Chacon, Rubén G. Mendoza, 2011-12-14 The decision to publish scholarly findings bearing on the question of Amerindian environmental degradation warfare and or violence is one that weighs heavily on anthropologists This burden stems from the fact that documentation of this may render descendant communities vulnerable to a host of predatory agendas and hostile modern forces Consequently some anthropologists and community advocates alike argue that such culturally and socially sensitive and thereby politically volatile information regarding Amerindian induced environmental degradation and warfare should not be reported This admonition presents a conundrum for anthropologists and other social scientists employed in the academy or who work at the behest of tribal entities This work documents the various ethical dilemmas that confront anthropologists and researchers in general when investigating Amerindian communities The contributions to this volume explore the ramifications of reporting and specifically of non reporting instances of environmental degradation and warfare among Amerindians Collectively the contributions in this volume which extend across the disciplines of archaeology anthropology ethnohistory ethnic studies philosophy and medicine argue that the non reporting of environmental mismanagement and violence in Amerindian communities generally harms not only the field of anthropology but the Amerindian populations themselves *Handbook to Life in the Ancient Maya World* Lynn V. Foster, 2005 This comprehensive and accessible reference explores the greatest and most mysterious of civilizations hailed for its contributions to science mathematics and technology Each chapter is supplemented by an extensive bibliography as well as photos original line drawings and maps Gold and Power in Ancient Costa Rica, Panama, and Colombia Jeffrey Quilter, John W. Hoopes, 2003 The lands between Mesoamerica and the Central Andes are famed for the rich diversity of ancient cultures that inhabited them Throughout this vast region from about AD 700 until the sixteenth century Spanish invasion a rich and varied tradition of goldworking was practiced The amount of gold produced and worn by native inhabitants was so great that Columbus dubbed the last New World shores he sailed as Costa Rica the Rich Coast Despite the long recognized importance of the region in its contribution to Pre Columbian culture very few books are readily available especially in English on these lands of gold *Gold and Power in Ancient Costa Rica Panama and Colombia* now fills that gap with eleven articles by leading scholars in the field Issues of culture change the nature of chiefdom societies long distance

trade and transport ideologies of value and the technologies of goldworking are covered in these essays as are the role of metals as expressions and materializations of spiritual political and economic power These topics are accompanied by new information on the role of stone statuary and lapidary work craft and trade specialization and many more topics including a reevaluation of the concept of the Intermediate Area Collectively the volume provides a new perspective on the prehistory of these lands and includes articles by Latin American scholars whose writings have rarely been published in English The Taking and Displaying of Human Body Parts as Trophies by Amerindians Richard J. Chacon, David H. Dye, 2007-08-21 This edited volume mainly focuses on the practice of taking and displaying various body parts as trophies in both North and South America The editors and contributors which include Native Peoples from both continents examine the evidence and causes of Amerindian trophy taking Additionally they present objectively and discuss dispassionately the topic of human proclivity toward ritual violence This book fills the gap in literature on this subject **Personal Adornment and the Construction**

of Identity Hannah V. Mattson, 2021-06-09 Objects of adornment have been a subject of archaeological historical and ethnographic study for well over a century Within archaeology personal ornaments have traditionally been viewed as decorative embellishments associated with status and wealth materializations of power relations and social strategies or markers of underlying social categories such as those related to gender class and ethnic affiliation Personal Adornment and the Construction of Identity seeks to understand these artefacts not as signals of steady pre existing cultural units and relations but as important components in the active and contingent constitution of identities Drawing on contemporary scholarship on materiality and relationality in archaeological and social theory this book uses one genre of material culture items of bodily adornment to illustrate how humans and objects construct one another Providing case studies spanning 10 countries three continents and more than 9 000 years of human history the authors demonstrate the myriad and dynamic ways personal ornaments were intertwined with embodied practice and identity performativity the creation and remaking of social memories and relational collections of persons materials and practices in the past The authors careful analyses of production methods and composition curation heirlooming and reworking decorative attributes and iconography position within assemblages and depositional context illuminate the varied material and relational axes along which objects of adornment contained social value and meaning When paired with the broad temporal and geographic scope collectively represented by these studies we gain a deeper appreciation for the subtle but vital roles these items played in human lives
