Introduction

U.S. wind energy installations produce enough electricity on a typical day to power the equivalent of more than 9.7 million homes. It is estimated that wind power in America will eliminate an estimated 62 million tons of carbon dioxide annually. This is the equivalent to taking 10.5 million cars off the road. Wind energy will conserve approximately 20 billion gallons of water annually, which would otherwise be consumed for steam or cooling in conventional power plants.

In this activity you will learn how wind energy is generated and how a wind turbine works using the website [Wind with Miller](#).

The Matrix of Lyric Transformation Zong-qi Cai, Zong-qu Cai, 2020-06-01 Pentasyllabic poetry has been a focus of critical study since the appearance of the earliest works of Chinese literary criticism in the Six Dynasties period. Throughout the subsequent dynasties, traditional Chinese critics continued to examine pentasyllabic poetry as a leading poetic type and to compile various comprehensive anthologies of it. *The Matrix of Lyric Transformation* enriches this tradition using modern analytical methods to explore issues of self-expression and to trace the early formal, thematic, and generic developments of this poetic form. Beginning with a discussion of the Yeh fu and ku shih genres of the Han period, Cai Zong-qi introduces the analytical framework of modes from Western literary criticism to show how the pentasyllabic poetry changed over time. He argues that changing practices of poetic composition effected a shift from a dramatic mode typical of folk compositions to a narrative mode and finally to lyric and symbolic modes developed in literati circles. *Nature* Sir Norman Lockyer, 1907

English has many words that sound the same or almost the same but are spelled differently: homophones. There are also words that sound differently and have different meanings but are spelled the same: heteronyms. Collected here are many of these words along with International Pronunciation Alphabet (IPA) pronunciations, definitions, and parts of speech. Section I contains more than 1,100 homophone groups, each having two or more words for a total of more than 2,400 words. Section II contains over 200 heteronyms. The IPA pronunciations are those most likely heard in everyday American speech. Many synonyms are provided with usage examples.
