2 Pell Center for International Relations and Public Policy Salve Regina University 1 Nontraditional Threats to Security The events of September 11 2001 have sharpened the debate over the meaning of being secure Before 9 11 there were warnings in all parts of the world that social and environmental changes were occurring While there was prosperity in North America and Western Europe there was also increasing recognition that local and global effects of ecosystem degradation posed a serious threat Trekking from Cairo to Cape Town thirty years after living in Africa as a young teacher for example travel writer Paul Theroux concluded that development in sub Saharan Africa had failed to improve the quality of life for 300 million people Africa is materially more decrepit than it was when I first knew it hungrier poorer less educated more pessimistic more corrupt and you can't tell the politicians from the witch doctors 2002 While scholars and historians will debate the causes of 9 11 for some time one message is clear An often dizzying array of nontraditional threats and complex vulnerabilities define security today We must understand them and deal with them or suffer the consequences Environmental security has always required attention to nontraditional threats linked closely with social and economic well being

Human Security and the Environment Edward Page, M. R. Redclift, 2002-01-01 In the post Cold War era the pre eminent threats to our security derive from human degradation of vital ecosystems as well as the possibility of war and terrorist attack This substantial book examines this new security environment paradigm and the way in which the activities of societies are shifting the balance with nature The distinguished authors investigate this redefinition of security with particular reference to environmental threats such as climate change and the availability of adequate supplies of food and water They illustrate how unfettered economic growth rising levels of personal consumption and unsustainable natural resource and energy procurement are taking a heavy toll on the global environment This in turn is forcing both developed and developing countries to re evaluate the more immediate environmental security of their own populations For a truly global perspective the authors present a series of country case studies looking at issues of security and environment and comparing how they influence policy and human well being They also discuss a number of theoretical issues which underpin

discussions of environmental security demonstrating that this is a relatively new and essentially contested concept

Environmental Security and Sustainable Land Use - with Special Reference to Central Asia Hartmut

2004 **Environmental Security in the Arctic Ocean** Paul Arthur Berkman, Alexander N. Vylegzhanin, 2012-11-29 This seminal book results from a NATO Advanced Research Workshop at the University of Cambridge with Russian co-directorship enabling the first formal dialogue between NATO and Russia about security issues in the Arctic Ocean. Involving interdisciplinary participation with experts from 17 nations including all of the Arctic states, this workshop itself reflects progress in Arctic cooperation and collaboration. Interests now are awakening globally to take advantage of extensive energy, shipping, fishing, and tourism opportunities in the Arctic Ocean as it is being transformed from a permanent sea ice cap to a seasonally ice-free sea. This environmental state change is introducing inherent risks of political, economic, and cultural instabilities that are centralized among the Arctic states and indigenous peoples with repercussions globally. Responding with urgency, environmental security is presented as an integrated approach for assessing and responding to the risks as well as the opportunities generated by an environmental state change. In this book, diverse perspectives on environmental security in the Arctic Ocean are shared in chapters from high-level diplomats, parliamentarians, and government officials of Arctic and non-Arctic states; leaders of Arctic indigenous peoples organizations; international law advisors from Arctic states as well as the United Nations; directors of inter-governmental organizations and non-governmental organizations; managers of multi-national corporations; political scientists, historians, and economists; along with Earth system scientists and oceanographers. Building on the common Arctic issues of sustainable development and environmental protection established by the Arctic Council, environmental security offers a holistic approach to assess opportunities and risks as well as develop infrastructure responses with law of the sea as the key international legal framework to promote the peaceful uses of the Arctic Ocean. With vision for future generations, environmental security is a path to balance national interests and common interests in the Arctic Ocean for the lasting benefit of all. **Achieving Environmental Security** P.
