Patrons And Adversaries:

Patrons and Adversaries Caroline Castiglione, 2005 Four generations of the aristocratic Barberini family and its vassals clashed over how the early modern Roman countryside should be governed Villagers sometimes cultivated noble interference but they frequently resisted it through the strategies of adversarial literacy political ways of reading and writing that challenged noble hegemony in the village

The Trauma of Monastic Reform Alison I. Beach, 2017-11-02 This book opens a window on the lived experience of monastic reform in the twelfth century Drawing on a variety of textual and material sources from the south German monastery of Petershausen it begins with the local process of reform and moves out into intertwined regional social political and ecclesiastical landscapes Beach reveals how the shock of reform initiated decades of anxiety at Petershausen and raised doubts about the community's communal identity its shifting internal contours and boundaries and its place within the broader spiritual and social landscapes of Constance and Swabia *The Trauma of Monastic Reform* goes beyond reading monastic narratives of reform as retrospective expressions of support for the deeds and ideals of a past generation of reformers to explore the real human impact that the process could have both on the individuals who comprised the target community and on those who lived for generations in its aftermath

Empowering Interactions Wim Blockmans, Daniel Schläppi, 2017-03-02 The emergence of the state in Europe is a topic that has engaged historians since the establishment of the discipline of history Yet the primary focus of has nearly always been to take a top down approach whereby the formation and consolidation of public institutions is viewed as the outcome of activities by princes and other social elites Yet as the essays in this collection show such an approach does not provide a complete picture By investigating the importance of local and individual initiatives that contributed to state building from the late middle ages through to the nineteenth century this volume shows how popular pressure could influence those in power to develop new institutional structures By not privileging the role of warfare and of elite coercion for state building it is possible to question the traditional top down model and explore the degree to which central agencies might have been more important for state representation than for state practice The studies included in this collection treat many parts of Europe and deal with different phases in the period between the late middle ages and the nineteenth century Beginning with a critical review of state historiography the introduction then sets out the concept of empowering interactions which is then explored in the subsequent case studies and a number of historiographical methodological and theoretical essays Taken as a whole this collection provides a fascinating platform to reconsider the relationships between top down and bottom up processes in the history of the European state

The Burden-Sharing Dilemma Brian D. Blankenship, 2023-11-15 *The Burden Sharing Dilemma* examines the conditions under which the United States is willing and able to pressure its allies to assume more responsibility for their own defense The United States has a mixed track record of encouraging allied burden sharing while it has succeeded or failed in some cases it has declined to do

so at all in others This variation Brian D Blankenship argues is because the United States tailors its burden sharing pressure in accordance with two competing priorities conserving its own resources and preserving influence in its alliances Although burden sharing enables great power patrons like the United States to lower alliance costs it also empowers allies to resist patron influence Blankenship identifies three factors that determine the severity of this burden sharing dilemma and how it is managed the latent military power of allies the shared external threat environment and the level of a patron s resource constraints Through case studies of US alliances formed during the Cold War he shows that a patron can mitigate the dilemma by combining assurances of protection with threats of abandonment and by exercising discretion in its burden sharing pressure Blankenship s findings dismantle assumptions that burden sharing is always desirable but difficult to obtain Patrons as the book reveals can in fact be reluctant to seek burden sharing and attempts to pass defense costs to allies can often be successful At a time when skepticism of alliance benefits remains high and global power shifts threaten longstanding pacts *The Burden Sharing Dilemma* recalls and reconceives the value of burden sharing and alliances

Emerging Technologies and International Stability Todd S. Sechser, Neil Narang, Caitlin Talmadge, 2021-11-28 Technology has always played a central role in international politics it shapes the ways states fight during wartime and compete during peacetime Today rapid advancements have contributed to a widespread sense that the world is again on the precipice of a new technological era Emerging technologies have inspired much speculative commentary but academic scholarship can improve the discussion with disciplined theory building and rigorous empirics This book aims to contribute to the debate by exploring the role of technology both military and non military in shaping international security Specifically the contributors to this edited volume aim to generate new theoretical insights into the relationship between technology and strategic stability test them with sound empirical methods and derive their implications for the coming technological age This book is very novel in its approach It covers a wide range of technologies both old and new rather than emphasizing a single technology Furthermore this volume looks at how new technologies might affect the broader dynamics of the international system rather than limiting the focus to a stability The contributions to this volume walk readers through the likely effects of emerging technologies at each phase of the conflict process The chapters begin with competition in peacetime move to deterrence and coercion and then explore the dynamics of crises the outbreak of conflict and war escalation in an environment of emerging technologies The chapters in this book except for the Introduction and the Conclusion were originally published in the *Journal of Strategic Studies*

A Collective Biography of Twelve World-Class Leaders John R. Shoup, 2005-03-14 This collective biography on twelve world class leaders provides timeless principles on how families as well as educational civic religious and military organizations can facilitate the development of exemplary leaders The biographies and autobiographies of great leaders reveal the importance of an involved parent happy childhood plethora of apprenticeships rich formal and informal education a steady stream of prodigious patrons gracious critics and a favorable fate In addition to biographical data this study synthesizes the various trends in leadership studies to develop a comprehensive model A coherent theory on leadership has been elusive because scholars have focused on specific parts of leadership without recognition of the whole The biographical data and synthesis of various leadership theories demonstrates that leaders share similar story lines in their development The seven identified influences and the three stages of leadership development outlined in the book illustrate themes necessary for true leadership qualities to emerge within an individual This book is intended for anyone interested in developing exceptional leaders

Nuclear Alliance Restraint Dong Sun Lee, Iordanka Alexandrova, 2025-02-05 This book examines why powerful states have varying success in restraining less powerful allies from acquiring nuclear weapons based on a broad range of historical case studies The outcomes of nuclear alliance restraint primarily depend on two structural factors the number of superpowers in the global system and the geographical distance between patrons and clients Through in depth case studies of South Korea North Korea China and Pakistan and a comprehensive analysis of 14 historical episodes the book demonstrates that restraint succeeds when there are two superpowers with one trying to rein in a distant ally Conversely restraint often fails with a single superpower in the system or when nuclear aspirants are close to their patrons This study has important implications for current nonproliferation efforts since it suggests that a bipolar world with the United States and China as superpowers would enhance counterproliferation effectiveness reducing nuclear proliferation risks In addition an inducement centered approach adopted early on would be most effective for these superpowers in restraining their allied proliferators This book will be of much interest to students of nuclear proliferation foreign policy security studies and international relations

Cross-Domain Deterrence Erik Gartzke, Jon R. Lindsay, 2019-02-01 The complexity of the twenty first century threat landscape contrasts markedly with the bilateral nuclear bargaining context envisioned by classical deterrence theory Nuclear and conventional arsenals continue to develop alongside anti satellite programs autonomous robotics or drones cyber operations biotechnology and other innovations barely imagined in the early nuclear age The concept of cross domain deterrence CDD emerged near the end of the George W Bush administration as policymakers and commanders confronted emerging threats to vital military systems in space and cyberspace The Pentagon now recognizes five operational environments or so called domains land sea air space and cyberspace and CDD poses serious problems in practice In *Cross Domain Deterrence* Erik Gartzke and Jon R Lindsay assess the theoretical relevance of CDD for the field of International Relations As a general concept CDD posits that how actors choose to deter affects the quality of the

deterrence they achieve Contributors to this volume include senior and junior scholars and national security practitioners Their chapters probe the analytical utility of CDD by examining how differences across and combinations of different military and non military instruments can affect choices and outcomes in coercive policy in historical and contemporary cases

Wars of Revelation Rebecca Lissner, 2021-10-26 Rich in historical detail and theoretical insight Wars of Revelation explains why the United States military interventions have repeatedly transformed its global role and what that means for the future of American grand strategy More than seventy five years since the end of World War II military interventions rather than major wars have emerged as a defining feature of contemporary geopolitics Yet for all the fierce policy debates over interventions and their lessons scholars have largely ignored the systematic linkages between these smaller scale wars and transformations in the grand strategies of states that prosecute them In Wars of Revelation Rebecca Lissner explains why military interventions can be crucibles of grand strategy testing strategic axioms on the battlefield and prompting combatant states to reconceive their global roles Through detailed historical case studies of US involvement in the Korean Vietnam and Persian Gulf Wars Lissner shows how each intervention generated searing insights into the capabilities and intentions of America s international adversaries as well as the potential and limits of its own national power By focusing on these three wars of revelation Lissner presents a fresh perspective on the origins and evolutions of US grand strategy from the dawn of the Cold War to its twilight Persuasively argued and historically illuminating Wars of Revelation is essential reading for anyone who crafts studies or follows international security policy
