Russia In Transition Policies Classes And Inequalities:

Global Social Policy Bob Deacon, 1997-10-27 This accessible text looks at the impact of the globalization process on social policy National social policy is increasingly determined by global economic competition and international organizations Its substance is becoming more and more transnational and now has to be understood in terms of global social redistribution social regulation social provision and empowerment Global Social Policy examines trends in global inequity and summarizes the diverse experiences of different welfare regimes across the world The authors review the social policies of international organizations such as the World Bank the International Monetary Fund UN Agencies and the European Union and show them to be engaged in heated controversy regarding the future for welfare They argue that this concealed global discourse needs to be brought into an accountable arena

Urban China in Transition John Logan, 2011-07-22 Using an innovative approach this book interprets the unprecedented transformation of contemporary China s major cities It deals with a diversity of trends and analyzes their sources Offers a multi dimensional analysis of urban life in China Highlights a diversity of trends in the areas of migration criminal victimization gated communities and the status of women suburbanization and neighbourhood associations Each chapter includes input from both an expert on urban life in China and an outside expert from the fields of sociology geography economics planning political science history demography architecture or anthropology An alternative theoretical perspective comparing the Chinese experience with other urban settings in the United States Poland Russia Vietnam East and South East Asia and South America

Assisting Russia's Transition Gianni Zanini, 2002-01-01 This evaluation assesses the development effectiveness of the World Bank s lending and non lending assistance to the Russian Federation since 1991 a 10 year period of tumultuous political economic and social change This report concludes that an assistance strategy concentrating on analytical and advisory services with limited financial support for Russia would have been more appropriate than one involving large volumes of adjustment lending

Russian Modernization Markku Kivinen, Brendan G. Humphreys, 2020-11-29 Building on an original interpretation of social theory and an interdisciplinary approach this book creates a new paradigm in the Russian studies Taking a fresh view of Russia s multiple experiences of modernization it seeks to explain the Putin era in a completely new way This book explores the paradoxical and contradictory aspects of Russia analyzing the energy dependent economy and hybrid political regime but also religion welfare and culture and their often complex interrelations Written by a community of both Western and Russian scholars this book re affirms the value of social science when confronting a society that has undergone enormous and costly systematic changes The Russian elites see modernization narrowly as economic and technological competitiveness The contributors to this volume see contemporary Russia facing a series of antinomies which are macro level dilemmas that cannot be abolished either by philosophical mediation or by immediate political decisions As such they are the tension fields that constitute choices for various competing agencies This book will be of interest to scholars and students of Russian

studies transition studies sociology social policy political science energy policy cultural studies and stratification studies Professionals involved in energy ecology and security policy will also find this publication a rich source

Inequalities of the World Göran Therborn, 2006 A groundbreaking exploration of contemporary global inequality by leading scholars from across the world

Ethnic Stratification and Economic Inequality around the World Max Haller in collaboration, Anja Eder, 2016-03-03 The modern world is characterised by pervasive economic inequalities Strong economic growth in some developing countries has contributed to a degree to a reduction in the levels of inequality between nations yet inequality within nations remains high and in some cases continues to increase Ethnic Stratification and Economic Inequality around the World investigates the reasons for these striking differences exploring the coincidence and interaction between economic stratification and ethnic differentiation Drawing on extensive international survey and statistical data the author develops a new theory and concrete hypotheses concerning the conditions which lead toward extreme inequality and those which tend toward greater equality A systematic examination of the interaction between class structures social stratification and ethnic differentiation this book sheds light on the manner in which the resulting social structures produce different levels of economic inequality offering a fivefold typology of patterns of ethnic stratification which can be applied to present day world regions Drawing on the work of Max Weber to provide a rigorous investigation of inequality around the world it demonstrates what sociology as a science of social reality can significantly contribute to our understanding of global economic stratification The book is relevant for a wide social scientific audience particularly for sociologists economists and political scientists working in a comparative perspective

[Handbook of Global Political Policy](#) Stuart Nagel, 2022-04-19 The latest in the six volume set of global policy handbooks this reference utilizes a cross national cross policy approach to examine the public policy of six different regions around the world Combining actual and theoretical perspectives the book compares and presents nonideological resolutions to current political conditions worldwide With contributions from over 30 international policy experts and academicians and containing over 1200 literature references tables and drawings the book is an insightful resource for public administrators and public policy experts political scientists economists sociologists attorneys and students in these disciplines

Elites and Classes in the Transformation of State Socialism David S. Lane, 2012-09-25 The year 2011 marks the twentieth anniversary of the end of the Soviet Union This may be an appropriate time to evaluate the adoption by previously state socialist societies of other economic and political models The transition has sometimes been described in positive terms as a movement to free societies with open markets and democratic elections Others have argued that the transition has created weak poverty stricken states with undeveloped civil societies ruled by unresponsive political elites Which is the more accurate assessment David Lane examines a few of the theoretical approaches that help explain the trajectory of change from socialism to capitalism He focuses on two main approaches in this volume elite theories and social class Theories dwelling on the role of elites regard the transformation from socialism to capitalism as a type of system

transfer in which elites craft democratic and market institutions into the space left by state socialism Lane contrasts this interpretation with class based theories which consider transformation in terms of revolution and explain why such theories have not been considered the best way of framing the transition in the post socialist states While recognizing that elites can play important roles and have the capacity to transform societies Lane contends that elite theories alone are inadequate to explain a system change that brings free markets In contrast he proposes a class approach in which two groups characterize state socialism an administrative class and an acquisition class *Spatial Inequality and Development* Ravi Kanbur,Anthony J. Venables,2005-02-03 What exactly is spatial inequality Why does it matter And what should be the policy response to it These questions have become important in recent years as the spatial dimensions of inequality have begun to attract considerable policy interest In China Russia India Mexico and South Africa as well as most other developing and transition economies spatial and regional inequality of economic activity incomes and social indicators is on the increase Spatial inequality is a dimension of overall inequality but it has added significance when spatial and regional divisions align with political and ethnic tensions to undermine social and political stability Also important in the policy debate is a perceived sense that increasing internal spatial inequality is related to greater openness of economies and to globalization in general Despite these important concerns there is remarkably little systematic documentation of what has happened to spatial and regional inequality over the last twenty years Correspondingly there is insufficient understanding of the determinants of internal spatial inequality This volume attempts to answer the questions posed above drawing on data from twenty five countries from all regions of the world They bring together perspectives and expertise in development economics and in economic geography and form a well researched introduction to an area of growing analytical and policy importance

International Studies in Educational Inequality, Theory and Policy Richard Teese,Stephen Lamb,Marie Duru-Bellat,2007-06-03 Inequality is a marked and persistent feature of education systems both in the developed and the developing worlds Major gaps in opportunity and in outcomes have become more critical than in the past thanks to the knowledge economy and globalization More and more populations both rich and poor depend on successful use of school and on gaining post school qualifications But access to high quality schooling success at school and chances of higher education all remain socially divided with implications for economic opportunities personal growth and civic and community development What causes these divisions in how education systems work Have decades of public investment brought about at least some improvements even if major gaps remain If not what are the barriers the social processes which have frustrated the efforts of government The pursuit of equity as a goal of public policy is examined in this book through a series of national case studies covering many different global contexts from the wealthiest to some of the poorest nations on earth What have we learnt from the policy experience globally Do we know more today than yesterday about the origins of social inequality Are our policies better framed better designed to tackle inequality And which way forward What does the evidence suggest in

terms of future approaches and emphasis This work is published in three volumes which together form a 3 volume set

Lessons from Russia Lee Marsden,2018-10-08 Lee Marsden presents one of the most original and comprehensive analyses of US democracy promotion in Russia and argues that in order to understand the failings of democracy assistance in Russia it is necessary to understand the inter relation of macro and micro level policy The book introduces two new models of foreign policy analysis which increase understanding of both the formulation and implementation of foreign policy Furthermore it demonstrates how the promotion of democracy in Russia was substantially flawed due to implementation and the US foreign policy process

Rethinking Class in Russia Suvi Salmenniemi,2016-04-08 Social differentiation poverty and the emergence of the newly rich occasioned by the collapse of the Soviet Union have seldom been analysed from a class perspective Rethinking Class in Russia addresses this absence by exploring the manner in which class positions are constructed and negotiated in the new Russia Bringing an ethnographic and cultural studies approach to the topic this book demonstrates that class is a central axis along which power and inequality are organized in Russia revealing how symbolic cultural and emotional dimensions are deeply intertwined with economic and material inequalities Thematically arranged and presenting the latest empirical research this interdisciplinary volume brings together work from both Western and Russian scholars on a range of spheres and practices including popular culture politics social policy consumption education work family and everyday life By engaging with discussions in new class analysis and by highlighting how the logic of global neoliberal capitalism is appropriated and negotiated vis vis the Soviet hierarchies of value and worth this book offers a multifaceted and carefully contextualized picture of class relations and identities in contemporary Russia and makes a contribution to the theorisation of class and inequality in a post Cold War era As such it will appeal to those with interests in sociology anthropology geography political science gender studies Russian and Eastern European studies and media and cultural studies

Land Reform in Russia Stephen K. Wegren,2009-11-24 This ambitious work is the definitive account of Russia s land reform initiatives from the late 1980s to today In Russia a country controlling more land than any other nation land ownership is central to structures of power class division and agricultural production The aim of Russian land reform for the past thirty years to undo the collectivization of the Soviet era and encourage public ownership has been largely unsuccessful To understand this failure Stephen Wegren examines contemporary land reform policies in terms of legislation institutional structure and human behavior Using extensive survey data he analyzes household behaviors in regard to land ownership and usage based on socioeconomic status family size demographic distribution and regional differences Wegren s study is important and timely as Russian land reform will have a profound effect on Russia s ability to compete in an era of globalization

The Destruction of the Soviet Union D. Lockwood,2015-12-22 Is there a link between the collapse of the Soviet Union the radical reforms in China and Vietnam and the current crisis in East Asia David Lockwood argues that the common factor in each is the crisis of state controlled economies besieged by the developing forces of globalization This book

examines the collapse of the Soviet Union not as the end of history or the beginning of a new world order but as an illustration of processes that are taking place the world over The author concludes that it was globalization that brought down the communist system Globalization continues to threaten state controlled economies from the remaining socialist state to the NICs of East Asia **Soviet Russia Pictorial** ,1921 *World Yearbook of Education 2011* Lyn Yates,Madeleine Grumet,2011-02 This book brings together contributions from around the world that analyse and reflect on the way curriculum is configuring and reconfiguring that world Neoliberalism Inequality and Authoritarianism Jon Kofas,2024-09-03 This book exposes the inherent contradictions of neoliberalism The myth of limitless growth ignores the reality of resource constraints and fuels a global upward transfer of wealth Meanwhile a fractured global economy and intensifying class warfare chip away at neoliberalism s foundation As inequality spirals and social justice crumbles the model increasingly serves a privileged few at the expense of the majority This undermines the Enlightenment ideal of using liberal democracy to improve lives in the age of mass politics threatening neoliberalism s very survival Inequality in Public School Admission in Urban China Jing Liu,2018-05-02 This book explores and interprets discourses and practices in school admissions to public lower secondary education in urban China by utilizing a discourse analysis approach and a case study method It identifies continuities and changes in discourses shaped by diverse forces in public lower secondary school admissions in the context of China s social transformation from a profit driven society to a more equitable society and elucidates the power relationships among stakeholders in public school admissions by analysing their interplay in the process More importantly it exposes how current socio economic institutional and educational systems are shaping the engagement of stakeholders in the public school admissions process It also presents some on going projects intended to yield new policies and practices for more equitable public secondary education in China in the development stage of the post 2015 OECD Economic Surveys: Russian Federation 2013 OECD,2014-01-15 This 2013 edition of OECD s period review of the Russian economy examines recent economic developments prospects and policies A special chapter covers boosting productivity by improving the business climate and skills **Explaining Post-Soviet Patchworks** Klaus Segbers,2017-10-05 This title was first published in 2001 Based on extensive research this trilogy provides new insights into Post Soviet transformations without taking refuge in the traditional assumption that Russia is unique Using powerful analytical tools this trilogy marks the re integration of the Former Soviet Union FSU into the main current of political science An invaluable resource for all those interested in Russia and the Post Soviet states This first volume focuses on state sectoral and transnational actors from a predominantly rational choice perspective The book includes an extensive introduction by the editor which uses additional material gathered by the project team on two polls 1999 and 2000 which in addition to the individual studies provide sufficient data to obtain unprecedented insights into the basic preferences and the logic of action of the main players in Russia The outcomes of this research will be particularly relevant for students researchers journalists and decision makers
