Poverty And Politics In Harlem Report On Project Uplift 1965:

Poverty and Politics in Harlem Alphonso Pinkney, Roger R. Woock, 1970 To find more information about Rowman and Littlefield titles please visit www.rowmanlittlefield.com The Harlem Uprising Christopher Hayes, 2021-10-26 In July 1964 after a white police officer shot and killed an African American teenage boy unrest broke out in Harlem and then Bedford Stuyvesant. Protests rose up to call for an end to police brutality and the unequal treatment of Black people in a city that viewed itself as liberal. A week of upheaval ensued including looting and property damage as well as widespread police violence in what would be the first of the 1960s urban uprisings. Christopher Hayes examines the causes and consequences of the uprisings from the city's history of racial segregation in education, housing, and employment to the ways in which the police both neglected and exploited Black neighborhoods. While the national civil rights movement was securing substantial victories in the 1950s and 1960s, Black New Yorkers saw little or uneven progress. Faced with a lack of economic opportunities, pervasive discrimination, and worsening quality of life, they felt a growing sense of disenchantment with the promises of city leaders. Turning to the aftermath of the uprising, Hayes demonstrates that the city's power structure continued its refusal to address structural racism. In the most direct local outcome, a broad interracial coalition of activists called for civilian review of complaints against the police. The NYPD's rank and file fought this demand bitterly, further inflaming racial tensions. The story of the uprisings and what happened next reveals the white backlash against civil rights in the north and crystallizes the limits of liberalism. Drawing on a range of archives, this book provides a vivid portrait of postwar New York City, a new perspective on the civil rights era, and a timely analysis of deeply entrenched racial inequalities.

Crafting Preservation Criteria John H. Sprinkle, Jr., 2014-03-05 In 1966, American historic preservation was transformed by the passage of the National Historic Preservation Act, which created a National Register of Historic Places. Now comprising more than 1.4 million historic properties across the country, the National Register is the official federal list of places in the United States thought to be worthy of preservation. One of the fundamental principles of the National Register is that every property is evaluated according to a standard set of criteria that provide the framework for understanding why a property is significant in American history. The origins of these criteria are important because they provide the threshold for consideration by a broad range of federal preservation programs, from planning for continued adaptive use to eligibility for grants and inclusion in heritage tourism and educational programs. *Crafting Preservation Criteria* sets out these preservation criteria for students, explaining how they got added to the equation and elucidating the test cases that allowed for their use. From artworks to churches, from the fifty-year rule to the historic scene, students will learn how places have been historically evaluated to be placed on the National Register and how the criteria evolved over time. Race, Space, and Riots in Chicago, New York, and Los Angeles Janet L. Abu-Lughod, 2007-09-10 *Race, Space, and Riots in Chicago, New York, and Los Angeles* weaves together historical narratives of major riots with the changing contexts in which they have occurred to show

how urban space politics and economic conditions not simply an abstract race conflict all structure the form and virulence of urban rebellions Comparing six major race riots that occurred in the three largest American metropolitan centers Abu Lughod draws upon archival research primary and secondary sources and field work to reconstruct events especially for the 1964 Harlem riot and Chicago's 1968 riots where no single study currently exists

Reauthoring Savage Inequalities
 Lori D. Patton, Ishwanzya D. Rivers, Raquel L. Farmer-Hinton, Joi D. Lewis, 2023-06-01 Reauthoring Savage Inequalities brings together scholars educators practitioners and students to counter dominant narratives of urban educational environments Using a community cultural wealth lens contributors center the strategies actions and ways of knowing communities of color use to resist systemic oppression So often discussions of urban schooling are filled with stories of what Jonathan Kozol famously referred to as savage inequalities in his 1991 book of the same title with tales of deficiency and despair The counternarratives in this volume grapple with the inequalities highlighted by Kozol Yet in foregrounding lived experiences of educating and being educated in schools and communities that were systemically isolated and disenfranchised then and continue to be thirty years later Reauthoring Savage Inequalities brings nuance to depictions of teaching and learning in urban areas In nineteen essays as well as commentaries a foreword and an afterword contributors engage readers in critical dialogue about the importance of community cultural wealth They identify the sources of support that enable students staff parents and community members to succeed and thrive despite the purposeful divestment in communities of color across this nation's cities

Trees Sonja Dümpelmann, 2019-01-08 A fascinating and beautifully illustrated volume that explains what street trees tell us about humanity's changing relationship with nature and the city. Today cities around the globe are planting street trees to mitigate the effects of climate change. However, as landscape historian Sonja Dümpelmann explains, this is not a new phenomenon. In her eye-opening work, Dümpelmann shows how New York City and Berlin began systematically planting trees to improve the urban climate during the nineteenth century, presenting the history of the practice within its larger social, cultural, and political contexts. A unique integration of empirical research and theory, Dümpelmann's richly illustrated work uncovers this important, untold story. Street trees variously regarded as sanitizers, nuisances, upholders of virtue, economic engines, and more, reflect the changing relationship between humans and nonhuman nature in urban environments. Offering valuable insights and frameworks, this authoritative volume will be an important resource for years to come. A

Angesichts der Dynamiken spätmoderner Konomie und Politik geht es um die Verfügbarkeit und den selbstbestimmten Gebrauch von städtischem Raum und Lebenszeit. Dieser Diskurs schließt auch das Selbermachen von urbanen Freiräumen mit ein. Stadtentwicklung von unten soll die urbanen Freiräume von morgen bestimmen. Bereits nach der Planungseuphorie der 1950/60er Jahre lenkte man den Blick auf andere Akteure der Produktion und des Gebrauchs von urbanen Freiräumen. Dieses Buch widmet sich der vergleichenden Betrachtung der damaligen und aktuellen Theorien über die Aneignung von urbanen Freiräumen in verschiedenen Fachdisziplinen. *Ghetto and Suburbia* Joseph A.
