 chapters **Representations of Gender From Prehistory To the Present** NA NA, 2016-04-30 Focusing primarily on
 visual forms of representation but also including material on literary representation this volume brings together studies as
 apparently disparate as the iconography of power in Mediterranean prehistory and clothing and cultural meaning in the First
 and Second World Wars What draws these chapters together is the common focus on how the scholar of the twenty first
 century can pursue the interpretation of past representational cultural production from a gendered perspective The fruit of
 research by academics from the fields of archaeology classics and ancient history art history and social history and from both
 sides of the Atlantic this volume is a fascinating introduction to a developing field *Gender Studies in Architecture* Dörte
 Kuhlmann, 2014-04-11 Analyzing a range of ideas from biological evolutionary and anthropological theories to a variety of
 feminist psychoanalytic poststructuralist and constructivist discourses this book provides a comprehensive introduction to
 the problematics of gender and power in architectural and urban design Topics range from conceptions of postulated
 matriarchal architecture in Old Europe to contemporary technologies of control from the mechanisms of gaze to architectural
 performatives from the under representation of women in the planning profession to the integration of gender issues to the
 curriculum The particular strengths of the book lie in its inclusiveness and critical analysis It is not a partisan defence of
 feminism or any other theory but a critical introduction to the issues relating to gender Moreover the conclusions reach
 beyond a narrow gender studies perspective to social and ethical considerations that are unavoidable in any responsible
 architectural or urbanistic practice With its broad range and balanced analysis of different theories the book is suitable as an

overview of gender studies in architecture and useful for any designer who is concerned with the social effects of the built environment
