## **Security Issues And The Law Of The Sea:**

Security Issues and the Law of the Sea David Larson, 1994 To find more information on Rowman Littlefield titles please visit us at [www.rowmanlittlefield.com](http://www.rowmanlittlefield.com) **Maritime Security and the Law of the Sea** Natalie Klein, 2012-10-04 Maritime Security and the Law of the Sea examines the rights and duties of states across a broad spectrum of maritime security threats. It provides comprehensive coverage of the different dimensions of maritime security in order to assess how responses to maritime security concerns are and should be shaping the law of the sea. The discussion sets out the rules regulating passage of military vessels and military activities at sea, law enforcement activities across the different maritime zones, information sharing and intelligence gathering as well as armed conflict and naval warfare. In doing so, this book not only addresses traditional security concerns for naval power but also examines responses to contemporary maritime security threats such as terrorism, weapons of mass destruction, piracy, drug trafficking, environmental damage and illegal fishing. While the protection of sovereignty and national interests remain fundamental to maritime security and the law of the sea, there is increasing acceptance of a common interest that exists among states when seeking to respond to a variety of modern maritime security threats. This book argues that security interests should be given greater scope in our understanding of the law of the sea in light of the changing dynamics of exclusive and inclusive claims to ocean use. More flexibility may be required in the interpretation and application of the UN Convention on the Law of the Sea if appropriate responses to ensure maritime security are to be allowed. **Japanese Maritime Security and Law of the Sea** Yurika Ishii, 2021-12-20 Japan, the geopolitical lynchpin in the East Asian region, has developed a unique maritime security policy and interpretation of the law of the sea. Japanese Maritime Security and the Law of the Sea is the first title to provide a comprehensive and detailed analysis on these themes in English. It examines Japan's domestic laws and its approach to international law. The topics covered include Japan's claim over its maritime entitlement, policies on the use of force at sea and the mandates of the Self Defense Force and the Japan Coast Guard to use coercive measures in maritime zones and airspace both in peacetime and in times of emergency. **Maritime Security and the Law of the Sea** Sir Malcolm D. Evans, Sofia Galani, 2020-01-31 Exploring everything from contemporary challenges to ocean security, this book offers detailed insights into the increasing activities of state and non-state actors at sea. Chapters revisit the United Nations Convention on the Law of the Sea (LOSC), highlighting how not all maritime security threats can be addressed by this and further looking at the ways in which the LOSC may even hinder maritime security. Non-Traditional Security Issues and the South China Sea Shicun Wu, Keyuan Zou, 2016-05-23 While there is abundant literature discussing non-traditional security issues, there is little mention of such issues existing in the South China Sea. This area is vulnerable to natural hazards and marine environmental degradation. The marine ecosystem is threatened by various adverse sources including land-based pollution, busy shipping lanes and over-exploitation activities which threaten the security of the surrounding population. This area is also threatened by piracy and maritime crimes but law

enforcement becomes difficult due to unclear maritime boundaries This volume is designed to explore the security cooperation and regional approaches to these non traditional security issues in the hope to build a peaceful environment and maintain international and regional security and order in the South China Sea region Advances in Marine Environmental Protection: Challenges, Solutions and Perspectives Mehran Idris Khan, Yen-Chiang Chang, Wen-Hong Liu, 2025-04-29

Environments have no boundaries and no borders Managing oceanic environments particularly the threats and risks of pollution should also consider the shared responsibility of all coastal states Emerging issues for oceanic pollution governance include global changes like rising temperature ocean acidification but also disturbances of ecosystem functioning by plastic and pollution by other emerging contaminants for example noise pollution and deep sea mining These call for efficient and sustainable prevention and restoration strategies such as efficient urban and industrial sewage treatment plants efficiently administered transnational marine protected areas and among others sustainable aquaculture extensive small scale fisheries Environmental protection warrants the development of interrelationships between marine sciences relevant industries and ocean governance developing internationally accepted rules and regulations for sustainable ocean management This Research Topic will explore possible new domains of ocean governance and the marine environment from the interdisciplinary perspectives of the rule of law including the international agreement on equal conventions the Convention on Facilitation of International Maritime Traffic the Convention on the International Regulation for Preventing Collisions at Sea and International Convention for the Prevention of Pollution from Ships MARPOL *Security Challenges In Contemporary Indo-pacific* Zhiqun Zhu, 2025-04-02 The Indo Pacific is arguably the most important and most dynamic region in the world today with numerous opportunities and challenges This book covers major security challenges in the Indo Pacific region Both traditional security challenges such as border and maritime disputes arms races weapons of mass destruction and sovereignty and non traditional security challenges such as demography public health climate change and the environment are addressed Contributors who hail from Australia China India Japan the Philippines Singapore Taiwan the United States Vietnam and elsewhere carefully examine key security challenges facing some individual countries or the region as a whole and discuss policy implications moving forward *The Interception of Vessels on the High Seas* Efthymios Papastavridis, 2014-08-28 The principal aim of this book is to address the international legal questions arising from the right of visit on the high seas in the twenty first century This right is considered the most significant exception to the fundamental principle of the freedom of the high seas the freedom in peacetime to remain free of interference by ships of another flag It is this freedom that has been challenged by a recent significant increase in interceptions to counter the threats of international terrorism and WMD proliferation or to suppress transnational organised crime at sea particularly the trafficking of narcotics and smuggling of migrants The author questions whether the principle of non interference has been so significantly curtailed as to have lost its relevance in the contemporary legal order of the oceans The book begins with an historical and theoretical

examination of the framework underlying interception This historical survey informs the remainder of the work which then looks at the legal framework of the right of visit contemporary challenges to the traditional right interference on the high seas for the maintenance of international peace and security interferences to maintain the bon usage of the oceans navigation and fishing piracy j ure gentium and current counter piracy operations off the coast of Somalia the problems posed by illegal unregulated and unreported fishing interdiction operations to counter drug and people trafficking and recent interception operations in the Mediterranean Sea organised by FRONTEX
