**Compression Schemes for Mining Large Datasets** T. Ravindra Babu, M. Narasimha Murty, S.V. Subrahmanya, 2013-11-19 This book addresses the challenges of data abstraction generation using a least number of database scans compressing data through novel lossy and non lossy schemes and carrying out clustering and classification directly in the compressed domain Schemes are presented which are shown to be efficient both in terms of space and time while simultaneously providing the same or better classification accuracy Features describes a non lossy compression scheme based on run length encoding of patterns with binary valued features proposes a lossy compression scheme that recognizes a pattern as a sequence of features and identifying subsequences examines whether the identification of prototypes and features can be achieved simultaneously through lossy compression and efficient clustering discusses ways to make use of domain knowledge in generating abstraction reviews optimal prototype selection using genetic algorithms suggests possible ways of dealing with big data problems using multiagent systems

**Networked Digital Technologies, Part II** Filip Zavoral, Jakub Yaghob, Pit Pichappan, Eyas El-Qawasmeh, 2010-06-30 On behalf of the NDT 2010 conference the Program Committee and Charles University in Prague Czech Republic we welcome you to the proceedings of the Second International Conference on Networked Digital Technologies NDT 2010 The NDT 2010 conference explored new advances in digital and Web technology applications It brought together researchers from various areas of computer and information sciences who addressed both theoretical and applied aspects of Web technology and Internet applications We hope that the discussions and exchange of ideas that took place will contribute to advancements in the technology in the near future The conference received 216 papers out of which 85 were accepted resulting in an acceptance rate of 39% These accepted papers are authored by researchers from 34 countries covering many significant areas of Web applications Each paper was evaluated by a minimum of two reviewers Finally we believe that the proceedings document the best research in the studied areas We express our thanks to the Charles University in Prague Springer the authors and the organizers of the conference
