Sadat And His Statecraft:

Sadat and His Statecraft Felipe Fernández-Armesto, 1983 Sadat and the Art of Statecraft: "Great Men Dedicated to Peace and Progress.", 1997 This essay examines the 1972-1974 period of Anwar Sadat's leadership as President of Egypt with a focus on his abilities as a statesman and his skill as a practitioner of the art of statecraft. The author shows that Sadat was an adept statesman particularly during the key policy event of this period, the October 1973 Arab-Israeli War. He successfully created and harnessed this event using all the means of statecraft to secure the national interests and objectives he wanted for his country. Though the Arab-Israeli war is one way to highlight Sadat's skill as a statesman, it was the 1973 Arab-Israeli peace that shows the true expertise of Sadat's statecraft because war was only one tool used by Sadat to reach his overall objectives. In this case, the art of war worked closely with the art of diplomacy to fashion a synergistic Egyptian foreign policy that would attain a better state of peace. This examination of the structure and success of Sadat's grand strategy begins by looking at Egypt's national interests and the threats to those interests. Next is an assessment of Sadat's perception of Egyptian power and a look at the opportunities available to him in the context of the environment he faced. The essay assesses Sadat's effectiveness in adapting to the unexpected and marshaling the tools of statecraft to secure a better peace and presents the lessons others can learn from his example. Statecraft in the Middle East Imad

Mansour, 2016-09-27 What role do ideas play in state building and state activity? This book argues that government policies in both foreign relations and domestic politics must always be situated within a broader ideological and societal context. Imad Mansour analyses how governments in the contemporary Middle East have governed internally and acted externally based on societal narratives which bring together a variety of ideas about a society's history and place in the world. He argues that there is a dominant societal narrative that acts as a primary building block of statecraft where statecraft is understood as an ongoing set of local, regional, and global state building processes. Mansour investigates the ways in which statecraft in the Middle East has been guided by narratives through a close historical reading and comparative discussion of the political activity of six states: Egypt, Israel, Syria, Turkey, Saudi Arabia, and Iran in the second half of the twentieth century and the early twenty-first century. His book demonstrates the analytical power of narratives in understanding statecraft and explains why governments' decisions need to be understood in complex ways. *Middle Power Statecraft* Jonathan H. Ping, 2017-11-30

Jonathan Ping's volume establishes a unifying theory for the concept of middle power. MPs are states which have an innate form of statecraft and perceived power as a result of their size. The book presents hybridization theory as a basis for analysis, policy development, and prediction of MP statecraft and perceived power. A prerequisite to the founding of hybridization theory is the new statistical method of definition which identifies sixteen MPs of Asia and the Pacific. The volume takes a comparative focus on Indonesia and Malaysia to inform and test hybridization theory as well as to provide a historical analysis of Southeast Asia from a statecraft and perceived power perspective. It offers researchers and scholars of

international relations and international political economy a theory that can be applied to the practical study of all middle sized states while middle sized states can apply the same theory to enhance their own ability to re create their state

Building Air Bases in the Negev Frank N. Schubert, 1992 Building Air Bases in the Negev is a remarkable story of the U S Army Corps of Engineers role supporting national diplomatic initiatives overseas while managing a major construction project in Israel Frank N Schubert has written a superbly organized account tracing from the spring of 1979 to the summer of 1982 the development and completion of two ultramodern air bases at a cost that only exceeded original estimates by less than 3 percent As Schubert suggests the air base program helped bring peace between two long term antagonists Israel and Egypt Schubert s work serves as an important case study for analyzing not only engineering project management and construction practices but also demanding sociopolitical cultural and business conditions in sovereign foreign lands

Economic Statecraft and Foreign Policy Jean-Marc F. Blanchard, Norrin M. Ripsman, 2013-07-18 This book develops a unified theory of economic statecraft to clarify when and how sanctions and incentives can be used effectively to secure meaningful policy concessions High profile applications of economic statecraft have yielded varying degrees of success The mixed record of economic incentives and economic sanctions in many cases raises important questions Under what conditions can states modify the behaviour of other states by offering them tangible economic rewards or by threatening to disrupt existing economic relations To what extent does the success of economic statecraft depend on the magnitude of economic penalties and rewards In order to answer these questions this book develops two analytic models one weighs the threats economic statecraft poses to the Target s Strategic Interests TSI while the other stateness assesses the degree to which the target state is insulated from domestic political pressures that senders attempt to generate or exploit Through a series of carefully crafted case studies including African apartheid and Japanese incentives to obtain the return of the Northern Territories the authors demonstrate how their model can yield important policy insights in regards to
