Translated by Irene Nove with the assistance of John Biggart, etc** Moshé LEWIN, John BIGGART (Translator.), Irene NOVE, 1968 Soviet State and Society Between Revolutions, 1918-1929 Lewis H. Siegelbaum, 1992-08-20 The evolution of the ruling Communist Party and its New Economic Policy is explored in the first book to analyze the relationship between the Soviet state and society from 1917 through the early 1930s through the changing fortunes of its peoples *The Nature of Soviet Power* Andy Bruno, 2016-04-11 During the twentieth century the Soviet Union turned the Kola Peninsula in the northwest corner of the country into one of the most populated industrialized militarized and polluted parts of the Arctic This transformation suggests above all that environmental relations fundamentally shaped the Soviet experience Interactions with the natural world both enabled industrial livelihoods and curtailed socialist promises Nature itself was a participant in the communist project Taking a long term comparative perspective *The Nature of Soviet Power* sees Soviet environmental history as part of the global pursuit for unending economic growth among modern states This in depth exploration of railroad construction the mining and processing of phosphorus rich apatite reindeer herding nickel and copper smelting and energy production in the region examines Soviet cultural perceptions of nature plans for development lived experiences and modifications to the physical world While Soviet power remade nature nature also remade Soviet power **Power and the Sacred in Revolutionary Russia** Glennys Young, 2010-11 After the 1917 Revolution in Russia the Bolsheviks launched a massive assault on religion Although we know a great deal about how the Bolsheviks went about doing this propaganda persecution of clergy and laity seizing church property scholars have not devoted much attention to the other side of the story the people who were being persecuted and how they responded to their persecutors Glennys Young shows how ordinary Russian peasants devised ways of asserting their religious faith during the difficult period of New Economic Policy 1921-28 when the Party state was ideologically obsessed with eradicating religion Faced with persecution torture and the creation of antireligious organizations such as the League of the Godless Orthodox clergy and laity organized themselves against the Bolsheviks They

revived factional politics even using the village soviets the intended cornerstone of Soviet power in the countryside to defend their religious interests When they achieved some degree of success in their resistance the Bolsheviks were forced to respond and adapt their strategies a conclusion that scholars have not put forward previously Based on extensive research in archives and published sources Young's book will force historians of Soviet Russia to confront religious issues as central to rural politics Her work also draws upon cultural anthropology and theories of peasant politics making it of great interest to any scholars studying the processes of secularization and desacralization in other cultures *Peasants And Power* Joan Sokolovsky, 2019-05-28 Focusing on events in Hungary and Poland from 1948 to 1962 Dr Sokolovsky shows why collectivization can best be understood as an element in state building for the new regimes of Eastern Europe For these countries policy options were constrained by dependence upon the Soviet Union and the economic demands of a newly industrializing society *Econom*

Nomads and Soviet Rule Alun Thomas, 2018-06-14 The nomads of Central Asia were already well accustomed to life under the power of a distant capital when the Bolsheviks fomented revolution on the streets of Petrograd Yet after the fall of the Tsar the nature and potency of that power would change dramatically ultimately resulting in the near eradication of Central Asian nomadism Based on extensive primary source work in Almaty Bishkek and Moscow *Nomads and Soviet Rule* charts the development of this volatile and brutal relationship and challenges the often repeated view that events followed a linear path of gradually escalating violence Rather than the sedentarisation campaign being an inevitability born of deep rooted Marxist hatred of the nomadic lifestyle Thomas demonstrates the Soviet state's treatment of nomads to be far more complex and pragmatic He shows how Soviet policy was informed by both an anti colonial spirit and an imperialist impulse by nationalism as well as communism and above all by a lethal self confidence in the Communist Party's ability to transform the lives of nomads and harness the agricultural potential of their landscape This is the first book to look closely at the period between the revolution and the collectivisation drive and offers fresh insight into a little known aspect of early Soviet history In doing so the book offers a path to refining conceptions of the broader history and dynamics of the Soviet project in this key period

Reforming Justice in Russia, 1864-1994: Power, Culture and the Limits of Legal Order Peter H. Solomon, 2017-07-05 Measuring Russian legal reform in relation to the rule of law ideal this study also examines the legal institutions culture and reform goals that have actually prevailed in Russia Judgements about future prospects are measured adding new dimensions to our understanding of the Soviet legacy *Blood and Soil* Ben Kiernan, 2007-01-01 Kiernan examines outbreaks of mass violence from the classical era to the present focusing on worldwide colonial exterminations and 20th century case studies including the Armenian genocide the Nazi Holocaust Stalin's mass murders and the Cambodian and Rwandan genocides *Iconography of Power* Victoria E. Bonnell, 1998-02-05 Masters at visual propaganda the Bolsheviks produced thousands of vivid and compelling posters after they seized power in October 1917 Intended for a semi literate population that was accustomed to the rich visual legacy of the Russian autocracy and the

Orthodox Church political posters came to occupy a central place in the regime's effort to imprint itself on the hearts and minds of the people and to remold them into the new Soviet women and men. In this first sociological study of Soviet political posters, Victoria Bonnell analyzes the shifts that took place in the images, messages, styles, and functions of political art from 1917 to 1953. Everyone who lived in Russia after the October revolution had some familiarity with stock images of the male worker, the great communist leaders, the collective farm woman, the capitalist, and others. These were the new icons, standardized images that depicted Bolshevik heroes and their adversaries in accordance with a fixed pattern. Like other invented traditions of the modern age, iconographic images in propaganda art were relentlessly repeated, bringing together Bolshevik ideology and traditional mythologies of pre-Revolutionary Russia. Symbols and emblems featured in Soviet posters of the Civil War and the 1920s gave visual meaning to the Bolshevik worldview dominated by the concept of class. Beginning in the 1930s, visual propaganda became more prescriptive, providing models for the appearance, demeanor, and conduct of the new social types, both positive and negative. Political art also conveyed important messages about the sacred center of the regime, which evolved during the 1930s from the celebration of the heroic proletariat to the deification of Stalin. Treating propaganda images as part of a particular visual language, Bonnell shows how people read them, relying on their habits of seeing and interpreting folk, religious, commercial, and political art, both before and after 1917, as well as the fine art traditions of Russia and the West. Drawing on monumental sculpture and holiday displays, as well as posters, the study traces the way Soviet propaganda art shaped the mentality of the Russian people; the legacy is present even today and was itself shaped by popular attitudes and assumptions. **Iconography of Power** includes posters dating from the final decades of the old regime to the death of Stalin, located by the author in Russian, American, and English libraries and archives. One hundred exceptionally striking posters are reproduced in the book; many of them never before published. Bonnell places these posters in a historical context and provides a provocative account of the evolution of the visual discourse on power in Soviet Russia. **Works in Progress** Jenny Leigh Smith, 2014-10-28 This book is the first to investigate the gap between the plans and the reality of the Soviet Union's mid-twentieth-century project to industrialize and modernize its agricultural system. Historians agree that the project failed badly; agriculture was inefficient, unpredictable, and environmentally devastating for the entire Soviet period. Yet assigning the blame exclusively to Soviet planners would be off the mark. The real story is much more complicated and interesting. Jenny Leigh Smith reveals in this deeply researched book. Using case studies from five Soviet regions, she acknowledges hubris and shortsightedness where it occurred but also gives fair consideration to the difficulties encountered and the successes, however modest, that were achieved. **Before Command** Paul R. Gregory, 2014-07-14 In a work with significant implications for present-day economic reform in the Soviet Union, Paul Gregory examines Russian and Soviet economic history prior to the installation of the administrative command system. By drawing on basic economic statistics from 1861 to the 1930s, Gregory's revisionist account debunks a number of myths promulgated by historians in both the East and

the West He demonstrates that the Russian economy under the tsars performed much better than has previously been supposed the Russian economy and its financial institutions were integrated into the world economy allowing Russia to attract significant foreign capital Furthermore he shows that Stalin s justifications for the abandonment of the New Economic Policy in the late 1920s were incorrect the so called crises of NEP were either fabricated or the result of misguided economic thinking Before Command is the culmination of the author s lifelong study of the economic history of Russia and the Soviet Union In convincing detail it describes little known Russian and Soviet successes with market capitalism while it also shows the problems inherent in a mixed system such as the NEP which seeks to combine very strong elements of command with market resource allocation Originally published in 1994 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
