**Non-Coding RNAs** Jan Barciszewski, 2003-08-31 General inspection of a role performed in the cell by RNAs allows us to distinguish three major groups of transcripts I protein coding mRNAs II non coding housekeeping and III regulatory RNAs The housekeeping RNAs include RNA classes that are generally constitutively expressed and whose presence is required for normal function and viability of the cells On the other hand a group of regulatory RNAs includes RNA species that are expressed at certain stages of organism development or cell differentiation or as a response to external stimuli and can affect expression of other genes on the levels of transcription or translation Non coding RNA transcripts form a heterogeneous class of RNAs that can not be characterized by a single specific function Initially the term non coding RNA ncRNA was used primarily to describe polyadenylated and a capped eukaryotic RNAs transcribed by RNA polymerase II but lacking long open reading frames Now this definition can be extended to cover all RNA transcripts that do not show protein coding capacity and is sometimes used to describe any RNA that does not encode protein including introns This book is an in depth look at the function of Non Coding RNAs and their relationship to Molecular Biology and Molecular Biology Signaling Pathways in Liver Diseases Pierre-Alain Clavien, 2005 Recent advances have carried hepatology to new frontiers The increasing frequency with which steatotic and cirrhotic livers undergo surgery obliges liver surgeons and hepatologists to understand the molecular mechanisms at play in these situations Comprehension of the signaling pathways participating in liver regeneration hepatocellular apoptosis and ischemia reperfusion injury is essential This book serves as a source of information to facilitate the reading of the literature and the planning of trials Translational medicine implies knowledge of the molecular targets of novel therapeutic strategies It is our goal to stimulate more research that can lead to more exchanges between the laboratory the clinical ward and the operating room Selected Topics in DNA Repair Clark Chen, 2011-10-26 This book is intended for students and scientists working in the field of DNA repair focusing on a number of topics ranging from DNA damaging agents and mechanistic insights to methods in DNA repair and insights into therapeutic strategies These topics demonstrate how scientific ideas are developed tested dialogued and matured as it is meant to discuss key concepts in DNA repair The book should serve as a supplementary text in courses and seminars as well as a general reference for biologists with an interest in DNA repair **Free Radicals in Human Health and Disease** Vibha Rani, Umesh Chand Singh Yadav, 2014-11-14 The role of oxidative stress in human disease has become an area of intense interest Free radicals a normal product of metabolism exist in all aerobic cells in balance with biochemical antioxidants Environmental stress increases the levels of free radicals drastically thereby disturbing the equilibrium between free radical production and the antioxidant capability causing oxidative stress Over the years ROS has been implicated in the pathologies
