Gambling is investing and investing is gambling says the Red Joker Both situations begin with a common pool of money The pool is distributed among those who have created it on the basis of a series of events that are partly controllable Through a mixture of skills self control and sheer luck some of those who have created it will receive more than others There is no inherent difference between sifting through a horse's prospects of winning a race and a company's prospects of returning regular profits There is no inherent difference in deciding whether to raise the betting on a particular hand of cards and deciding whether a property is a good or bad buy But there is a world of difference between the pace of gambling and the pace of investing A gambler faces as many investment situations in a week as an investor does in a lifetime The rules are the same but the gambler is in a situation where he can learn the rules very quickly This is a book of advice from the gambler to the investor The Red Joker Rules *Dakota Ambush* William W.
