Labbo, Ronald D. Kieffer, 1998-04-01 The major shift going on today in the technologies of reading and writing raises important questions about conventional conceptions of literacy and its role in education society and culture What are the important characteristics of electronic forms of reading and writing distinguishing them from printed forms To what extent and in what ways is literacy being transformed by new technologies This central question is addressed in this volume from diverse multidisciplinary perspectives The contributing authors focus on a guiding question in one of the following areas which correspond to the major sections of the book Transforming Texts What are the new differences between printed and electronic texts and what are the implications of new textual forms for defining literacy especially in regard to teaching and

learning in schools Transforming Readers and Writers How do electronic reading and writing change conceptualizations of literacy development from childhood through adulthood Transforming Classrooms and Schools What are the effects of introducing new reading and writing technologies into schools and classrooms Transforming Instruction How can instruction be adapted in response to the changing literacy landscape and how can teachers and students exploit forms of reading and writing to enhance teaching and learning Transforming Society What are the broad societal implications of the increasing prevalence of electronic forms of reading and writing Transforming Literacy Research What are the questions that must be addressed as digital reading and writing become more common and what approaches to research will be most useful in addressing those questions This volume is the result of an interactive process The contributors met as a group to discuss drafts of their chapters at a one day meeting convened and sponsored by the National Reading Research Center and had read each others chapters prior to this gathering That meeting was followed by a two day conference attended by approximately 180 researchers educators and policymakers who responded to an open invitation to present papers and to attend sessions focusing on the six major themes of the book Contributors then revised their chapters based on interactions with fellow contributors conference participants and volume editors Thus this work is more than just a compilation of the individual authors views Rather it represents a synthesis of a broad range of current thinking about how literacy is being and may be transformed by technology

Crossing the Digital Divide Barbara Jean Monroe, 2004-04-17 As poor nonwhite communities on the other side of the digital divide become immersed in electronic media how can we evaluate their experiences to transform the teaching of writing and literature and improve student learning This important book offers a balanced view of instructional technology and critical multiculturalism with valuable insights to help English educators at all levels working in all types of schools

Reimagining Popular Notions of American Intellectualism Kelly Bradbury, 2016-03-02 In Reimagining Popular Notions of American Intellectualism Kelly

Susan Bradbury challenges the image of the lazy media obsessed American by examining and reimagining widespread conceptions of American intellectualism that assume intellectual activity is situated solely in elite institutions of higher education

The SAGE Handbook of E-learning Research Richard Andrews, Caroline Haythornthwaite, 2007-07-10 I would like to enthusiastically recommend The SAGE Handbook of E Learning Research An international set of authors have produced a highly readable handbook that covers topics in E learning research theory policy language and literacy and design issues The work draws on multiple perspectives ranging from early work in asynchronous learning networks to community organization in e learning This is a large and much needed work that organizes and illuminates issues in E learning in a way that readers will be able to take away practical advice for their own use I am quite pleased to see this handbook that provides a very useful organization of knowledge for our field John Bourne Ph D Professor and Executive Director The Sloan Consortium www.sloan.c.org This book is an important contribution to the development of E learning because its account of the research always begins with the context of learning from which the exploitation of technology can be viewed The authors help us understand that technology affords new kinds of relationship between the learner and what is learned and how it is learned With this rich understanding the book is able to build the wide ranging research foundation on which the field can move forward Diana Laurillard Institute of Education University of London A comprehensive and compelling resource that provides a global perspective on a development that is transforming higher education David Pilsbury Chief Executive Worldwide Universities Network Unlike many how to books on the topic this work focuses on research for educators and others interested in how technology enhances or diminishes learning Highly Recommended Choice Magazine This handbook provides a state of the art in depth account of research in the rapidly expanding field of E learning The first of its kind it provides reviews of over 20 areas in E learning research by experts in the field and provides a critical account of the best work to date The contributors cover the basics of the discipline as well as new theoretical perspectives Areas of research covered by the Handbook include Contexts for researching e learning Theory and policy Language and literacy Design issues History of the field The editors introduction and many of the chapters show how multiple aspects of E learning interact The introduction also provides a new model for researching the field This book is relevant for everyone in higher education from undergraduate to faculty as well as university administrators involved in providing E learning It will provide a research background for higher education including universities training colleges and community colleges It will also be relevant to those involved in any research and developmental aspect of E learning corporate trainers and those involved in online programs at secondary school or in virtual high schools Whether you are a lecturer researcher or programme designer this is an essential read Richard Andrews is Professor in English at the Institute of Education University of London and Visiting Professor at New York University s Steinhardt School of Education Culture and Human Development Caroline Haythornthwaite is Associate Professor at the Graduate School of Library and Information

Science at the University of Illinois at Urbana Champaign *Cscl* Timothy Koschmann, 2012-10-12 This book about a newly emerging area of research in instructional technology has as its title the acronym CSCL Initially CSCL was chosen as an acronym for Computer Supported Collaborative Learning However some would argue that collaborative is often not a descriptive term for what learners do in instructional settings further as the field develops the technology used to support collaboration may not always involve computers at least not in the direct ways they have been used to support instruction in the past To avoid getting bogged down in this terminological debate this book uses CSCL as a designation in its own right leaving open to interpretation precisely what words it stands for The authors talk a great deal about the theory underlying their work In part this is because that is what they were asked to do but it is also an indication of the state of the field In an established paradigm in which the theories and methods are well agreed upon such discussion is less central CSCL however has not yet reached the stage of normal science There is much to be worked out yet This book is offered with the hope that it will help to define a direction for future work in this field The chapters appear in alphabetical order except for the introductory chapter and the afterword not for lack of a better way to organize the chapters but rather because the organizational possibilities are too numerous and this order does not privilege one over another By not imposing a topical organizing structure on this collection it is hoped that readers will feel freer to explore the chapters in a way that best suits their needs
