Manifesting Power Gender And The Interpretation Of Power In Archaeology:

Manifesting Power Tracy L. Sweely, 1999 Publisher description *Manifesting Power* confronts the relationship between gender and power within prehistoric and historic societies It addresses the extent to which our reconceptions of the nature of power and of relations between the sexes are rooted in our own experience of western society and argues that both conditions and perceptions may have been quite different among peoples of the past This collection includes nine innovative chapters which draw on data from a range of periods and areas By looking at the evidence for gender distinctions both from archaeological sites and from ethnographic observation the contributors explore what these distinctions can reveal about power relationships in general They argue that the evidence often does not point to the existence of hierarchical gender relationships and explore the forms of power available to women among the Maya and Aztec and in prehistoric Denmark Alaska and the southeastern United States

Race and Practice in Archaeological Interpretation Charles E. Orser, Jr., 2013-04-19 Scholars who investigate race a label based upon real or perceived physical differences realize that they face a formidable task The concept has been contested and condoned debated and denied throughout modern history Presented with the full understanding of the complexity of the issue *Race and Practice in Archaeological Interpretation* concentrates on the archaeological analysis of race and how race is determined in the archaeological record Most archaeologists even those dealing with recent history have usually avoided the subject of race yet Charles E Orser Jr contends that its study and its implications are extremely important for the science of archaeology Drawing upon his considerable experience as an archaeologist and using a combination of practice theory as interpreted by Pierre Bourdieu and spatial theory as presented by Henri Lefebvre Orser argues for an explicit archaeology of race and its interpretation The author reviews past archaeological usages of race including a case study from early nineteenth century Ireland and explores the way race was used to form ideas about the Mound Builders the Celts and Atlantis He concludes with a proposal that historical archaeology cast as modern world archaeology should take the lead in the archaeological analysis of race because its purview is the recent past that period during which our conceptions of race developed

Social Identities in the Classic Maya Northern Lowlands Traci Ardren, 2015-04-15 Using new archaeological data from four major cities of the Classic Maya world this book explores how gender age familial and community memories and the experience of living in an urban setting interacted to form social identities *Social Identities in the Classic Maya Northern Lowlands* plumbs the archaeological record for what it can reveal about the creation of personal and communal identities in the Maya world Using new primary data from her excavations at the sites of Yaxuna Chunchucmil and Xuenkal and new analysis of data from Dzibilchaltun in Yucatan Mexico Traci Ardren presents a series of case studies in how social

identities were created shared and manipulated among the lowland Maya Ardren argues that the interacting factors of gender age familial and community memories and the experience of living in an urban setting were some of the key aspects of Maya identities She demonstrates that domestic and civic spaces were shaped by gender specific behaviors to communicate and reinforce gendered ideals Ardren discusses how child burials disclose a sustained pattern of reverence for the potential of childhood and the power of certain children to mediate ancestral power She shows how small shrines built a century after Yaxuna was largely abandoned indicate that its remaining residents used memory to reenvision their city during a time of cultural reinvention And Ardren explains how Chunchucmil s physical layout of houses plazas and surrounding environment denotes that its occupants shared an urban identity centered in the movement of trade goods and economic exchange Viewing this evidence through the lens of the social imaginary and other recent social theory Ardren demonstrates that material culture and its circulations are an integral part of the discourse about social identity and group membership

Across a Great Divide Laura L. Scheiber, Mark D. Mitchell, 2010-02-15 Archaeological research is uniquely positioned to show how native history and native culture affected the course of colonial interaction but to do so it must transcend colonialist ideas about Native American technological and social change This book applies that insight to five hundred years of native history Using data from a wide variety of geographical temporal and cultural settings the contributors examine economic social and political stability and transformation in indigenous societies before and after the advent of Europeans and document the diversity of native colonial experiences The book s case studies range widely from sixteenth century Florida to the Great Plains to nineteenth century coastal Alaska The contributors address a series of

interlocking themes Several consider the role of indigenous agency in the processes of colonial interaction paying particular attention to gender and status Others examine the ways long standing native political economies affected and were in turn affected by colonial interaction A third group explores colonial period ethnogenesis emphasizing the emergence of new native social identities and relations after 1500 The book also highlights tensions between the detailed study of local cases and the search for global processes a recurrent theme in postcolonial research If archaeologists are to bridge the artificial divide separating history from prehistory they must overturn a whole range of colonial ideas about American Indians and their history This book shows that empirical archaeological research can help replace long standing models of indigenous culture change rooted in colonialist narratives with more nuanced multilinear models of change and play a major role in decolonizing knowledge about native peoples

Julia Augusta Tracene Harvey, 2019-07-05 Julia Augusta examines the socio political impact of coin images of Augustus's wife Livia within the broader context of her image in other visual media and reveals the detailed visual language that was developed for the promotion of Livia as the predominant female in the Roman imperial family The book provides the most comprehensive examination of all extant coins of Livia to date and provides one of the first studies on the images on Roman coins as gender infused designs which created a visual dialogue regarding Livia's power and gender roles in relation to those of male members of the imperial family While the appearance of Roman women on coins was not entirely revolutionary having roughly coincided with the introduction of images of powerful Roman statesmen to coins in the late 40s BCE the degree to which Livia came to be commemorated on coins in the provinces and in Rome was unprecedented This volume provides unique insights into the impact of these representations of Livia both on coins and in other visual media Julia Augusta Images of Rome's First Empress on the Coins of the Roman Empire will be of great interest to students of women and imperial imagery in the Roman Empire as well as the importance of visual representation and Roman imperial ideology
