*Pathways of Creativity in Contemporary Newfoundland and Labrador* María Jesús Hernández Lerena, 2015-09-18 The Canadian province of Newfoundland and Labrador is a mythologized place that resonates with tragic adventure polar expeditions and Grand Banks fishing a real and imagined geography with an incredible artistic output that calls for critical discussion This book examines the diversity of this province's literature and culture taking into consideration the expertise of scholars and writers who have first hand knowledge of its unique context Chapters on history travel fiction autobiography poetry theatre storytelling filmmaking and the visual arts provide an up to date survey across a broad range of artistic endeavours as well as close readings of selected texts The questions that fill the pages of Pathways of Creativity in

Contemporary Newfoundland and Labrador arise from the awareness its contributors have of historically shared experiences but also of shared delusions and their essays provoke contemplation beyond the labels local global Newfoundlander Come From Away Aboriginal histories and writing come to the foreground in this panoramic view that balances descriptions of mainstream vernacular and Indigenous cultural productions The final chapter is organized as a multi voiced interview which serves as a supplement to the academic essays Here themes are revisited and personalized as several writers express their feelings about what it means to be a Newfoundlander and an artist As such this book will encourage dialogue about Newfoundland and Labrador s literary and artistic achievements within the international community of readers and researchers

Kathryn Brown,George J. Bey III,2021-04-27 Pathways to Complexity synthesizes a wealth of new archaeological data to illuminate the origins of Maya civilization and the rise of Classic Maya culture In this volume prominent Maya scholars argue that the development of social religious and economic complexity began during the Middle Preclassic period 1000-300 B.C. hundreds of years earlier than previously thought Contributors reveal that villages were present in parts of the lowlands by 1000 B.C. challenging the prevailing models estimating when

civilization took root in the area Combining recent discoveries from the northern lowlands an area often neglected in other volumes and the southern lowlands the collection then traces the emergence of sociopolitical inequality and complexity in all parts of the Yucatan peninsula over the course of the Middle Preclassic period They show that communities evolved in different ways due to influences such as geographical location ceramic exchange shell ornament production agricultural strategy religious ritual ideology and social rankings These varied pathways to complexity developed over half a millennium and culminated in the institution of kingship by the Late Preclassic period Presenting exciting work on a dynamic and poorly understood time period Pathways to Complexity demonstrates the importance of a broad comparative approach to understanding Preclassic Maya civilization and will serve as a foundation for future research and interpretation Contributors M Kathryn Brown Dr George Bey III Tara Bond Freeman Fernando Robles Castellanos Tomas Gallareta Negrón E Wyllys Andrews V Anthony Andrews David S Anderson Lauren Sullivan Jaime J Awe James F Garber Mary Jane Acu a William Saturno Bobbi Hohmann Terry Powis Paul Healy Richard Hansen Donald W Forsyth David Freidel Barbara Arroyo Richard E W Adams A volume in the series Maya Studies edited by Diane Z Chase and Arlen F Chase
