Where do you begin to look for a recent authoritative article on the diagnosis or management of a particular malignancy? The few general oncology textbooks are generally out of date. Single papers in specialized journals are informative but seldom comprehensive; these are more often preliminary reports on a very limited number of patients. Certain general journals frequently publish good in-depth reviews of cancer topics and published symposium lectures are often the best overviews available. Unfortunately, these reviews and supplements appear sporadically and the reader can never be sure when a topic of special interest will be covered. Cancer Treatment and Research is a series of authoritative volumes which aim to meet this need. It is an attempt to establish a critical mass of oncology literature covering virtually all oncology topics, revised frequently to keep the coverage up to date, easily available on a single library shelf or by a single personal subscription. We have approached the problem in the following fashion: First, by dividing the oncology literature into specific subdivisions such as lung cancer, genitourinary cancer, supportive care, etc. Second, by asking eminent authorities in each of these areas to edit a volume on the specific topic on an annual or biannual basis. Each topic and tumor type is covered in a volume appearing frequently and predictably, discussing current diagnosis, staging, markers, all forms of treatment modalities, basic biology, and more.      *CSU-PHS Collaborative Radiological Health Laboratory* Collaborative Radiological Health Laboratory,1977      *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1993 First multi-year cumulation covers six years 1965-70      **2017 CFR Annual Print Title 42 Public Health Parts 1 to 399** Office of The Federal Register,2017-07-01      **Medical Books and Serials in Print** ,1984      **Pathology Annual** ,1980      **CSU-FDA Collaborative Radiological Health Laboratory Annual Report** ,1981 Contains reports on ongoing investigations being conducted by the Laboratory for its long-term study of the mortality, morbidity, and physiopathology of beagles exposed to a single low dose of ionizing radiation in utero or early in life      CSU-FDA Collaborative Radiological Health Laboratory Annual Report Collaborative Radiological Health Laboratory,1976 Contains reports on ongoing investigations being conducted by the Laboratory for its long-term study of the mortality, morbidity, and physiopathology of beagles exposed to a single low dose of ionizing radiation in utero or early in life      List of Serials and Monographs Indexed for Online Users ,1990      *Energy Research Abstracts* ,1982      **Annual Report - United States Fish and Wildlife Service** U.S. Fish and Wildlife Service,1979      Interstitial Pulmonary Diseases Moises Selman L, Roberto Barrios,1991-03-31 This book discusses basic and clinical aspects of selected topics in interstitial lung disease and the pathogenic mechanisms of pulmonary fibrosis.

Topics include the pathogenesis of interstitial fibrosis from the initial injury to the excessive accumulation of collagens in lung parenchyma detailed analysis of the role of fibroblasts mast cells and growth factors in the induction of fibrogenesis collagens collagenases and proteoglycans and hypersensitivity pneumonitis and asbestosis Other topics include morphological aspects including molecular biology techniques imaging methods functional respiratory tests and pulmonary arterial hypertension and sleep disorders in patients with ILD This book provides important information for physicians surgeons pulmonary researchers molecular pathologists biomedical researchers and students and others interested in interstitial lung disease
