across time and place it has performed all sorts of cultural political and social functions This volume traces money in German speaking Europe from the late Renaissance until the close of the twentieth century exploring how people have used it and endowed it with multiple meanings The fascinating studies gathered here collectively demonstrate money s vast symbolic and practical significance from its place in debates about religion and the natural world to its central role in statecraft and the formation of national identity Place and Politics: Local Identity, Civic Culture, and German Nationalism in North Germany during the Revolutionary Era Katherine Aaslestad, 2005-12-01 This study examines North Germany during the transformative era of the French Revolution Napoleonic occupation and Wars of Liberation it reveals international exploitation military occupation economic destruction of the city state Hamburg as well as the republic s liberation and post Napoleonic autonomy Examining shifts within local culture and the role of public opinion on civic morality this book underscores the relationship between the civic ethics public language and collective memory in the construction of political identity and concludes that the transformation in values at the local level ultimately provides the crucial direction in the process of modern nation building Throughout the 1800s the public commemoration and memory of occupation and liberation rather than the actual Napoleonic experience shaped the development of German nationalism Hoffmann, Cosmopolitanism, and the Struggle for German Opera Francien Markx, 2015-11-02 In this first monograph on E T A Hoffmann and opera Francien Markx examines Hoffmann's writings on opera and the challenges they pose to established narratives of aesthetic autonomy the search for a national opera and Hoffmann's biography Markx discusses Hoffmann's lifelong fascination with opera against the backdrop of eighteenth century theater reform the creation of national identity contemporary performance practices and musical and aesthetic discourses as voiced by C M von Weber A W Schlegel Heine and Wagner among others The book reconsiders the traditional view that German opera followed a deterministic trajectory toward Wagner's Gesamtkunstwerk and reveals a cosmopolitan spirit in Hoffmann's operatic vision most notably exemplified by his controversial advocacy for Spontini in Berlin The Hamburg Dramaturgy by G.E. Lessing Natalya Baldyga, 2018-10-26 While eighteenth century playwright and critic Gotthold Ephraim Lessing made numerous contributions in his lifetime to the theater the text that best documents his dynamic and shifting views on dramatic theory is also that which continues to resonate with later generations the Hamburg Dramaturgy Hamburgische Dramaturgie 1767 69 This collection of 104 short essays represents one of the eighteenth century s most important critical engagements with the theater and its potential to promote humanistic discourse Lessing s essays are an immensely erudite deeply engaged witty ironic and occasionally scathing investigation of European theatrical culture bolstered by deep analysis of Aristotelian dramatic theory and utopian visions of theater as a vehicle for human connection This is the first complete English translation of Lessing's text with extensive annotations that place the work in its historical context For the first time English language readers can trace primary source references and link Lessing s observations on drama theory and performance not

only to the plays he discusses but also to dramatic criticism and acting theory. This volume also includes three introductory essays that situate Lessing s work both within his historical time period and in terms of his influence on Enlightenment and post Enlightenment theater and criticism The newly translated Hamburg Dramaturgy will speak to dramaturgs directors and humanities scholars who see theater not only for entertainment but also for philosophical and political debate Urban Europe Krista Cowman, Nina Javette Koefoed, Åsa Karlsson Sjögren, 2014-06-05 This volume offers an integrated set of local studies exploring the gendering of political activities across a variety of sites ranging from print culture courts government and philanthropic bodies and public spaces outlining how a particular activity was constituted as political and exploring how this contributed to a gendered concept of citizenship The comparative and transnational perspectives revealed through combining such work contributes to establishing new knowledge about the relationship between gender citizenship and the development of the modern town in Northern Europe Consuming Music Emily Green, Catherine Mayes, 2017 This collection of nine essays investigates the consumption of music during the long eighteenth century providing insights into the activities of composers performers patrons publishers theorists impresarios and critics The successful sale and distribution of music has always depended on a physical and social infrastructure Though the existence of that infrastructure may be clear its organization and participants are among the least preserved and thus least understood elements of historical musical culture Who bought music and how did those consumers know what music was available Where was it sold and by whom How did the consumption of music affect its composition How was consumers musical taste shaped and by whom Focusing on the long eighteenth century this collection of nine essays investigates such questions from a variety of perspectives each informed by parallels betweenthe consumption of music and that of dance visual art literature and philosophy in France the Austro German lands and the United States Chapters relate the activities of composers performers patrons publishers theorists impresarios and critics exploring consumers tastes publishers promotional strategies celebrity culture and the wider communities that were fundamental to these and many more aspects of musical culture CONTRIBUTORS Glenda Goodman Roger Mathew Grant Emily H Green Marie Sumner Lott Catherine Mayes Peter Mondelli Rupert Ridgewell Patrick Wood Uribe Steven Zohn Emily H Green is assistant professor of music at George Mason University Catherine Mayes is assistant professor of musicology at the University of Utah Between Tradition and Modernity Mark A. Russell, 2007-12-01 Aby Warburg 1866 1929 founder of the Warburg Institute was one of the most influential cultural historians of the twentieth century Focusing on the period 1896 1918 this is the first in depth book length study of his response to German political social and cultural modernism It analyses Warburg's response to the effects of these phenomena through a study of his involvement with the creation of some of the most important public artworks in Germany Using a wide array of archival sources including many of his unpublished working papers and much of his correspondence the author demonstrates that Warburg's thinking on contemporary art was the product of two important influences his

engagement with Hamburg's civic affairs and his affinity with influential reform movements seeking a greater role for the middle classes in the political social and cultural leadership of the nation Thus a lively picture of Hamburg's cultural life emerges as it responded to artistic modernism animated by private initiative and public discourse and charged with debate
