Secure Electronic Voting:

Secure Electronic Voting Dimitris A. Gritzalis, 2012-12-06 *Secure Electronic Voting* is an edited volume which includes chapters authored by leading experts in the field of security and voting systems. The chapters identify and describe the given capabilities and the strong limitations as well as the current trends and future perspectives of electronic voting technologies with emphasis in security and privacy. *Secure Electronic Voting* includes state of the art material on existing and emerging electronic and Internet voting technologies which may eventually lead to the development of adequately secure e voting systems. This book also includes an overview of the legal framework with respect to voting, a description of the user requirements for the development of a secure e voting system and a discussion on the relevant technical and social concerns. *Secure Electronic Voting* includes also three case studies on the use and evaluation of e voting systems in three different real world environments.

Design, Development, and Use of Secure Electronic Voting Systems Zissis, Dimitrios, Lekkas, Dimitrios, 2014-03-31 In modern electoral processes Information and Communication Technologies play a crucial role whether used in voter registration, ballot casting or processing of results. Securing these systems is a necessary step in ensuring the fairness of the democratic process. *Design, Development, and Use of Secure Electronic Voting Systems* analyzes current research on the integration of modern technologies with traditional democratic systems, providing a framework for designing and deploying electronic voting systems in any context or society. Stakeholders, researchers, architects, designers and scholars interested in the use of electronic systems in government processes will use this book to gain a broader understanding of some of the latest advances in this emerging field.

Electronic Voting Robert Krimmer, Melanie Volkamer, Jordi Barrat, Josh Benaloh, Nicole Goodman, Peter Y. A. Ryan, Vanessa Teague, 2017-01-25 This book constitutes the thoroughly refereed conference proceedings of the First International Joint Conference on Electronic Voting (E-Vote-ID 2016) held in Bregenz, Austria, in October 2016. The 14 full papers presented were carefully reviewed and selected from 57 submissions. They represent a wide range of technological proposals for different voting settings, be it in polling stations, remote voting or even mobile voting, and case studies from different countries already using electronic voting or having conducted first trial elections.

Evaluation of Electronic Voting Melanie Volkamer, 2009-07-14 Electronic voting has a young and attractive history both in the design of basic cryptographic methods and protocols and in the application by communities who are in the vanguard of technologies. The crucial aspect of security for electronic voting systems is subject to research by computer scientists as well as by legal, social and political scientists. The essential question is how to provide a trustworthy base for secure electronic voting and hence how to prevent accidental or malicious abuse of electronic voting in elections. To address this problem, Volkamer structured her work into four parts. *Fundamentals* provides an introduction to the relevant issues of electronic voting. *Requirements* contributes a standardized, consistent and exhaustive list of requirements for e voting systems. *Evaluation* presents the proposal and discussion of a standardized evaluation methodology.

and certification procedure called a core Protection Profile Finally Application describes the evaluation of two available remote electronic voting systems according to the core Protection Profile The results presented are based on theoretical considerations as well as on practical experience In accordance with the German Society of Computer Scientists Volkamer succeeded in specifying a Protection Profile for a Basic Set of Security Requirements for Online Voting Products which has been certified by the German Federal Office for Security in Information Technology Her book is of interest not only to developers of security critical systems but also to lawyers security officers and politicians involved in the introduction or certification of electronic voting systems Electronic Voting David Duenas-Cid, Peter Roenne, Melanie Volkamer, Michelle Blom, Pierrick Gaudry, Isabelle Borucki, Leontine Loeber, Alexandre Debant, 2025-09-10 This open access book constitutes the proceedings of the 10th International Joint Conference on Electronic Voting E Vote ID 2024 held in Nancy France during October 1 3 2025 The 13 full papers included in this book were carefully reviewed and selected from 39 submissions They focus on on the development of Electronic and Internet Voting and Electoral Technologies from aspects relating to security and usability to practical experiences and applications of voting systems also including legal social or political aspects amongst others turning out to be an important global reference point concerning these issues **Secure Electronic Voting** Nirmalya Kar, Sharmistha Roy, 2012 With the use of a cryptographically secure e voting system as the one presented in the book many of the issues that have challenged traditional voting systems in the past are bound to be resolved providing peace of mind to both voters and election candidates At every step the system maintains confidentiality security privacy authentication The new system preserves the integrity of the voting process from the minute a voter steps in to cast his her vote until the cast vote is registered in favor of the chosen candidate at a globally allocated DB repository The proposed system is capable of denying access to any illegal voter s preventing multiple votes by the same voter and blocking any introduced forms of malice that would adversely affect the voting process altogether The system also provides the facility for every voter to verify their votes after the completion of the Voting process which increases trust and satisfaction of every citizen This research has been done at National Institute of Technology Agartala Tripura India as a part of the M Tech project
