perspectives and practices that defy assumptions and biases to create cutting edge diverse instantiations of Early Childhood Education for children families and teachers This volume based on a special issue of the Early Years journal written in 2016 before the new administration announced its policies aims to generate conversations about developments in Early Childhood Education situated within classist racist linguistic and neoliberal contexts and to analyze critically where we are where we might go and what we might do It is also an opportunity to share counter narratives to the dominant narratives promulgated by many convinced that narrow destructive norms of appropriate practice standards and accountability as well as the curtailed achievement of children of Color those from low income communities and emergent bilinguals are common sense These counter narratives some about transformational projects that have generated innovative perspectives and practices and some detailing critical analyses and projects that go beyond to explore issues of power contest education that disprivileges some children and families while advocating education that is child and family centered culturally relevant and sustaining equitable and democratic Our hope is that this work creates a space of dialogue and human action needed even more urgently today This book was originally published as a special issue of the Early Years journal

Contemporary Perspectives on Early Childhood Curriculum Olivia Saracho, Bernard Spodek, 2002-06-01 Over the years educational scholars have proposed different conceptions of the curriculum It is as if each scholar researcher university educator and practitioner has developed her or his own personal definition Unfortunately there is no one single definition that everybody has agreed upon Table 1 presents a sample of these definitions A universal definition for curriculum may continue to be elusive and may even change through the years to address changes in the social forces and changes in related school goals Nonetheless the approach in curriculum development is consistent Curriculum developers establish goals develop experiences designate content and evaluate experiences and outcomes Most curriculum developers consistently use such terms as curriculum planning curriculum development curriculum implementation and curriculum evaluation and many others to describe curriculum related activities Unfortunately without a consistent definition of curriculum it is difficult for the curriculum developers to identify what it is that needs to be planned developed implemented or evaluated If curriculum developers rely on the curriculum experts definitions they will find that their definitions identify a product a program determine goals and objectives and learner experiences However its heterogeneity may be inspiring if curriculum developers rely on the components of each definition that depict the richness of the field which in turn can provide a foundation for contemporary content concepts and creativity A curriculum is an anthology of learning experiences conceived and arranged based on a program s educational goals and the community s social forces Each curriculum manifests an image of what children ought to be and become Biber 1984 p 303 grounded on the awareness of social values and a system that interprets those values into experiences for learners The concept of curriculum as a distinctive domain of study within education arose from the demand to arrange organize and translate such awareness into educational programs of study It integrates the

historical study of the goals and content of schooling analyses of curriculum documents and analyses of the children's experiences in school The first formal curriculum text was published in 1918 Bobbit 1918 although in the United States contemporary curriculum study goes back to the early 1890s when lead committees challenged the form and structure of public schooling Presently curriculum development is fundamental at all educational levels

Theoretical Models and Processes of Literacy Donna E. Alvermann, Norman J. Unrau, Misty Sailors, Robert B. Ruddell, 2018-10-03 The Seventh Edition of this foundational text represents the most comprehensive source available for connecting multiple and diverse theories to literacy research broadly defined and features both cutting edge and classic contributions from top scholars Two decades into the 21st century the Seventh Edition finds itself at a crossroads and differs from its predecessors in three major ways the more encompassing term literacy replaces reading in the title to reflect sweeping changes in how readers and writers communicate in a digital era the focus is on conceptual essays rather than a mix of essays and research reports in earlier volumes and most notably contemporary literacy models and processes enhance and extend earlier theories of reading and writing Providing a tapestry of models and theories that have informed literacy research and instruction over the years this volume's strong historical grounding serves as a springboard from which new perspectives are presented The chapters in this volume have been selected to inspire the interrogation of literacy theory and to foster its further evolution This edition is a landmark volume in which dynamic dialogic and generative relations of power speak directly to the present

generation of literacy theorists and researchers without losing the historical contexts that preceded them Some additional archival essays from previous editions are available on the book's eResource New to the Seventh Edition Features chapters on emerging and contemporary theories that connect directly to issues of power and contrasts new models against more established counterparts New chapters reflect sweeping changes in how readers and writers communicate in a digital era Slimmer volume is complemented by some chapters from previous editions available online

Early Childhood

Curriculum Nancy Amanda Branscombe, Jan Gunnels Burcham, Kathryn Castle, Elaine Surbeck, 2013-07-24 Through its unique integration of curriculum and learning principles Early Childhood Curriculum A Constructivist Perspective 2nd Edition fosters authentic developmentally appropriate practice for both preschool and early elementary classrooms The constructivist format of this book encourages active involvement on the part of readers by asking them to observe question reflect research and analyze thus allowing readers to create their own knowledge through their responses and actions Early Childhood Curriculum examines curricular goals such as autonomy development and problem solving and links those goals with constructivist principles of learning It explores ways teachers can create meaningful learning environments and choose curriculum tasks appropriately in all content areas that are linked to the learning and development needs of young children The text provides a wealth of practical detail about implementing constructivist curriculum as the authors discuss classroom climate and management room design play and cooperative learning among other topics The book also includes information about how teachers can meet required mandates and national and state standards in appropriate ways as they plan their curriculum and examines the early childhood educator's role with community agencies reform and legal mandates and public relations Special Features Curriculum Strategies highlight models for developing curriculum including projects curricular alignment integration of various subject matter areas and types of knowledge Constructions promote problem solving by allowing students to explore revisit examine and learn from first hand experience Multiple Perspectives from the Field provide interviews with teachers and other early childhood professionals offering students a realistic look at the profession from a diverse group of educators Teacher Dialogues explore a wide range of student concerns including curriculum learning environments assessment and documentation representing a collaborative support group for pre service teachers and readers

Teaching Young Children Social Studies Gayle Mindes, 2006-09-30 By linking theory to practice with an emphasis on national and state standards Head Start Performance Standards No Child Left Behind and IDEA the authors coherently combine principles of child development and social studies content to create a solid program for preschool through grade three The authors maintain the overriding idea throughout the Teaching Young Children series that strategies derived from knowledge of child development are used to teach content knowledge It is this concern that makes this volume an excellent resource for teachers and parents In addition to specific discussions of how to build and conduct a social studies curriculum the work includes vignettes of teachers and children in the classroom graphics illustrating concepts and methods and

matrices charts and tables to enhance understanding The authors effectively intertwine social learning in young children and development of self concept with the theme based curriculum of the National Council for Social Studies the principles of multicultural education parent collaboration to support learning and creating connections between classroom and community

Early Childhood, where Learning Begins Carol Sue Fromboluti, Carol Seefeldt, 1999 This resource book is intended to aid parents of children aged 2 to 5 years in teaching geography The book offers ideas about how to encourage and give direction to enable young children to develop the vocabulary awareness and curiosity necessary to lay the foundation for the study of geography Suggested activities are included and are organized around five specific themes The themes are 1 Where are things located 2 What characteristics make a place special 3 What are the relationships among people and places 4 What are the patterns of movement of people products and information and 5 How can the Earth be divided into regions for study Each chapter begins with background examples of questions geographers ask and explanations of the early developmental skills that are involved A 16 item reference list and glossary conclude the book along with maps a resource list with suggestions of where to get free maps and a list of easy reading or picture books related to geography LB

Exploring

Children's Learning Christine Ritchie, 2016-12-08 Exploring Children's Learning 3-11 years is essential reading for those passionate about supporting children's learning environments from Early Years to Key Stage 2. By combining learning with important aspects of a broad curriculum content it will inspire and enhance an interest in supporting children's learning. Individual chapters focus on key areas of the curriculum such as literacy and history, numeracy and science as well as more general topics such as creativity, assessment and the emotional and behavioural aspects of learning. The book takes an objective view on control over curriculum and offers practical insights into how supportive learning opportunities can create enjoyable and satisfying lifelong learning habits preparing children for the challenges they may face in their adult working life. Whether you dip into chapters or read through the book as a whole you will develop your understanding of the complexity of learning and the lifelong effects implicit in this not only from the individual basis that each child faces in terms of learning how to learn but also concerning the differences in learning strategies required to successfully negotiate subject knowledge across a range of disciplines. This book is a must read for students of Childhood and Education Studies programmes, those undertaking Initial Teacher Training as well as general readers with an interest in supporting children's learning.

Designing Preschool Interventions David W. Barnett, Susan H. Bell, Karen T. Carey, 2002-08-01 This practical text delineates the basic steps of developing effective interventions for learning and behavior difficulties in children aged two to five. The authors set forth an ecological framework that stresses identifying problem situations rather than classifying individual children as disabled or at risk. The core components of naturalistic intervention design are covered in depth including teacher and parent interviewing, classroom observation and functional assessment, team-based problem solving, strong accountability methods and legal and ethical safeguards. Solidly grounded in empirical research, the book presents examples of successful interventions for fostering social competence and language skills and improving interactions with parents, teachers and peers.
