Rolling Back The Market Economic Dogma And Political Choice:

Rolling Back the Market Peter Self, 2000 Peter Self's book offers a refreshingly broad and lucid account of the many impacts of modern capitalist markets at global national and local levels and is a bold attempt to show how a line can and should be drawn to restrict their imperialist tendencies and to make them more equitable and accountable Jacket **The Oxford Handbook of Political Institutions** R. A. W. Rhodes, Sarah A. Binder, Bert A. Rockman, 2008-06-13 The study of political institutions is among the founding pillars of political science With the rise of the new institutionalism the study of institutions has returned to its place in the sun This volume provides a comprehensive survey of where we are in the study of political institutions covering both the traditional concerns of political science with constitutions federalism and bureaucracy and more recent interest in theory and the constructed nature of institutions The Oxford Handbook of Political Institutions draws together a galaxy of distinguished contributors drawn from leading universities across the world Authoritative reviews of the literature and assessments of future research directions will help to set the research agenda for the next decade

Free Market Missionaries Sharon Beder, 2012-06-25 In her recent book *Suiting Themselves* bestselling author Sharon Beder exposed how the global corporate elite have brazenly rewritten the rules of the global economy to line their pockets In this new book she turns her sights on the insidious underbelly of this global trend to show how they have also orchestrated a mass propaganda campaign to manipulate community values and convince us that their interest co-opting and controlling all of us in the name of the free market is in our interest During the 20th century business associations coordinated mass propaganda campaigns combining 20th century American PR methods with revitalized free market ideology from 18th century Europe The aim was to persuade people to eschew their own power as workers and citizens and forego their democratic power to restrain and regulate business activity Sophisticated corporate funded think tanks augmented these campaigns in the 1970s and 1980s promoting free enterprise and business friendly policies These free market missionaries now seek to change individual and institutional values through bolder strategies such as expanding share ownership and manipulating wider public concerns In each case the goal is the same the triumph of business values over community values Beder's is an intellectual call to arms challenge the ideology of the free market missionaries or be converted to it

Deregulation and Its Discontents M. Ramesh, Michael Howlett, 2006-01-01 an extremely interesting collection full of insights and institutional detail The book definitely deserves the attention of those interested in one of the most debated issues of the last 20 years in economics and political science Herb Thompson *Journal of Contemporary Asia* *Deregulation and its Discontents* examines the different ways in which the issues related to deregulation and reregulation have been addressed in Asia The role of government in business has gone through distinct if overlapping cycles regulation deregulation and reregulation However little is known about deregulation and even less about reregulation particularly in relation to Asia The contributors to this book examine the links between the cycles through detailed analyses of the electricity market pensions

and stock markets in the Asia Pacific They also offer an explanation of regulatory cycles This unique and inter disciplinary book is thoroughly accessible and will be suitable for specialist as well as non specialist readers It will appeal to academics and researchers of public sector economics Asian studies and the political economy of Asia in particular as well as public officials dealing with regulatory issues **Politics of Interculturality** Fred Dervin, Anahy Gajardo, Anne

Lavanchy, 2011-09-22 Politics of Interculturality fulfills the need for a thorough and critical evaluation of the notion of interculturality Taking institutional and educational discourses on the intercultural as its main focus the volume captures vigorous debates currently underway across four continents the Americas Europe Asia and Oceania The volume s prominent and emerging scholars all agree that change is needed in the way interculturality is used and conceived especially at a time when the Other is an increasing issue of social concerns and political debates The authors break with tradition by teasing out the hidden assumptions and implications of interculturality making explicit the implicit presence of the tired old notion of culture They also look to establish new ways of engaging with interculturality The book will be of substantial interest to a wide range of readers who are interested in international communication education migration studies critical race studies cultural studies anthropology linguistics and business Undergraduates and novice researchers will also find invaluable advice on how to research politics of interculturality **The Public and the Private** Gurpreet Mahajan, Helmut Reifeld, 2003-08-18

Papers presented at the Workshop the Public and the Private Democratic Citizenship in a Comparative Perspective held at New Delhi during 2 4 November 2000 **Regulatory Framework in India** Sapna Chadah, 2017-01-01 Since 1980s deregulation and contracting out of governmental functions services and responsibilities have reverberated around the world under the impact and influence of liberalization privatization and globalization LPG The shift of power from the public to the private sector has profound implications for public law There has been a shift in the perceived role of Government from acting as the principal vehicle for socio economic development to guiding and facilitating that development What we see is not that total retreat of the State but rather the substitution of one form of involvement by the state in the economy for another The book deals with legal and policy issues underpinning the development and strengthening of the regulatory and institutional framework for better governance Main thrust of book is to study and analyze the changes introduced under the impact of liberalization privatization and globalization on the system and sub systems of governance from the perspective of economy efficiency effectiveness ethics and equity The book is useful to legal professionals administrators academicians researchers and students *Public City* Beau B Beza, Brendan Gleeson, 2014-11-25 Paul Mees urban ideal counted on

watchful confident and well informed citizenry to work collectively in a quest for fair and just cities As such The Public City is largely a critique of neo liberalism and its arguably negative influence on urban prospects As Mees explained it neo liberal urbanism was much more than a political aberration it was a threat that imposed many costly failures in an age overshadowed by grave ecological challenges Fifteen of Australia and New Zealand s leading urban scholars including

Professor Emeritus Jean Hillier and Professor Brendan Gleeson have contributed to this collection The Public City includes a foreword by the late Professor Sir Peter Hall a world leader in urban planning from Britain Kenneth Davidson one of Australia s top economic columnists has also contributed a chapter The collective works in this book extend beyond an analysis of urban patterns to provide a blueprint for the improvement of civic and institutional purpose in the creation of the public city An Introduction to Australian Public Policy Sarah Maddison, Richard Denniss, 2013-02-13 Examines the models influences and players that shape public policy in Australia addressing both theory and real world challenges
