John's Relationship with Mark Ian D. Mackay, 2004 This book is a literary historical enquiry into the relationship between John and Mark with special emphasis on the feeding saga in each Because of the differences between these key canonised texts the question of how their differences are to be understood is important in regard to our understanding of Biblical authority and interpretation and in particular of the meaning and importance of the Eucharist The research finds that the writers of John s Gospel knew Mark and that John shows a certain degree of influence from it both positive and negative Ian D Mackay surveys the debate to date looks at general literary and strategic similarities and differences between John and Mark and then analyses John 6 in comparison with Mark 6 8 and certain other related texts in Mark The detailed analysis of the debate the points of literary similarity between the two Gospels as a whole and the emergence of Markan strategies lifted from Mark and applied in John to supporting a literary agenda virtually contrary to that of Mark especially in regard to the roles of the disciples and the crowds in the plot of each as a whole may well be useful for those interested in the question of how the four Gospels relate to one another **Nonlinear Dynamics and Pattern**

Formation in the Natural Environment A Doelman, A Van Harten, 2022-09-16 This Research Note aims to provide an insight into recent developments in the theory of pattern formation In the last decade there has been considerable progress in this field both from a theoretical and a practical point of view Recent mathematical developments concern the study of the nonlinear stability of systems at near critical conditions by an appropriate system of modulation equations The complexity of the original problem can be reduced drastically by this approximation Moreover it provides unifying point of view for a wide range of problems New applications of the theory arise in a multitude of scientific areas such as hydrodynamics reaction diffusion problems oceanography meteorology combustion geophysical and biological morphodynamics and semi conductors This book is intended to show the interactions between the mathematical theory of nonlinear dynamics and the study of pattern generating phenomena in the natural environment There is an intimate relationship between new insights in the mathematical aspects of nonlinear pattern formation and the comprehension of such phenomena Therefore there are two

partly overlapping main themes one in which the emphasis is on generally applicable mathematical theories and techniques and one in which the phenomenology of pattern evolution in various areas is discussed The book comprises 19 contributions by experts in the field Although the emphasis changes considerably from paper to paper in each contribution the same two themes are present all the authors have aimed to achieve a suitable balance between the mathematical theory and the physical phenomena

Playwright, Space and Place in Early Modern Performance Mr Tim Fitzpatrick, 2013-05-28 Analyzing Elizabethan and Jacobean playtexts for their spatial implications this innovative study discloses the extent to which the resources and constraints of public playhouse buildings affected the construction of the fictional worlds of early modern plays The study argues that playwrights were

writing with foresight inscribing the constraints and resources of the stages into their texts It goes further to posit that Shakespeare and his playwright contemporaries adhered to a set of generic conventions rather than specific local company practices about how space and place were to be related in performance the playwrights constituted thus an overarching virtual company producing playtexts that shared features across the acting companies and playhouses By clarifying a sixteenth to seventeenth century conception of theatrical place Tim Fitzpatrick adds a new layer of meaning to our understanding of the plays His approach adds a new dimension to these particular documents which though many of them are considered of great literary worth were not originally generated for any other reason than to be performed within a specific performance context The fact that the playwrights were aware of the features of this performance tradition makes their texts a potential mine of performance information and casts light back on the texts themselves if some of their meanings are spatial these will have been missed by purely literary tools of analysis **The Publishers' Trade List Annual** ,1982
