Understanding Economic Transitions explains the genesis operation and transformation of the centrally planned socialist economy which figured prominently in the lives of billions of people in twentieth century Europe and Asia Just as importantly the centrally planned socialist economy s demise coincided with the shift from nonindustrial to industrial economy and de industrialization in some cases and the onset of ICT driven globalization Using theory empirics and selected country case studies this book teases out the enduring lessons from the myriad and fraught pathways of transition from socialism to capitalism Understanding Economic Transitions provides a self contained comprehensive and authoritative treatment of modern economic systems This textbook has four features of particular use to students i Using the prism of comparative institutionalism it melds theory and evidence to revisit the varieties of planned and market driven systems today ii It takes economic planning seriously in theory and practice central cooperative or indicative as the most prominent marker of the ever changing boundaries between state and market iii It focuses on the dynamics of systemic transition in formerly socialist countries by contextualizing them in terms of the whence central planning the how modalities of transition and the whither illiberal or liberal capitalism of politico economic transformation and iv It examines the profound impact on these structural processes of the post 1990 phase of economic globalization With its clear comprehensive content and useful pedagogical features this textbook will prepare students to understand how economies transition and why

Global Perspectives on Corporate Governance and CSR Güler Aras, 2016-04-22 Good governance is good PR it is important in every sphere of society whether it be the corporate environment the political or wider society When resources are too limited to meet the minimum expectations of the people it is a good governance level that can help to promote the welfare of society Enlightened companies recognise that there is a clear link between governance and corporate social responsibility and make efforts to link the two Unfortunately this is too often no more than making a claim that good governance is a part of their CSR policy as well as a part of their relationship with shareholders Corporate Governance and CSR are significant issues in all parts of the world huge amounts of time and energy are devoted to its global interpretation Most analysis however is too simplistic to be helpful as it normally resolves itself into simple dualities rules based v principles

based or Anglo Saxon v Continental The editors of this book argue that this is not helpful that the reality is far more complex They show that Corporate Governance and CSR cannot be understood without taking geographical cultural and historical factors into account It is necessary they say to understand the concerns of people in different parts of the world Therefore by using a wealth of case studies theoretical models and drawing on the knowledge and perspective of experts from around the world the editors have produced this valuable book Global Perspectives on Corporate Governance and CSR discusses issues such as regional and cultural similarities and differences the contexts of differing legal frameworks and governance codes differences between large companies and SMEs governance in new environments companies and economies versus stable environments and the changing environment affecting corporate social responsibility around the world The editors then synthesise this in a way that will be helpful to business people as well as to academics

The Political Economy of Stalinism Paul R. Gregory, 2004 This book uses the formerly secret Soviet state and Communist Party archives to describe the creation and operations of the Soviet administrative command system It concludes that the system failed not because of the jockey i e Stalin and later leaders but because of the horse the economic system Although Stalin was the system s prime architect the system was managed by thousands of Stalins in a nested dictatorship The core values of the Bolshevik Party dictated the choice of the administrative command system and the system dictated the political victory of a Stalin like figure This study pinpoints the reasons for the

failure of the system poor planning unreliable supplies the preferential treatment of indigenous enterprises the lack of knowledge of planners etc but also focuses on the basic principal agent conflict between planners and producers which created a sixty year reform stalemate
