Radiation Of Atoms In A Resonant Environment:

Radiation of Atoms in a Resonant Environment V P BYKOV, 1994-01-18 This book is devoted to the modern problems of quantum optics Atomic radiations in free space waveguides cavities and periodical structures are investigated The wavepacket quantum mechanical picture of radiation is stressed and different quantum states of the radiation field are described The analysis of the appearance of coherence in lasers is followed by a discussion of the connection between the form of the Hamiltonian and the initial conditions in the radiation problems The quantum theory of interference is also given and causality in the radiation process is investigated and the resolvent method for radiation problems is also described A new type of laser generator with an extremely narrow spectrum is then proposed Finally problems of the quantum mechanical description of macroscopic body movement are discussed in connection with the observation of squeezed light

Radiation of Atoms in a Resonant Environment Vladimir Pavlovich Bykov, 1993 *Laser Control of Atoms and Molecules* Vladilen Letokhov, 2007-02-15 Rather different problems can be lumped together under the general term laser control of atoms and molecules They include the laser selection of atomic and molecular velocities for the purpose of Doppler free spectroscopy laser control of the position and velocity of atoms i e laser trapping and cooling of atoms and laser control of atomic and molecular processes ionization dissociation with a view of detecting single atoms and molecules and particularly separating isotopes and nuclear isomers Over the last decades the principal problems posed have been successfully solved and many of them have evolved remarkably in the subsequent investigations of the international research community For example the solution of the problem of laser cooling and trapping of atoms has given birth to the new field of the physics of ultracold matter i e quantum atomic and molecular gases The laser non coherent control of uni molecular processes has found an interesting extension in the field of laser coherent control of molecules The concept of laser control of position has been successfully demonstrated with microparticles optical tweezers concurrently with investigations into atomic control The laser photo ionization of molecules on surfaces has led to the development of novel techniques of laser assisted mass spectrometry of macromolecules and so on The aim of this book is to review these topics from a unified or coherent point of view It will be useful for many readers in various fields of laser science and its applications

Solid Waste and University Extension Quality Assurance for Environmental Analysis E.A. Maier, B. Griepink, Ph. Quevauviller, 1995-01-13 Quality assurance QA for environmental analysis is a growing feature of the nineties as is illustrated by the number of QA guidelines and systems which are being implemented nowadays There is however often a huge gap between the implementation and respect of QA guidelines and the technical approach undertaken to improve and validate new analytical methods This is particularly true for complex determinations involving multi step methodologies such as those used in speciation and organic analyses Quality assurance may also be considered from the technical point of view which is the focus of this book The techniques used in different analytical fields inorganic speciation and organic analysis are critically reviewed i e discussion of advantages and limitations and existing tools for evaluating their performance are described e g interlaboratory studies use of certified reference materials Particular reference is made to the activities of the Measurements and Testing Programme BCR of the European Commission towards the improvement of quality control of environmental analysis The book has been written by experienced practitioners By its nature it serves as a practical reference for postgraduate students and environmental chemists who need a wide overview of the techniques used in environmental analysis and existing ways of evaluating the performance of relevant analytical methods The critical discussions of the methods described as well as the development of quality assurance aspects makes it unique **Handbook of Geophysics and Space Environments** U.S. Air Force Geophysics Laboratory, 1985 Chemistry³ Andrew Burrows, Andrew Parsons, Gwen Pilling, Gareth Price, 2013-03-21 New to this Edition **Optoelectronics for Environmental Science** Arthur N.
