Magda Nico, Gary Pollock, 2021-12-30 Drawing upon perspectives from across the globe and employing an interdisciplinary life course approach this handbook explores the production and reproduction of different types of inequality across a variety of social contexts Inequalities are not static easily measurable and essentially quantifiable circumstances of life They are processes which impact on individuals throughout the life course interacting with each other accumulating attenuating reproducing or distorting themselves along the way The chapters in this handbook examine various types of inequality such as economic gender racial and ethnic inequalities and analyse how these inequalities manifest themselves within different aspects of society including health education and the family at multiple levels and dimensions The handbook also tackles the global COVID 19 pandemic and its striking impact on the production and intensification of inequalities The interdisciplinary life course approach utilised in this handbook combines quantitative and qualitative methods to bridge the gap between theory and practice and offer strategies and principles for identifying and tackling issues of inequality This book will be indispensable for students and researchers as well as activists and policy makers interested in understanding and eradicating the processes of production reproduction and perpetuation of inequalities

The Distribution of Welfare and Household Production Stephen P. Jenkins, Arie Kapteyn, Bernard M. S. van Praag, 1998-04-16 This book uses a range of approaches to measure living standards and economic welfare [Handbook of Quality of Life in the Enlarged European Union](#)

Jens Alber, Tony Fahey, Chiara Saraceno, 2007-10-15 Recent enlargement to the east made the European Union a more diverse social space and brought it into more direct contact with the social and cultural aftermath of communism The purpose of this book is to help social scientists policy makers and other observers cope with the unfamiliarity of this new world by bringing together a collection of informative analyses of key domains of social life in the new member states and candidate countries viewed in comparison both to each other and to the old EU 15 The focus is on social conditions such as social exclusion poverty and living conditions work and labour markets family and housing But is also offers accounts of the institutional contexts within which these conditions arise The analyses makes use of a range of data including a new data source the European Quality of Life Survey 2003

Territorial Cohesion in Rural Europe

Andrew K. Copus, Philomena de Lima, 2014-08-13 This book reflects on how the economies social characteristics ways of life and global relationships of rural areas of Europe have changed in recent years This reveals a need to refresh the concepts we use to understand measure and describe rural communities and their development potential This book argues that Europe has outgrown many of the stereotypes usually associated with it with substantial implications for European Rural Policy Rural structural change and its evolving geography are portrayed through regional typologies and the concept of the New Rural Economy Demographic change migration business networks and agricultural restructuring are each explored in greater detail Implications for equality and social exclusion and recent developments in the field of governance are also considered Despite being a subject of active debate interventions in the fields of rural and regional development have failed to adapt to changing realities and have become increasingly polarized This book argues that rural regional policy needs to evolve in order to address the current complex reality partially reformulating territorial or place based approaches and the New Rural Paradigm following a set of principles termed Rural Cohesion Policy *Social Exclusion in Great Britain* Matt

Barnes, 2019-06-04 Originally published in 2005 In Great Britain the reduction of social exclusion has been at the forefront of New Labour's social policy since 1997 However there is ambiguity about what the notion of social exclusion actually encompasses caused in part by the limited extent of attempts to measure and understand social exclusion empirically This key work addresses this problem employing data from a nationally representative survey of British households to quantify levels of social exclusion and the composition of the socially excluded population It also incorporates data from a European Commission funded household survey to compare social exclusion in Great Britain with eleven other countries in the European Union In the book Matt Barnes argues that social exclusion refers to enduring disadvantage on a wide range of living standards not just those that reflect economic values As well as looking at standard measures of poverty he looks at more relational measures of disadvantage such as neighbourhood discontent and social isolation in order to determine exclusion from the economic social and cultural systems that determine the integration of a person in society **Social**

Europe Richard Berthoud, Maria Iak_vou, 2004-01-01 Social Europe analyses the diverse dynamics of the lives of people across Europe It is the first quantitative analysis of its kind to make a systematic comparison of life chances across the fifteen countries of the EU This wide perspective enables the researchers to illustrate how social policy regimes interact with personal resources and circumstances to affect people's well being Assessing changes in individuals lives over time the study highlights variations in life opportunities across the EU in the key domains of family employment and income The research is based on a new and powerful survey that has followed a large sample of families in each country over a period of years This longitudinal approach provides insights into the processes by which people acquire their social positions over time The analysis identifies systematic differences between countries and looks for explanations in terms of the welfare regime or other characteristics of the countries concerned Thus the micro dynamics of personal experience are related to macro trends

in institutions and policies social norms and economic conditions Identifying the effects of country and of social policy regime on individual outcomes Social Europe will provide new insights for social scientists especially those involved in European comparative research or whose interests lie in the fields of family employment income or social exclusion The book will also appeal to those engaged in the analysis or formulation of social policy whether at national or international level People and Places Dorling, Daniel, Thomas, Bethan, 2004-06-30 Providing an at a glance guide to social change in the UK at the start of the new millennium this book offers comparisons with the findings of the previous Census a decade ago Many maps covering different topics illustrate the state of UK society today and how it is changing **Territorial and Social**

Inequalities in Europe Martin Heidenreich, 2022-10-28 This book examines social inequalities in Europe especially those caused by economic factors It starts with the paradox of European inequality where on the one hand even total income inequality in Europe is significantly lower than in most parts of the world but on the other Europe is also characterised by profound and durable inequalities within the continent It discusses inequalities caused by the exclusion of marginalised groups from the labour market with considerable and sometimes increasing differences between central and peripheral regions pronounced wealth and labour market inequalities and significant rates of persistent poverty deprivation educational poverty low wages and unemployment The book also discusses broader territorial inequalities which are the basis for divisions between Northern and Southern Europe East and West between qualified and unqualified employees younger and older people men and women and migrants and non migrants The book raises questions about the winners and losers of the social transformations linked to the introduction of the Euro the Eastern enlargement of the EU and the financial and Eurozone crises It is based on a comprehensive analysis of a European wide microdata set on income and living conditions EU SILC The empirical research material which is the first to deploy this data in a comprehensive manner consists of detailed empirical analyses of social divisions and Europeanisation processes in 30 European countries It analyses and explains the transformation of the previously dominant national spaces into a European social space This topical book is of interest to academics and students in the fields of sociology and comparative social sciences along with those studying European regional geography anthropology international relations and international politics **Exploring Inequality in**

Europe Martin Heidenreich, 2016-06-24 Europe has become a dominant frame for the generation regulation and perception of social inequalities This trend was solidified by the current economic crisis which is characterized by increasing inequalities between central and peripheral countries and groups By analysing the double polarization between winners and losers of the crisis the segmentation of labour markets and the perceived quality of life in Europe this book contributes to a better understanding of patterns and dynamics of inequality in an integrated Europe **The Spanish Welfare State in European Context** Ana Marta Guillén, Margarita León, 2016-02-17 Following the death of Franco Spain underwent a transition to democracy in the mid 1970s Although a rapid process of modernization occurred the Spanish welfare state was seen until

fairly recently as relatively underdeveloped However given the progressive Europeanization and expansion of Spanish social policy questions arise as to whether the Spanish welfare system should still be considered as peripheral to West European welfare states This volume is divided into three sections The first section deals with broad trends in the evolution of the Spanish welfare state To begin with the consolidation path of social protection policies is explored Attention is also paid to the process of Europeanization Furthermore the analysis explores advances in gender equality policies In the second section attention is turned to governance issues such as collective bargaining the interplay among levels of government the welfare mix and public support for social policies The third and final part of the book addresses five main challenges facing the Spanish welfare state in the 21st century namely the need to enhance flexicurity to achieve a better work family balance to coordinate immigration policies with existing social protection to tackle the persistence of high rates of relative poverty and to face intense population ageing both in terms of increasing needs for care and the reform of the pension system

Reshaping Welfare States and Activation Regimes in Europe SALTSA (Program), 2007 The activation based intervention paradigm is being adopted by several European countries resulting in major reforms to the social welfare system The spread of the activation paradigm has had major repercussions not only for welfare interventions aimed at combating unemployment but also for the political regulation of the social question and citizenship Citizenship is being redefined in contractual terms and greater emphasis is being placed on its economic aspects Nevertheless a wide range of policies are labelled with recourse to this interpretative framework and a pluralistic approach to implementation could serve just as well to empower as to weaken workers citizens position in society This book analyses the extent of these changes from a cross cultural perspective Institutional settings as well as prevailing work values and social representation of social exclusion activation regimes have a key role in defining the instruments to be used in national activation strategies to regulate the behaviour of job seekers In this book a discussion about the range of social welfare model reforms throughout Europe and a typology of activation regimes is proposed

Sotiropoulos, Maria Zafiropoulou, 2018-03-02 This volume uses new empirical evidence and analytical ideas to study phenomena of fragmentation and exclusion threatening stability and cohesion in Greek society in the aftermath of the crisis The contributors argue that processes of fragmentation and exclusion provoked by the crisis can be observed on both a material and an ideational level On a material level rising levels of unemployment poverty and inequality have produced new social security outsiders while on an ideational level a discursive cultural shift is documented which has led to new understandings and categorizations of new and old insiders and outsiders Moreover the volume attests to the aspirations but also the limitations of spontaneous civil society mobilization to address the social crisis Finally the volume offers a discussion of the political management of social fragmentation and exclusion in Greece both before and after the onset of the crisis The book will be of interest to scholars and students of social policy and phenomena of poverty social exclusion and economic inequality civil society studies and comparative political economy and politics **Food and Public Health** Wendy Wills, Alison Draper, Ulla
