Thinking Differently Gabrielle Griffin, Rosi Braidotti, 2002-10 This book is the first to ask whether there is a specifically European dimension to certain major issues in Women s Studies It strives to create a synergetic debate among different disciplines and cultural traditions in Europe and in doing so fills some gaps in our knowledge about women and enriches debates hitherto dominated by Anglo American influences Among the new areas of enquiry opened up in this book by the specificities of European Women s Studies are The fact that Europe has repeatedly experienced warfare on its own territory which has impacted significantly on women Hence the focus in this volume on women and militarism and on ethnic cleansing as an attack on the family The abidingly problematic relationship between feminism and anti semitism and issues of migration and whiteness in a context where racism reflects the colonial histories of particular European countries The importance of passion and the emotions as well as psychoanalytical theory for politics particularly in Southern and Eastern

European countries Current problems facing Europe including the decline of the welfare state the phenomenon of the single woman and the relationship between women s rights and human rights The diverse faces of feminist movements in particular European countries Reading feminism from a European perspective will enable readers to reflect upon the ways in which changes in political social and cultural positions and practices over the past century in Europe have impacted on feminist thinking and theorizing The volume raises important issues about the transfer of feminist concepts across cultures and languages And to English speaking audiences the volume also offers fresh viewpoints on some of the key debates in Women s Studies

**Feminism and Christian Ethics** Susan Frank Parsons,1996-02-29 Feminists are aware of the diversity of thinking within their own tradition and of the different approaches to moral questions in which that is manifest This book describes and analyses that diversity by distinguishing three distinct paradigms of moral reasoning to be found within feminism Using the writings of feminists the major strengths and weaknesses of each theory are considered so that creative dialogue between them can be encouraged Three common themes are drawn out which are also on the agenda of new developments in philosophical and Christian ethics the search for an appropriate universalism the possibility of a redemptive community and the development of a new humanism Feminists may be encouraged through this account of their considerable scholarship in ethical thinking to contribute to these changes with their special concern for the lives and the fulfilment of women

*Is Philosophy Androcentric?* Iddo Landau,2009-03-02 In *Is Philosophy Androcentric* Iddo Landau contends that none of the arguments for viewing philosophy as pervasively androcentric ultimately stand up to rational scrutiny while the ones that show it to be nonpervasively androcentric do not undermine it in the way that many critics have supposed Philosophy emerges in almost all of its parts he concludes as human rather than male and most parts and aspects of it need not be rejected or rewritten

Homo Dominus Stephen G. Dennis,2009-01-17 Homo dominus redefines what it means to be human Starting with the component pieces of human uniqueness cognition self awareness language technology aggression altruism culture the arts and spirituality it rebuilds the human species using a new conceptual blueprint Sure to spark debate Homo dominus offers a

new vision of who we are and how we got here Author Stephen Dennis draws from neuroscience paleontology psychology and sociobiology to show that the impetus of human evolution is our propensity to control events and their consequences This means simply that our root operating system is built on actions taken to bring perceptions into line with expectations A pivotal genetic shift driven by ecological instability in the late Miocene era triggered this evolutionary divergence and propelled us out of apedom From our hardscrabble origins on the forest margins to our current position of global dominance Homo dominus recasts traditional human evolutionary theory in terms of basic control theory It is a powerful organizing principle that puts our past in a new context and projects our future in a new light      Book Alone: Caring for the Vulnerable

Sally Ledger, Josephine McDonagh, Jane Spencer, 2014-07-10 In recent years feminist scholars through their insistence on the key role of gender in critical analysis have brought about a profound revitalization of literary and cultural studies This text draws together work by leading exponents in the field The essays explore the operations of gender in the production of knowledge and the formation of cultural representations in a wide variety of contexts from German romantic poetry to the literature of AIDS from Victorian ethnography to tabloid constructions of race All of the essays engage in problems of representation intervening in current debates in critical theory      *Professional Identity Crisis* Carrie Yang Costello, 2005 The fact that women and people of color tend to underperform at professional schools is a source of controversy Conservatives blame affirmative action while liberals blame intentional discrimination The extensive research reported in Professional Identity Crisis belies both conspiracy theories The author spent over 400 hours observing how first year students are socialized in two very different environments Boalt School of Law and the School of Social Welfare at UC Berkeley watching how they adapted to different expectations of how to speak dress and behave in the classroom Costello found that students who were female of color disabled or poor were not underqualified compared with their privileged peers Nor did the research uncover intentional bigotry Instead the disproportionate success of white men can be explained by the fact that they are more likely to acquire appropriate professional identities swiftly with little inner conflict Students from less privileged

backgrounds however suffered from identity dissonance For example Jasmine a Filipino student from Los Angeles explained In the legal culture you have to adopt a different way of being a different vocabulary and way to carry yourself That s how I got this far And when I go home if I act the way I do here they won t get it My cousins and my friends say You re kind of whitewashed And when I come back here I have to get back my law style      *Tears into Wine* Eric Chafe,2015-05-01 In 1714 the 29 year old Johann Sebastian Bach was promoted to the position of concertmaster at the ducal court of Weimar This post required him for the first time in his already established career to produce a regular stream of church cantatas one cantata every four weeks Among the most significant works of this period is Ich hatte viel Bek mmernis in meinem Herzen Cantata 21 Generally known in English as I had much affliction Cantata 21 draws from several psalms and the Book of Revelations and offers a depiction of the spiritual ascent of the soul from intense tribulation to joy and exaltation Although widely performed and loved by musicians Cantata 21 has endured much criticism from scholars and critics who claim that the piece lacks organizational clarity and stylistic coherence In *Tears into Wine* renowned Bach scholar Eric Chafe challenges the scholarly consensus arguing that Cantata 21 is an exceptionally carefully designed work and that it displays a convergence of musical structure and theological purpose that is paradigmatic of Bach s sacred work as a whole Drawing on a wide range of Lutheran theological writing Chafe shows that Cantata 21 reaches beyond the scope of the individual liturgical occasion to voice a breadth of meaning that encompasses much of the core of Lutheran thought Chafe artfully demonstrates that instead of simply presenting a musical depiction of the soul s journey from sorrow to bliss Cantata 21 expresses the various stages of God s revelation and their impact on the believing soul As a result Chafe reveals that Cantata 21 has a formal design that mirrors Lutheran belief in unfolding revelation with the final movement representing the work s crown the goal toward which all of the earlier movements are directed Complete with full text translations of the cantata and the liturgical readings that would have accompanied it at the first performance *Tears into Wine* is a monumental book that is ideally suited for Bach scholars and students as well as those generally interested in the relationship between theology and music      **Cinematic**

**Learning Patterns in Higher Education** David Gijbels, Vincent Donche, John T. E. Richardson, Jan D.

Vermunt, 2013-09-11 Learning Patterns in Higher Education brings together a cutting edge international team of contributors to critically review our current understanding of how students and adults learn how differences and changes in the way students learn can be measured in a valid and reliable way and how the quality of student learning may be enhanced There is substantial evidence that students in higher education have a characteristic way of learning sometimes called their learning orientation Biggs 1988 learning style Evans et al 2010 or learning pattern Vermunt and Vermetten 2004 However recent research in the field of student learning has resulted in multi faceted and sometimes contradictory results which may reflect conceptual differences and differences in measurement of student learning in each of the studies This book deals with the need for further clarification of how students learn in higher education in the 21st century and to what extent the measurements often used in learning pattern studies are still up to date or can be advanced with present methodological and statistical insights to capture the most important differences and changes in student learning The contributions in the book

are organized in two parts a first conceptual and psychological part in which the dimensions of student learning in the 21st century are discussed and a second empirical part in which questions related to how students learning can be measured and how it develops are considered Areas covered include Cultural influences on learning patterns Predicting learning outcomes Student centred learning environments and self directed learning Mathematics learning This indispensable book covers multiple conceptual perspectives on how learning patterns can be described and effects and developments can be measured and will not only be helpful for learning researchers as such but also for educational researchers from the broad domain of educational psychology motivation psychology and instructional sciences who are interested in student motivation self regulated learning effectiveness of innovative learning environments as well as assessment and evaluation of student characteristics and learning process variables

**Musical Forces** Steve Larson,2012-01-31 Steve Larson drew on his 20 years of research in music theory cognitive linguistics experimental psychology and artificial intelligence as well as his skill as a jazz pianist to show how the experience of physical motion can shape one s musical experience Clarifying the roles of analogy metaphor grouping pattern hierarchy and emergence in the explanation of musical meaning Larson explained how listeners hear tonal music through the analogues of physical gravity magnetism and inertia His theory of melodic expectation goes beyond prior theories in predicting complete melodic patterns Larson elegantly demonstrated how rhythm and meter arise from and are given meaning by these same musical forces
