Performance Appraisal And Human Development:

Performance Appraisal and Human Development Howard P. Smith, Paul J. Brouwer, 1977 4-Square Human Development System Quin Childress, Childress Consulting, Pat Childress, 2007-03 Exhaustive research has been done on employee behavior and productivity in the workplace. The findings are pretty consistent. People are largely underutilized and the majority of management and employees are unhappy with their work environment. Even worse, there hasn't been a straightforward comprehensive process for human development in the workplace. There have been many attempts, but the choices are often cumbersome, expensive, or incomplete. Most don't satisfy the real need for human change management that contributes to organizational success. The 4 Square HDST was designed to be a complete system for workforce change and sustained employee engagement. It effectively brings management and employees together on common interests once and for all. This powerful management tool generates dramatic, rapid improvements in morale. Gets management and employees working together on the same page. Meets the needs and wants of an organization's best employees. Provides an effective process for dealing with performance and behavior issues. Keeps everyone focused on strategic, measurable objectives. Best of all, it's a user-friendly, documented system focused on helping people and organizations succeed. Finally, a practical tool is available for all levels of management. Childress Consulting is a management and human resource consulting firm. They have been helping private and public sector organizations thrive in organizational and employee performance for the past fourteen years. Performance Appraisal in the Public Sector Dennis M. Daley, 1992-08-21 Performance appraisal is a key tool for meeting the managerial needs of the modern organization. Daley examines the entire process of designing a performance appraisal system, from determining its organizational purpose to constructing an objective appraisal instrument for measuring employee performance. Emphasis is also placed on the role of employee feedback and appraisal training. The cognitive behavior that shapes and influences the rating process is detailed. The book integrates the literature and practices detailed in business management psychology and sociology with that focusing on the public sector. After an overview of performance appraisal research and the effect of public-private differences, Daley examines the reasons for performance appraisal and the basic mechanics: why, what, when, who of establishing an appraisal process. Special emphasis is placed on the role of performance appraisal in the organization. He looks at the array of appraisal instruments that exists, concentrating on the development of objective Behaviorally Anchored Rating Scales and Management by Objectives approaches. The role of employee feedback and the performance appraisal interview for delivering it are detailed. Daley focuses on the problems that plague raters. Organizational and employee misunderstandings, along with traditional rater error problems, are diagnosed. The importance of programs for training the rater are presented. An ideal resource for managers engaged in performance appraisal, this book can also serve as a supplemental reading for courses in management and human resources personnel.
