Reading and Attention Disorders Drake D.

Duane,1999 This year marks the 100th anniversary of the first clinical description of the struggle to read Based on a 1998 National Dyslexia Research Foundation conference this collection of 11 papers by US neuroscientists presents recent evidence bearing on the linkage of reading and attention disorders Considerations include possible genetic neuroanatomy abnormalities epidemiology and case studies of the abilities of persons with dyslexia Includes brain images and plots of task trials Annotation copyrighted by Book News Inc Portland OR The SAGE Handbook of Dyslexia Gavin Reid,Angela Fawcett, Frank Manis,Linda Siegel,2008-09-18 The SAGE Handbook of Dyslexia is a comprehensive overview of a complex field It is a rich critical assessment of past and present theory and current research which also looks to the future The editors have brought together key figures from the international academic world both researchers and practitioners to examine the relationships between theoretical paradigms research and practice and to map new areas of research The book has 5 main sections neurological genetic perspectives cognitive and learning perspectives educational influences beyond school international perspectives *Dyslexia: From Theory to Intervention* Torleiv Høien,I. Lundberg,2013-03-14 Dyslexia research has been proceeding by quantum leaps Great advances have been made in the past few years and while many unanswered questions remain we nonetheless do know a great deal about the causes and nature of the condition and how teachers should treat it This book by two of Europe s leading experts gathers together a vast amount of recent international research on the causes and remediation of dyslexia and presents a cognitive model of the normal reading process and a process analytic diagnostic model Much of this material appears in English for the first time Adult Learning Disorders Lorraine E. Wolf,Hope E. Schreiber,Jeanette Wasserstein,2010-10-18 Recent advances in neuroimaging and genetics technologies have enhanced our understanding of neurodevelopmental disorders in adults The authors in this volume not only discuss such advances as they apply to adults with learning disorders but also address their translation into clinical practice One cluster of chapters addresses developmental concerns as children and adolescents with learning disorders approach young adulthood Experts discuss dyslexia language based and writing disorders perhaps the most widely studied group of learning disorders from the point of view of neuroimaging and genetic underpinnings Chapters on the neuroscience of nonverbal math and executive function disorders are also included Clinically oriented chapters with case studies recommendations for accommodation and considerations for evaluation follow Study of specialized populations such as late high school students college medical and law students further demonstrate how our expanded knowledge base may be applicable to clinical practice The heterogeneity of adults with learning disorders the complexity of their clinical presentation and co existing disorders are addressed from both a scientific and clinical point of view demonstrating how empirical research and clinical practice inform each other This volume will enhance the practice of clinicians and educators working with adults with

neurodevelopmental disorders as well as providing essential current information for researchers of adults with learning disorders

Disorder and Reading Disorder Lisa G. Blaskey, 2004 **Reading Acquisition in India** Purushottam G. Patel, 2004-06-30 The sixth in the series on Research in Applied Linguistics this is a ground breaking study which presents a phonological analysis of Brahmi and its modern derivatives It closely examines India's ancient cultural linguistic background particularly the Vedic Culture of oral tradition and relates this scholarship to current research and theory in linguistics neurobehavioral sciences and special education The author also provides an empirical understanding of reading acquisition by children with a particular focus on those facing poverty a toxic environment and the deprivation associated with low caste status The book is a departure from current neuropsychological research which is limited to the middle class dyslexic child It argues the need

for a multidisciplinary approach which takes into account the effects of poverty socioeconomic deprivation and environmental toxicity on reading acquisition among children from deprived groups Purushottam Patel discusses a number of important issues including The linguistic context and principles underlying the Brahmi script The reasons behind literacy emerging as a part of natural language development especially in an oral culture The cultural habits surrounding reading The importance of the living environment to literacy development The need for multidisciplinary research with an emphasis on neurobehavioral teratology *Identification of Learning Disabilities* Renee Bradley, Louis Danielson, Daniel P. Hallahan, 2002-12-18

Identification of Learning Disabilities Research to Practice is the remarkable product of a learning disabilities summit conference convened by the Office of Special Education Programs OSEP in August 2001 and the activities following that summit Both the conference and this book were seen as important preludes to congressional reauthorization of the historic Individuals With Disabilities Education Act IDEA scheduled for 2002 and subsequent decision making surrounding implementation The OSEP conference brought together people with different perspectives on LD parents researchers practitioners and policymakers and resulted in this book which examines the research on nine key issues concerning the identification of children with learning disabilities Coverage includes alternative responses to treatment classification approaches processing deficit models and approaches to decision making Chapter Structure Each of the first nine chapters is organized around a lengthy issue oriented paper which presents the most current research on that topic These primary papers are then followed by four respondent papers that reflect a variety of viewpoints on the topic Summarizing Chapter A small group of researchers listed in the final chapter dedicated an enormous amount of time to summarizing the research and developing key consensus statements regarding the identification of children with learning disabilities Their work is sure to have a tremendous impact on future discussions in this area Expertise The following well known scholars have helped summarize the vast amount of research presented in this book as well as the consensus statements derived therefrom Lynne Cook Don Deshler Doug Fuchs Jack M Fletcher Frank Gresham Dan Hallahan Joseph Jenkins Kenneth Kavale Barbara Keogh Margo Mastopieri Cecil Mercer Dan Reschley Rune Simeonsson Joe Torgesen Sharon Vaughn and Barbara Wise *The Mislabeled Child* Brock Eide, Fernet Eide, 2006-08-01 An incredibly reassuring approach by two physicians who specialize in helping children overcome their difficulties in learning and succeeding in school For parents teachers and other professionals seeking practical guidance about ways to help children with learning problems this book provides a comprehensive look at learning differences ranging from dyslexia to dysgraphia to attention problems to giftedness In *The Mislabeled Child* the authors describe how a proper understanding of a child's unique brain based strengths can be used to overcome many different obstacles to learning They show how children are often mislabeled with diagnoses that are too broad ADHD for instance or are simply inaccurate They also explain why medications are often not the best ways to help children who are struggling to learn The authors guide readers through the morass of commonly used labels and treatments offering specific

suggestions that can be used to help children at school and at home This book offers extremely empowering information for parents and professionals alike The Mislabeled Child examines a full spectrum of learning disorders from dyslexia to giftedness clarifying the diagnoses and providing resources to help The Eides explain how a learning disability encompasses more than a behavioral problem it is also a brain dysfunction that should be treated differently **Spelling, Handwriting and Dyslexia** Diane Montgomery, 2006-11-22 This ground breaking book argues that spelling and writing need to be given more consideration in teaching and remedial settings It helps teachers and student teachers to understand the valuable contribution spelling and handwriting makes to literacy development Psychiatric Genetics and Genomics Peter McGuffin, Michael J Owen, Irving I Gottesman, 2004-09-23 Geneticists and will be essential reading for psychiatrists and geneticists and will be of interest to neurologists psychologists and neuroscientists *The Power of Visual Imagery* Karen Kelly, 2006-03-01 Formerly published by Peytral Publications The Power of Visual Imagery A Reading Comprehension Program for Students with Reading Difficulties combines theory with practice in helping teachers use visual imagery to improve instruction for students with disabilities or other special learning needs Aligned with the reauthorization of IDEA 2004 this book offers easy to use research based strategies and lesson plans that can be used independently or with your current language arts program **Supporting Gifted and Talented Pupils in the Secondary School** Moira Thomson, 2006-07-12 This is an excellent book which is organised for teachers heads of schools and those specifically involved with very able youngsters Many ideas are provided in this book for teachers to follow in order to render their professional expertise appropriate for helping youngsters with high ability Dr L F Lowenstein Educational Clinical and Forensic Psychological Consultant Using ideas that have been tried and tested in the classroom this book takes a whole school approach to providing appropriate challenge and support for gifted and talented pupils in an inclusive educational setting Packed with practical ideas for meeting the needs of gifted pupils and containing plenty of case studies that show what can be achieved this book also provides advice on Defining and Identifying giftedness and talent Strategies for resolving underachievement by gifted and talented pupils Dual exceptionality and removing barriers to attainment support strategies for gifted and talented pupils in schools and in LEAs different teaching and learning strategies such as differentiation and enrichment devising a tailored curriculum to meet the needs of individual able pupils Gifted and Talented Co ordinators class teachers LEA Advisers and Learning Support Teachers looking for a whole school approach to helping more able pupils develop their abilities to the fullest potential will find this book invaluable
