Modernism in Design Paul Greenhalgh, 1997-07-01 Ten new and important essays on design cover Modernism's fortunes in Germany Italy Sweden Britain Spain Belgium and the USA they range in subject matter from world fairs and everyday domestic objects to American West coast architecture and French and Italian furniture With essays by Tim Benton Gillian Naylor Penny Sparke Wendy Kaplan Clive Wainwright Martin Gaughan Guy Julier Mimi Wilms Julian Holder and Paul Greenhalgh The object of this book is to diffuse myths If modernism has in the past been both absurdly praised and absurdly damned Modernism in Design seeks to lift it out of this cycle and to demonstrate that the modern movement could offer neither Jerusalem nor Babylon In this the book succeeds admirably Designer's Journal While this collection of essays is aimed primarily at design historians and students of design history hard pressed practising designers and architects should make room for it on their bookshelves Design *Rationalism and Romanticism in Architecture* Wojciech G. Competition, 1998-03-16 Available for the first time in English this is the definitive account of the practice of sexual slavery the Japanese military perpetrated during World War II by the researcher principally responsible for exposing the Japanese government's responsibility for these atrocities The large scale imprisonment and rape of thousands of women who were euphemistically called comfort women by the Japanese military first seized public attention in 1991 when three Korean women filed suit in a Tokyo District Court stating that they had been forced into sexual servitude and demanding compensation Since then the comfort stations and their significance have been the subject of ongoing debate and intense activism in Japan much if it inspired by Yoshimi's investigations How large a role did the military and by extension the government play in setting up and administering these camps What type of compensation if any are the victimized women

due These issues figure prominently in the current Japanese focus on public memory and arguments about the teaching and writing of history and are central to efforts to transform Japanese ways of remembering the war Yoshimi Yoshiaki provides a wealth of documentation and testimony to prove the existence of some 2 000 centers where as many as 200 000 Korean Filipina Taiwanese Indonesian Burmese Dutch Australian and some Japanese women were restrained for months and forced to engage in sexual activity with Japanese military personnel Many of the women were teenagers some as young as fourteen To date the Japanese government has neither admitted responsibility for creating the comfort station system nor given compensation directly to former comfort women This English edition updates the Japanese edition originally published in 1995 and includes introductions by both the author and the translator placing the story in context for American readers

Transcultural Architecture Thorsten Botz-Bornstein,2016-03-09 Critical Regionalism is a notion which gained popularity in architectural debate as a synthesis of universal modern elements and individualistic elements derived from local

cultures This book shifts the focus from Critical Regionalism towards a broader concept of Transcultural Architecture and defines Critical Regionalism as a subgroup of the latter One of the benefits that this change of perspective brings about is that a large part of the political agenda of Critical Regionalism which consists of resisting attitudes forged by typically Western experiences is softened and negotiated according to premises provided by local circumstances A further benefit is that several responses dependent on factors that initial definitions of Critical Regionalism never took into account can now be considered At the book's centre is an analysis of Reima and Raili Pietilä's Sief Palace Area project in Kuwait Further cases of modern architecture in China Korea and Saudi Arabia show that the critique which holds that Critical Regionalism is a typical western exercise is not sound in all circumstances The book argues that there are different Critical Regionalisms and not all of them impose Western paradigms on non Western cultures Non Western regionalists can also successfully participate in the Western enlightened discourse even when they do not directly and consciously act against Western models Furthermore the book proposes that a certain architectural rationality can be contained in architecture itself not imposed by outside parameters like aesthetics comfort or even tradition but flowing out of a social game of which architecture is a part The key concept is that of the form of life as developed by Ludwig Wittgenstein whose thoughts are here linked to Critical Regionalism Kenneth Frampton argues that Critical Regionalism offers something well beyond comfort and accommodation What he has in mind are ethical prescripts closely linked to a

Architectural Design, Architectural Theory, History, and Criticism, Human Behavior, Professional Practice, Special Topics, Urban Design Theory and History Georgia Bizios, 1998 *Signs for the Times* Chris Brooks, 2016-07-01 First published in 1984 *Signs for the Times* explores imaginative and creative relationships between three major areas of mid Victorian arts literature painting and architecture Through the detailed critical analysis of particular novels prose writings paintings and buildings Chris Brooks establishes a fusion of realistic and symbolic values that he sees as central to the Victorian creative imagination He argues that the creative achievement of the mid nineteenth century needs to be seen far more as a whole than it has previously and that fundamental imaginative terms are common to art and architecture to major theoretical writers such as Carlyle Ruskin and Rugin as well as to the central literary figure of Dickens All those interested in literature art or architecture will welcome this interpretation of symbolic realism within the mid Victorian world

The Future University Ronald Barnett, 2012 Winner of the Comparative and

International Education Society Higher Education Special Interest Group Best Book Award for 2014 As universities increasingly engage with the world beyond the classroom and the campus those who work within higher education are left to examine how the university's mission has changed Official reviews and debates often forget to inquire into the purposes and responsibilities of universities and how they are changing Where these matters are addressed they are rarely pursued in depth and rarely go beyond current circumstances Those who care about the university's role in society are left looking for a renewed sense of purpose regarding its goals and aspirations The Future University explores new avenues opening up to universities and tackles fundamental issues facing their development Contributors with interdisciplinary and international perspectives imagine ways to frame the university's future They consider the history of the university its current status as an active player in local governments cultures and markets and where these trajectories may lead What does it mean to be a university in the twenty first century What could the university become What limitations do they face and what opportunities might lie ahead This volume in the International Studies in Higher Education series offers bold and imaginative possibilities
