Secure Data Management Vldb 2004 Workshop Sdm 2004 Toronto Canada August 30 2004 Proceedings:

Secure Data Management Willem Jonker, 2004-08-19 This book constitutes the refereed proceedings of the VLDB 2004 International Workshop on Secure Data Management in a Connected World SDM 2004 held in Toronto Canada in August 2004 in association with VLDB 2004 The 15 revised full papers presented were carefully reviewed and selected from 28 submissions The papers are organized in topical sections on encrypted data access privacy preserving data management access control and database security

Secure Data Management Willem Jonker, Milan Petkovic, 2004-12-07 Concepts like ubiquitous computing and ambient intelligence that exploit increasingly interconnected networks and mobility put new requirements on data management An important element in the connected world is that data will be accessible anytime anywhere This also has its downside in that it becomes easier to get unauthorized data access Furthermore it will become easier to collect store and search personal information and endanger people's privacy As a result security and privacy of data becomes more and more of an issue Therefore secure data management which is also privacy enhanced turns out to be a challenging goal that will also seriously influence the acceptance of ubiquitous computing and ambient intelligence concepts by society With the above in mind we organized the SDM 2004 workshop to initiate and promote secure data management as one of the important interdisciplinary search fields that brings together people from the security research community and the data management research community The call for papers attracted 28 submissions both from universities and industry The program committee selected 15 research papers for presentation at the workshop The technical contributions presented at the SDM workshop are collected in this volume which we hope will serve as a valuable research and reference book in your professional life

Privacy Preserving Data Mining Jaideep Vaidya, Christopher W. Clifton, Yu Michael Zhu, 2006-09-28 Data mining has emerged as a significant technology for gaining knowledge from vast quantities of data However concerns are growing that use of this technology can violate individual privacy These concerns have led to a backlash against the technology for example a Data Mining Moratorium Act introduced in the U S Senate that would have banned all data mining programs including research and development by the U S Department of Defense Privacy Preserving Data Mining provides a comprehensive overview of available approaches techniques and open problems in privacy preserving data mining This book demonstrates how these approaches can achieve data mining while operating within legal and commercial restrictions that forbid release of data Furthermore this research crystallizes much of the underlying foundation and inspires further research in the area Privacy Preserving Data Mining is designed for a professional audience composed of practitioners and researchers in industry This volume is also suitable for graduate level students in computer science

Secure Data Management Willem Jonker, Milan Petković, 2014-03-12 Concepts like ubiquitous computing and ambient intelligence that exploit increasingly interconnected networks and mobility put new requirements on data management An important element in the connected world is that data will be accessible anytime anywhere This also

Secure Data Management Willem Jonker, Milan Petković, 2014-05-14 This book constitutes the refereed proceedings of the 10th VLDB Workshop on Secure Data Management held in Trento Italy on August 30 2013 The 15 revised full papers and one keynote paper presented were carefully reviewed and selected from various submissions The papers are organized in technical papers and 10 vision papers which address key challenges in secure data management and indicate interesting research questions

Secure Data Management Willem Jonker, Milan Petkovic, 2008-08-18 Information and communication technologies are advancing fast Processing speed is still increasing at a high rate followed by advances in digital storage technology which double storage capacity every year Furthermore communication technologies do not lag behind The Internet has been widely used as well as wireless technologies With a few mouse clicks people can communicate with each other around the world All these advances have great potential to change the way people live introducing new concepts like ubiquitous computing and ambient intelligence Technology is becoming present everywhere in the form of smart and sensitive computing devices They are nonintrusive transparent and hidden in the background but they collect process and share all kinds of information including user behavior in order to act in an intelligent and adaptive way These emerging technologies put new requirements on security and data management As data are accessible anytime anywhere it becomes much easier to get unauthorized data access Furthermore the use of new technologies has brought about some privacy concerns It becomes simpler to collect store and search personal information thereby endangering people's privacy Therefore research in secure data management is gaining importance attracting the attention of both the data management and the security research

communities The interesting problems range from traditional topics such as access control and general database security via privacy protection to new research directions such as cryptographically enforced access control DMSN '04, 2004
