

Characteristics: Riparian Water Regulations

Guidelines: Developing A Water Withdrawal Regulatory Program

- Within any area where it intends to control water withdrawals, the Agency should require withdrawal permits by all users above a critical size regardless of their type of use. The Agency may exempt small users from the permitting requirement. It may be helpful to put a cap on the amount of the exempted withdrawal.
- Permits should be defined in terms of both withdrawal and consumption. Any modification of a permit should be subject to Agency review and approval.
- The Agency should establish a procedure for estimating return flows and should use this procedure in its planning.
- Revenues should be generated through administrative fees assessed uniformly of each applicant. Non-payment of administrative fees for a specified period of time should result in a forfeiture of permits.
- The Agency should require measuring devices to be installed on all facilities for withdrawing water from natural watercourses. It should either monitor those withdrawals itself or require a self-reporting system by the users. In the latter case, the Agency should establish an audit system, a citizen reporting system, and unannounced inspections to ensure a high degree of compliance.

Riparian Water Regulations

J Rink

Riparian Water Regulations:

Riparian Water Regulations J. Wayland Eheart, 2002-01-01 Sponsored by the Environmental and Water Resources Institute of ASCE This report explains how to regulate the routine withdrawal of water efficiently both bureaucratically and economically and fairly with minimal involvement of the legal system Combining years of research with practical techniques to set up a program of water withdrawal regulation the suggested guidelines in this volume will assist state provincial or national regulators in regulating water withdrawals from streams lakes aquifers and reservoirs in regions traditionally under the riparian legal doctrine as well as guidance on setting up a program of water withdrawal permit trading Topics include resource assessment and maintenance developing a water withdrawal regulatory program bases for defining permits methods for allocating water among users voluntary permit transfers and special groundwater issues This volume will assist state provincial or national agencies to develop a program of water withdrawal regulations for maintaining minimum streamflow standards and to supplement such programs with permit trading for withdrawals that will minimize the economic impact of meeting streamflow standards **The Regulated Riparian Model Water Code** American Society of Civil Engineers. Water Laws Committee, American Society of Civil Engineers. Water Resources Planning and Management Division, 1997-01-01 The Regulated Riparian Model Water Code incorporates ideas from engineers government administrators working with water lawyers representing environmental and developmental interests business people and academics interested in improving the administration of water allocation laws in the United States The main threats to availability of water and how regulated riparian statutes create mechanisms for long term planning and providing for the public interest are covered as well as resolving quantitative conflicts Topics include declarations of policy general obligations and prohibitions waters subject to allocation protection of minimum flows or levels administrative authority planning responsibilities disputes and enforcement establishing a water right scope of the water right multijurisdictional transfers and water conservation and supply augmentation **A Summary-digest of State Water Laws** Richard L.
