

# REGULATORY PATHWAY SOUTH KOREA

DYK? The Ministry of Food and Drug Safety (MFDS) oversees South Korea's cosmetics regulations, ensuring product safety and quality.

Here's an overview of the Regulatory pathway.

## CLASSIFICATION OF COSMETICS

### General Cosmetics

Products that do not contain specific functional ingredients or functional claims.

### Functional Cosmetics

Products that contain specific functional ingredients.

**Safety Assessment:** Cosmetic manufacturers/importers must assess product safety, providing ingredient data, BSE/TSE document, and precautions to the MFDS.

**Cosmetic Ingredient Review:** South Korea lists prohibited and restricted cosmetic ingredients. Manufacturers and importers must avoid banned substances and meet allowable ingredient limits.

**Notification and Reporting:** Importers must notify the MFDS of any adverse events related to their products. This includes reporting adverse reactions from consumers.

**Labeling:** To enter the South Korean market, cosmetic manufacturers must follow MFDS guidelines for labeling, including using the Korean language and providing key details like product name, ingredients, usage instructions, and precautions.

**Good Manufacturing Practices (GMP):** Manufacturers should adhere to GMP standards for the production of cosmetics to ensure product quality and safety. However, without a GMP facility, importers cannot import overseas cosmetics into Korea.

**Post-Market Surveillance:** The MFDS conducts post-market surveillance, requesting information or initiating recalls, if safety concerns arise.

Companies marketing cosmetics in South Korea must understand and follow the local regulations to legally sell their products. Non-compliance can result in product removal and legal consequences.
