Ageless Nation Michael G. Zey, 2017-07-05 In this intriguing volume futurist and author Michael G Zey imagines a time in which technology has stretched human life spans to four hundred years or more Genetic engineering cloning and stem cell technology will eradicate diseases and allow for nanoscopic repair and maintenance of the body Smart drugs and caloric restriction programs will largely stop aging and ensure healthy bodies and sharp minds indefinitely Grounding his speculation in contemporary scientific research Zey s optimistic vision sees retirement replaced by hiatuses between careers and leisure time spent in multi generational homes Key players in the debate include supporters like Cambridge University scientist Aubrey de Grey who envisions five thousand year life spans and the radical futurist author Ray Kurzweil who foresees the merging of humans and computers Organizations such as the Coalition to Extend Life lobby the government for immortality research funding and find opposition in the President s Council on Bioethics and deep ecologists advocating zero population growth Criticizing current environmental trends as anti progress and anti human Zey s own solutions include controversial measures like human control of weather colonization of outer space and genetically modifying food He concludes that the eventuality of a modern Fountain of Youth is closer than we think Zey s predictions about the future are thoughtful and fascinating

David Landes and others are now of great moment as global frictions increase In a spirited and original contribution to this quickening discussion two renowned historians father and son explore the webs that have drawn humans together in patterns of interaction and exchange cooperation and competition since earliest times Whether small or large loose or dense these webs have provided the medium for the movement of ideas goods power and money within and across cultures societies and nations From the thin localized webs that characterized agricultural communities twelve thousand years ago through the denser more interactive metropolitan webs that surrounded ancient Sumer Athens and Timbuktu to the electrified global web that today envelops virtually the entire world in a maelstrom of cooperation and competition J R McNeill and William H McNeill show human webs to be a key component of world history and a revealing framework of analysis Avoiding any determinism environmental or cultural the McNeills give us a synthesizing picture of the big patterns of world history in a rich open ended concise account *The Slow Moon Climbs* Susan Mattern,2021-03-02 Are the ways we look at menopause all wrong Historian Susan Mattern says yes and *The Slow Moon Climbs* reveals just how wrong we have been Taking readers from the rainforests of Paraguay to the streets of Tokyo Mattern draws on historical scientific and cultural research to reveal how our perceptions of menopause developed from prehistory to today WorldCat **The Oxford Handbook of the History of Medicine** Mark Jackson,2011-08-25 The Oxford Handbook of the History of Medicine celebrates the richness and variety of medical history around the world In recent decades the history of medicine has emerged as a rich and mature sub discipline within history but the strength of the field has not precluded vigorous debates about methods themes and sources Bringing together over thirty international scholars this handbook provides a constructive overview of the current state of these debates and offers new directions for future scholarship There are three sections the first explores the methodological challenges and historiographical debates generated by working in particular historical ages the second explores the history of medicine in specific regions of the world and their medical traditions and includes discussion of the global history of medicine the final section analyses from broad chronological and geographical perspectives both established and emerging historical themes and methodological debates in the history of medicine

Health and Development Iris Borowy,Bernard Harris,2023-01-30 Health and development require one another there can be no development without a critical mass of people who are sufficiently healthy to do whatever it takes for development to occur and people cannot be healthy without societal developments that enable standards of health to be maintained or improved However the ways in which health and development interact are complex and contested This volume unites eleven case studies from nine countries in three continents and two international organizations since the late nineteenth century Collectively they show how different actors have struggled to reconcile the sometimes contradictory nature of health and development policies and the subordination of these policies to a range of political objectives **Plagues Upon the Earth** Kyle Harper,2021-10-12 Panoramic in scope *Plagues upon the Earth* traces the role of disease in the transition to farming the

spread of cities the advance of transportation and the stupendous increase in human population Harper offers a new interpretation of humanity's path to control over infectious disease one where rising evolutionary threats constantly push back against human progress and where the devastating effects of modernization contribute to the great divergence between societies The book reminds us that human health is globally interdependent and inseparable from the well being of the planet itself cFrom publisher's description
