Brown, Eliza J. Nash, 2014-07-08 This volume features a collection of papers from the second annual Intercultural Horizons conference held in October 2012 in New York City USA The 2012 conference was the second in what is becoming an annual series of meetings and the present volume therefore is a companion to one issued last year by Cambridge Scholars Publishing Intercultural Horizons Best Practices in Intercultural Competence Development 2012 The papers included in this volume reflect a diversity of approaches both to intercultural

education in the North American setting and to its application in service learning and related contexts in diverse cultural settings in other nations Our authors provide faculty and student perspectives primarily from the level of postsecondary education but including a look as well at intercultural education at the primary level Many of the papers focus in one way or another on issues of curriculum teaching and learning in relation to developing intercultural competence in students in North American colleges and universities particularly though not exclusively through the use of service learning All of the papers touch in one way or another on another important development now affecting almost all institutions of higher education in North America and increasingly in other nations worldwide that of the university's engagement with the community During the past thirty years such engagement has moved from the periphery to the core of many North American colleges and universities Similar efforts are now emerging among many Asian universities and in Europe as well The paper in this volume on the Polisocial initiative at the Politecnico di Milano in Italy is a good example of how the theme of university community engagement is taking hold in a city and nation facing similar intercultural and economic challenges to those in North America and serves as a preview of themes the International Center for Intercultural Exchange hopes to explore in its future conferences www.ticfie.com *Getting Involved*, 2008-01-01 Getting involved in society means becoming a human person by doing something for others and thus being connected to mankind and society Youngsters who get involved give meaning to life and develop a feeling of agency But getting involved is not easy Getting involved is necessary for living together creating democracy and sustainability of a global world The paradox is that in a modern multicultural society getting involved is even more important than in a traditional more monocultural society Getting involved relates to various scientific orientations Political sociological psychological and pedagogical questions are at issue and all of these will be consulted in this volume The main perspective however remains the issue of identity development relating to getting involved and will therefore be psychological This book gives a broad overview of current research in the field of moral development and citizenship It shows the diversity of concepts research methodologies and educational practices The book also shows the influence of local social cultural and political contexts The book can help researchers teacher educators politicians and practitioners in finding new and better ways of supporting youngsters in their moral and civic identity development

acquisition music and the culinary arts and the administrator of a specific program or at the senior level of a college or university Together they form a representative sample of the themes discussed during the 2011 conference The editors consider this first meeting to be the dawn so to speak of Intercultural Horizons which aspires to become a respected venue for scholars and practitioners to exchange ideas techniques and pedagogies on intercultural communication in years to come
