This comparative study of reading practices in an elite school and a government school in Singapore draws on practice and spatial perspectives to provide critical insight into how taken-for-granted practices and spaces of reading can be, in fact, unacknowledged spaces of inequity. Acknowledging the role of social class in shaping reading education is a start to reconfiguring current practices and spaces for more effective and equitable reading practices. This book shows how using localized, contextualized approaches sensitive to the home, school, national, and global contexts can lead to more targeted policy and practice transformation in the area of reading instruction and intervention. Chapters in the book include: Becoming a Reader, Home School Connections, Singaporean Boys Constructing Global Literate Selves, School-Nation Connections, Levelling the Reading Gap, Socio-Spatial Perspectives. The book will be relevant to literacy scholars and educators, library science researchers, and sociologists interested in the intersection of class and literacy practices in the 21st century.

**Alternatives to Privatizing Public Education and Curriculum** Daniel Ness, Stephen J. Farenga, 2017-03-16 Through conversations in honor of Dale D. Johnson, this book takes a critical view of the monoculture in curriculum and policy that has developed in education with the increase of federal funding and privatization of services for public education and examines the shift from public interest and control to private and corporate shareholder hegemony. Most states' educational responsibilities, assessment of constituents, curriculum development, and instructional protocols are increasingly being outsourced to private enterprises in an effort to reduce state budgets. These enterprises have been given wide access to state resources such as public data from state-sanctioned testing results, field testing rights to public schools, and financial assistance. Chapter authors challenge this paradigm as well as the model that has set growing premiums on accountability and performance measures. Connecting common impact between the standards movement and the privatization of education, this book lays bare the repercussions of high-stakes accountability coupled with increasing privatization.
